

Hand-held welding torches Vento-Q

The new, sturdy and high performance hand welding device in the Vento-Line from FORSTHOFF with electronically commutated motor.

Product description

The Vento-Q is the efficient hot air welding device for welding all thermoplastics.

The Vento-Line, which the Vento-Q belongs to, is characterised by its brushless motors. With consequential optimisation of the active core elements of the motor and the use of modern individual cog winding, the power density is considerably increased in comparison to standard brushless motors. This means the Vento-Q achieves an air output of 450 litres/minute.

The device has a heating power of 1500 Watt 230 V and constant and absolutely reliable control electronics for temperatures up to 700 °C.

The air-cooled heating element pipe fits several different types of nozzles.

The universal device for welding all thermoplastics. Welding technical textiles, tarpaulin fabrics, pond films, roof films and films in swimming pool construction.
