## Collection 2018

Where elegance meets rustic nonchalance and nautical style meets La Dolce Vita in a stylish, feel-good atmosphere with a solid practicality – and the choice is yours!

The MY FLOOR Collection 2018 unites elegant design and the authentic look of real wood with the advantages of a top-quality, modern laminate floor. It is tough, low-maintenance and durable. Whether you prefer the feel of life by the sea or the urban elegance of a town house, MY FLOOR has just the floor to make you feel good, without compromise on quality or appearance.

Our decors are original and, in the truest sense of the word, sublime. The different surface structures promise variety. Our decorative imprints create an authentic wood-look which is second to none. All floors from MY FLOOR are extremely durable and have the highest abrasion class rating.

For the sake of the environment, we source our wood from sustainable forests. All of our products are made from natural, renewable raw materials and low-pollution wood-based materials. We keep the manufacturing chain lean and efficient: our energy management is certified and particularly resource-saving.

And now: you can enjoy the new MY FLOOR Collection 2018 and be inspired by our living styles.

Made in   
Germany

## Consciously creating new accents

Achim Scholz has been in the wood business for 23 years and has been Head of Product Management at SWISS KRONO TEX since 2009, responsible, among other things, for the design of MY FLOOR laminate flooring. A conversation with the father of "Harbor Oak" laminate flooring, popular worldwide.

“

Everything is possible when developing new designs for MY FLOOR. And the exciting thing for me is being able to nurture them from the beginning.

*Achim Scholz*

**You are a skilled craftsman. Does that help you with your current job in product development?**

Actually, my job today is a lot different from what I once learned. I still see myself as a technician, as a craftsman, but in a different sense. More in the sense of developing high-quality, artisan design products. And of course, understanding craftsmanship helps the company in terms of production support. A current example of this is in the development of the new ER decors, one of MY FLOOR's specialities. These are decors in which design and embossing are identical, so that they look like real wood. Our decor of the year, "Chestnut Sauvignon", is one of those, a very rare decor anywhere in the world.

**How is a new MY FLOOR design created?**

I go to a lot of international trade fairs, talk to customers, look at the products in the market and what is selling well in our range. We create our designs in part using international designers, but also have a hand in the decors here at our facility in Germany. The final step is to produce the printing and embossing templates. All of our products from Heiligengrabe are "Made in Germany", including the accessories.

**How do you manage to meet the worldwide demand for individuality in such an exclusive but internationally-distributed collection?**

Over the years, we have focused more and more on our customers. After all, we are present in more than 40 countries. We have adapted the decor selection to the requirements of our partners in very different countries and have drawn on their inspiration. This has resulted in the emergence of laminate floors which enjoy worldwide popularity. From South America to China to Europe.

**New collections offer the opportunity to try new things, to set trends. What can we expect from MY FLOOR in 2018?**

Much of our collection is built on consistency with subtle updates. But of course there are new developments, trends that we set in the international market. Hydraulic Tile, Colour Oak, Old Pine – these are decors that are currently very trendy and with which we are breaking new ground. We do this consciously. I see them as part of a complex collection. You have to have a bit of courage, though. And a little luck, if you want to succeed.

## And without compromise to the environment!

MY FLOOR has made a voluntary commitment to full transparency. This means that we take the environmental sustainability of our products as seriously as maintaining the highest standards of quality and giving outstanding value for money.

Our environmental policies focus on ecological efficiency – for the whole life cycle of any given product that leaves our factory. We process certified raw materials sourced from sustainably managed forests and check the environmental impact of every stage of production. We produce high-quality and very long-lasting laminate flooring, and also take care of eco-friendly disposal. Our Environmental Product Declaration (EPD) makes information on the environmental credentials of our wood-based products freely available. The EPD is awarded by the Institut Bauen und Umwelt and is an internationally recognised ecolabel in accordance with ISO 14025.

And because we want to keep things this way, we give our staff regular training in awareness and knowledge of environmental matters. We are always striving for better – for you and for our environment. As a result, we are proud to have been awarded Blue Angel environmental certification.

Waves rushing. Spicy sea air surrounds you. The sun tickles the tip of your nose. Immediately you begin to relax ... Bring that beach holiday feeling into your home with the MY FLOOR Lodge Collection.

The decors in the Lodge Collection look natural and rustic. They exude pure love of life. As free and happy as a day at the beach. Whether light, dark or casual tile design, our designs are extremely diverse. Finding it difficult to make up your mind? Even better, our decors can also be easily combined and harmonise perfectly with one other.

# COTTAGE

A glass of wine, a good book, a cosy fire crackling in the fireplace. What more do you need for a peaceful end to the day? The flickering of the fireplace bathes the room in a beautifully warm light. Your new floor from the MY FLOOR Cottage Collection shimmers subtly and its embossed grain is fine and elegant. This will make you long for the evening, every day anew ...

All Cottage Collection floors exude an incomparable sense of comfort and are full of character. An effect that could only be matched by solid wood floors. And, if a small spark jumps out of the fire, it's no problem at all. Our laminate floors are flame-retardant and hard-wearing.

# Chalet

Do you love the rustic alpine atmosphere? Up there in the mountains, everything seems just that bit easier and more original. Enjoying a hearty snack after a long hike. Telling stories until late in the evening and even enjoying a vigorous "Schuhplattler". The high-quality floor from the MY FLOOR Chalet collection takes it all in its stride. It is tough, scratch resistant and even forgiving of dancing on the parquet, erm – laminate.

The decors of the Chalet Collection also create a rustic ambience in your home. Combine it, for example, with simple wood furniture, linen and leather, or dare to try an atmospheric mix of antique and modern furniture.

# Villa

The villa has been perched on the small Tuscan hill for several centuries. It has seen a lot during this time: happy family celebrations, opulent dinners and romantic candlelight dinners. Its style has hardly changed over time – it has always been timelessly elegant. The MY FLOOR Villa Collection combines this classic elegance with understated glamour that effortlessly enhances every room.

Do you value exclusive quality? Allow yourself to be seduced by the noble wood look of the Villa Collection and create your own space with its stylish beauty. And don't forget that it also makes an impressive statement in a business setting.

## Our decor of the year 2018

### **Chestnut Sauvignon – M1223**

Fresh, lively and beautifully structured. Just like the popular wine, our decor of the year, "Chestnut Sauvignon", is in keeping with the best possible taste. The decor is uncommon; the chestnut surface a true rarity. So, if you're looking for a really grand entrance and no longer want to keep to the well-trodden path, "Chestnut Sauvignon" will be your favourite.

The decor is modern and timeless. The fascinatingly detailed embossing of the surface along the grain creates a raised look of real wood. This allows "Chestnut Sauvignon" to give every room a special look. The decor is only available in the MY FLOOR Villa Collection.

# Residence

Say goodbye to the mundane. You will create an extraordinary ambience with our highlight: urban, stylish and graceful at the same time. Residence is our very special collection, our masterpiece. The extra wide and unusually long panels; the authentic, elegant, natural wood look and the excellent quality of this floor speak all for themselves.

Our MY FLOOR Residence Collection will thrill you. It lies in your room, exuding self-confidence, modernity and exclusivity. You won't just walk across the floor, no, you'll swagger. It goes without saying that the floors are robust, not light-sensitive and comfortable to walk on.

## Panel construction

The panels for our laminate flooring are made up of at least four sturdy layers. These guarantee the durability and excellent quality of MY FLOOR. This is how we create long-lasting floors for all requirements.

- A** The upper surface of the flooring features a particularly wear-resistant overlay protection film.
- B** The overlay protection film is pressed together with the individual, hardened decorative film to form a hard-wearing surface.
- C** A special, high-density fibreboard from a recognised source forms the base layer (HDF, E1).
- D** On the underside of the base board, a moisture-resistant stabilisation film ensures the structural stability of the MY FLOOR laminate.

The CLIC system makes laying this floor child's play: with just one finger, panels lock audibly into place. Simply unpack, lay, click and finish – without the least exertion or any additional tools.

- ✓ even easier to lay
- ✓ 50% time saving
- ✓ no hammer, push block or pull bar required
- ✓ safe and robust
- ✓ can be walked on immediately

For more laying tips, we recommend our YouTube videos at ► [video.my-floor.com](https://video.my-floor.com)

**AC 5/32** A laminate floor's resistance to wear is given as an abrasion class, e.g. AC 5. Here, the number 5 indicates that it will not show signs of abrasion for a considerable length of time. The wear class figure indicates the level of use for which the laminate is suitable. 32 represents average commercial use and 33 is for heavy commercial use.

**AC 5/33**

Floors with these symbols have the following properties:

These panels have a 45° bevelled edge all the way round. Putting them together creates a V-shaped groove, which replicates the character of natural wooden floorboards.

These panels have a special surface structure.

Decors with this symbol are antistatic.

Outstanding features of all MY FLOOR products:

All floors use the CLIC system. Simple to lay with no need for a hammer, tapping block and crowbar. Safe and stable, you can walk on them right away.

Safe and stable, you can walk on them right away.

Low flammability.

Easy-care and durable.

Highly resistant to cigarette butts.

Not light-sensitive.

Stain-resistant.

Resistant to wear.

Made from natural, renewable materials.

Comfortable to walk on.

Suitable for use over underfloor heating.

Hard-wearing and pressure resistant.

Layout of the surfaces:

1-Strip

2-Strip

3-Strip
