Description

AA-A1... differential pressure switches are compact pressure switches for automatic burner controls. Available with hose connections.

AA-A1... differential pressure switches are suitable for making and/or breaking a circuit when the medium pressure changes relative to the set point.

Application

Differential pressure monitoring in firing, ventilation and air-conditioning systems. The AA-A1... can be used as a pressure, vacuum or differential pressure switch for air and non-aggressive gases. Not suitable for natural gas, propane, butane and other combustible gases.

AA-A1 ... SPDT differential pressure switch in pressure and vacuum ranges. The differential pressure acts via the diaphragm against the force of the setting spring on the micro-switch. The pressure switch operates without any auxiliary power.

Definition of switching hysteresis Δp

The pressure difference between the upper and lower switching pressures.

AA-A1... switching function

As pressure rises:

1 NC opens, 2 NO closes

As pressure falls:

1 NC closes, 2 NO opens

Dimensions inch (mm)

Height with NEMA Type 1 cover: 1.33 (34,2)
Height with NEMA Type 12 cover: 1.80 (45,6)

Pressure connection

- 1 Pressure connection (+)
- 2 Pressure connection (-)

Connection p2 (-) = lower pressure
Connection p1 (+) = higher pressure
