Wood Professional Cosmetics

## Technical Data Sheet

Revision 00 of 20.10.2012

# WATER – BASED GOLDSIZE

### DESCRIPTION:

The Borma Wachs WATERBASED GOLDSIZE is an acrylic water-soluble glue, to be utilized for the direct application of gold and silver leafs of all kinds. Ideal also for imitation gold and silver, especially for the application of transfer metal leafs.

Only for interior use.

### PHYSICAL – CHEMICAL CHARACTERISTICS:

Composition:	Acrylic resin dispersed in water
Form:	Milky
Colour:	White
Odour:	Typical
Solubility:	Soluble in water
pH value:	4-5
Viscosity:	50-250 mPas
Density:	> 1,0 Kg/dm <sup>3</sup>

### METHOD OF USAGE:

Apply with a plate brush on the surface, previously prepared with layers of Bologna Gilding Chalk / Rabbit Skin Glue, and Bole / Fish Glue of the desired colour. Let dry protected from dust exposure for 15-30 minutes. The product is ready when it is sticky to touch and adheres to the support; if not wait a little more. Then apply the gold leaf. Clean possible residuals with water before drying is complete.

### STORAGE:

Store in a cool, well ventilated place, keep the container closed when not used. Keep away from heat, flames, sparks and other sources of ignition.

### PACKAGE:

The product comes in 150 mL, 500 mL, Lt. 1, Lt. 5 and Lt. 15 sized cans.

### WARNING:

Our data sheets are prepared on the basis of average performance of our tests. However, our technical advices are given in good faith but without any warranty. In fact different supports, conditions of application, industrial plants, dilutions are determinant for the final result, and are often beyond our control. The user must try the product to see if it is suitable for his needs. We will ensure the continuity of the chemical-physical characteristics.
