JUDAIC BITUMEN Liquid

DESCRIPTION:

Dark brown thick liquid used to realize ageing patina effects on every surface. It can also be added to finishing lacquers for pictures or to furniture waxes to get an antique effect. Judaic Bitumen is formulated in respect of the oldest traditions of furniture restorers. It is the ideal solution to easily give to each kind of surface an antique and patinated look. Practically odorless, ready-to-use, very easy application.

CHEMICAL/PHYSICAL CHARACTERISTICS:

Form:	liquid
Color:	brown
Odor:	typical
Specific Gravity (20°C):	0,82 - 0,87 Kg/Lt

HOW TO USE:

Apply Judaic Bitumen evenly on the surface that has to be decorated, by paintbrush or by cloth. Let it act for a while, then remove eventual local excesses with steel wool 000, in order to create ageing shades. Accordingly to the kind of surface, this phase can be done by cloth, simply to avoid potential scratches.

Let it dry for a minimum of 4hrs, then fix it with a coat of Borma Porefiller Basecoat; then finish with a wax or lacquer application.

STORAGE:

Keep in a fresh and well ventilated place; keep the container closed when not in use. Keep away from heat, free flames, sparks or other sources of ignition.

PACKAGE:

The product is kept in 500mL, 1Lt and 5 Lt metal tanks.

WARNING:

Our data sheets are prepared on the basis of average performance of our tests. However, our technical advices are given in good faith but without any warranty. In fact different supports, conditions of application, industrial plants, dilutions are determinant for the final result, and are often beyond our control. The user must try the product to see if it is suitable for his needs. We will ensure the continuity of the chemical-physical characteristics.
