Wood Professional Cosmetics

Technical data Sheet

REV 00 of 03.03.2014

SOLWACHS

Special solvent for waxes

DESCRIPTION:

Solwachs is a special thinner for the balanced dilution of Borma Wachs waxes. Thanks to its special properties, Solwachs allows to adjust the drying time and the spreadability of the diluted wax, facilitating the application and the penetration inside wood pores. It can be easily added at any ratio. Very useful also for cleaning of tools.

CHEMICAL/PHYSICAL CHARACTERISTICS:

Appearance:	liquid
Color:	colourless
Odor:	typical
Specific Weight:	0,77 Kg/Lt

HOW TO USE:

- 1) Pour the required amount of Solwachs in the mixture of waxes.
- 2) Mix well to get a homogeneous product.
- 3) Apply the wax.

It should be noted that the higher the quantity of Solwachs is added, the lower will be the dry residual.

STORAGE:

Store in a cool, well ventilated place, keep the container closed when not used. Keep away from heat, flames, sparks and other sources of ignition.

PACKAGING:

The product comes in Lt. 1 and Lt. 5 sized cans.

WARNING:

Our technical sheets are compiled on the bases of results of our tests. Nevertheless our technical advice is given in good faith, but without a guarantee. Indeed different supports, conditions, applications, installations, dilutions are integrating parts of the final result and often beyond every control. The user must test the supplied products to verify if it is adaptable for his/her needs.

We can guarantee the continuity of the physical and chemical characteristics.
