Wood Professional Cosmetics

Technical data Sheet

REV 00 of 20.10.2012

ECOSTUCCO

Waterborne Wood Filler

DESCRIPTION:

Ecostucco, is a hydro-putty formulated and composed of first quality raw materials. It is particularly suitable for wood and plastering and scraping wall surfaces before painting and varnishing.

The product is ready for use, and should be applied with a spatula directly on the defect to be filled.

It dries quickly and remains unaltered (colours are light resistant). Among its main characteristics are: easily sand-papered, limited loss, good anchorage with minimum absorption.

WARNING:

Our technical sheets are compiled on the bases of results of our tests. Nevertheless our technical advice is given in good faith, but without a guarantee. Indeed different supports, conditions, applications, installations, dilutions are integrating parts of the final result and often beyond every control. The user must test the supplied products to verify if it is adaptable for his/her needs.

We can guarantee the continuity of the physical and chemical characteristics.
