POWDER WOOD FILLER

DESCRIPTION:

Special powder wood filler with wood flour specific for wooden surfaces, can also be used on wall supports. Ideal for grouting wood imperfections and for reconstructing missing parts. It adheres perfectly on all surfaces. Light resistant colors.

Overpainted with PU, acrylic, epoxy, UV, water-based paints. Available in colors: 05 pine, 63 dark walnut, 50 white, 65 ash, 51 oak.

CHEMICAL/PHYSICAL CHARACTERISTICS:

Form:	powder
Color:	accordant to labeling
Smell:	odorless
Application:	spatula
Sustainability:	soluble in water

HOW TO USE:

In a clean pot, mix Dust Filler with water, in ratio filler:water 3:1. The amount of water can change depending on the desired viscosity. Apply the prepared filler on a clean and degreased surface, on the defect. Where possible, apply an abundant layer in order to prevent natural loss of volume of the filler during drying. Wait 4-6 hours for complete drying of the filler, then proceed to a further application, if necessary, or to staining/lacquering.

It is possible to color Dust Filler with the Waterborne Pigments of the COW series or with universal stain Holzfarbe.

PACKAGE:

The product comes in 12,5 Kg cans.

STORAGE:

Keep the packages tightly closed in storage at room temperature. Avoid exposing the product to moisture.

WARNING:

Our technical sheets are compiled on the bases of results of our tests. Nevertheless our technical advice is given in good faith, but without a guarantee. Indeed different supports, conditions, applications, installations, dilutions are integrating parts of the final result and often beyond every control. The user must test the supplied products to verify if it is adaptable for his/her needs. We can guarantee the continuity of the physical and chemical characteristics.
