

Technical Information

Release Agent PU-540SV

Release Agent PU-540 SV is a solvent based release system designed for the production of seat cushions in the cold cure process and the backfoaming of carpets.

Release Agent PU-540 SV is liquid and ready to use.

Release Agent PU-540 SV gives an excellent open cell structure and a dry finish of the produced parts.

Release Agent PU -540 SV reduces build-up on moulds when applied according to instructions.

Properties:

Colour: clear

Density: 0,75 g/cm³

Shelf life: 12 months

Application Field:

Cold cure process, flexible foams,

Advantages:

1. Non VOC
2. Easy to apply
3. Open cell structure
4. Prevents build up on the moulds
5. Non greasy, non contaminating coating
6. Excellent performance of produced parts
7. Excellent release

Application:

1. Thoroughly clean the mold.
2. Apply a thin coat of the PU-540 SV on the mold.
4. Start production
5. Reapply a coat at process temperature when required, to maintain desired release.

Further Information:

Product technical information and data is based on the best information available and does not constitute or imply a warranty or patent infringement of any kind. The user is responsible for testing product suitability prior to use in production.
