

This new robot is designed for pools with flat floor and compound slopes up to 35° of 70m² It has a very high suction power of 20m³ / h for optimal cleaning.

It has large capacity of the filter tray with an easy opening from the top. This robot has 3 different programs depending on the level of dirt

Thanks to its big power, it can overcome the obstacles in the pool floor without any difficulty

3 cleaning cycles

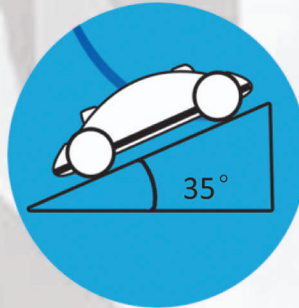

Easy open by 2 clips

Easy operation and clean

Equipped with small wheels and brush

Fit for flat floor up to 35° slope

Simple structure

Main features

- High suction power
- Large holding capacity
- Easy to carry for the whole family
- Easy to use, quick opening by two clips

Specification

Pool type: Above ground/ In ground swimming pool
 Input voltage: 220V/240V
 Output voltage: DC24V
 Power : 150W
 Cleaning surface : 70m²
 Finesse of filter : 180µm
 Cable length : 12m
 Filtering capacity: 20m³/h
 Operating cycle: 1h/2h/3h

Loading information

Package size:66 x 42 x 35cm
 20GP: 252 cpcs
 40GP: 540 pcs
 40HC: 630 pcs
 Package weight – kg
 Net: 8.5
 Gross: 10.5
