WOOD WHITENER

Waterbased

DESCRIPTION:

One-component waterbased whitener for wood. Applied by brush or by spray, it bleaches the colour of any kind of wood, making it uniform. For interior and exterior. The product is ready to use; more or less intense effects can be achieved by diluting the product with water.

PHYSICAL – CHEMICAL CHARACTERISTICS:

Appearance:	liquid
Colour:	colourless
Odour:	odourless
Relative density:	1,0 ± 0,1 Kg/L
pH value:	2,0 ± 0,5

HOW TO USE:

Shake well before use. Apply by brush or by spray on the surface, leave for a few minutes, then use a plastic brush to rub and remove oxidated layers. Repeat the operation if necessary. When the treatment is finished, rinse thoroughly with water and let dry, than lightly sand to remove wood's pile. Now the surface is ready for further treatments, better if solvent-based.

STORAGE:

Keep in a fresh, well ventilated place. Keep the container closed when not in use. Keep away from heat sources, flames, sparks, and other sources of ignition. Keep from freezing.

PACKAGING:

The product comes in 1l, 5l and 25l tanks.

WARNING:

Our data sheets are prepared on the basis of average performance of our tests. However, our technical advices are given in good faith but without any warranty. In fact different supports, conditions of application, industrial plants, dilutions are determinant for the final result, and are often beyond our control. The user must try the product to see if it is suitable for his needs. We will ensure the continuity of the chemical-physical properties.
