

AS 500, накладной монтаж

[НАЗАД](#)

The surface-mounted design in form and function.

Also in surface-mounted design, the AS 500 range is a perfect match in terms of form and function. Ideal for use in places, where flush-mounted installation is not appropriate or desired. The surface caps already have a moulded design frame, so no additional components are required. The universal mounting box providing large wiring space and flame-resistant bottom plate can be used not only for the AS 500 surface caps, but also for the LS 990 and CD 500 surface caps.
