### Practical accessory | Variability of applications | Protection | Resistance

If you like surrounding yourself with products that are not only functional but also exquisitely elegant, you can underscore the look of your vehicle's interior by this **top-class set of PRESTIGE textile foot mats**. The combination of black textile fabric, black-and-grey nubuck and black stitch gives the mat a **unique look** and is guaranteed to meet your expectations about accessories designed to make your vehicle even more attractive. Made of high-quality materials, the set of highly elegant PRESTIGE mats **enhances the travelling comfort to foster the car occupants' well-being**. Featuring an anti-slip finish on the back side, these mats are a practical and, in many cases, indispensable accessory to any car. **They trap impurities and humidity** while protecting the floor, and when they get dirty, they can be easily taken out and cleaned. Moreover, their unique shape perfectly fills the space under the car occupants' feet. Among other tests, these textile mats undergo a **"shoe heel test"** to simulate the impact the driver's shoe heel has on the mat when their foot rests on the accelerator pedal. Stringent material-strain (lab) tests and long-term road tests have proven the **mats' high resistance to mechanical strain**. The mats' high resistance is the result of polyamide fibres in the fabric. The **excellent harmony** between the product's top-quality materials and its elegant colour design is guaranteed to make the PRESTIGE textile foot mats a highly appreciated part of your exquisite style.

Our recommendation for wintertime use is to buy the all-weather interior mats - Order No. 57B 061 502 + 57A 061 512.
