Fiscagomma reserves the right to make any variations which it considers opportune to the products and finishings contained in this set of samples. In consideration of the technical characteristics of the product, the colour reference is indicative and may be subject to slight variations. Only the specific sample on the order is binding with regard to the definitive colour. The final shades could be slightly different. Due to the peculiar manufacturing process of these materials it is not possible to guarantee a perfect colour uniformity for different product shots. We consequently recommend to the customers not to mix during production rolls belonging to different lots. We suggest to don't put different tonalities in contact, to avoid colour transfer. A minimum quantity is required unless the colour is already in stock.
