

SMALL, LUXURIOUS FIBERS

Big, Elegant Finishes

Made from a professional white microfiber fabric, Wooster Micro Plush rollers create a smooth, even finish with no stipple. Their tiny fibers perform well with all paints and enamels—including challenging low VOC, fast-drying, and deep-color applications. In fact, because Micro Plush is capable of achieving spray-like results, these rollers are also a popular choice for applying varnishes to surfaces such as cabinets and doors. Although primarily chosen as a finishing tool, Micro Plush covers still outperform competitive microfiber rollers for paint pickup and release.

Micro Plush Rollers

- White microfiber fabric creates smooth, uniform results
- Excellent for all paints & enamels, including low VOC & deep colors
- Green™ double-thick polypropylene core resists solvents & cracking
