## BODYMETER

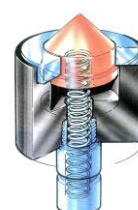

Last generation digital display measuring tool, the BODYMETER allows making a quick diagnosis on all types of vehicles by making easy under body measurements (length, symmetry, and cross check).

Its very easy operation allows the measuring to be carried out by a single person.

### Features

- Quick and easy measurement
- A unique and patented self centring magnet attachment system
- Light weight arm, with easy to read digital display
- Allows making free or comparative measures, without disassembling any part of the vehicle, on lengths from 400 to 2650 mm.
- Can be used on a vehicle in the following situations:

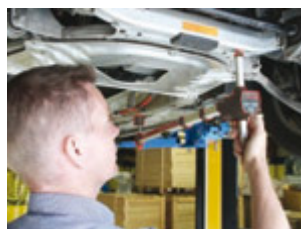

Frame rack

Straightening

Lift
