

Indoor silos

made by professionals

CONVEYING · DOSING · MIXING · DRYING · CRYSTALLIZATION

Indoor silos

One day silo for ABS die-casting production

Silos for HD/LD for charging of extrusion lines

*“Within 2 years, the **FDM GmbH** company has become one of the leading manufactures of flexible indoor silos and material handling systems.*

The longtime experiences of our specialists are the base for optimum planning and production of which we are known for worldwide.

Our staff is characterized by dynamic service and innovative designed solutions.”

LDPE and LLDPE indoor silos for film production with automatic outdoor silo charging

Flexible indoor silos

Big silos for blown-film production

Silos up to 60 m³

Advantages of flexible indoor silos:

- special sizes possible made to building dimensions
- optimum space management due to flexible design
- low-priced and long-lasting
- low transport weight and volume
- easy installation
- frame to be installed by customer made to our drawings
- big filter surface in cover

Indoor silos for granules...

for mill material...

for agglomerate

Silos and bag emptying stations

Specially coated indoor / outdoor silos with roofing for granules

Indoor silos of 1 – 80 m³ (1 – 45 to) volume

- various dimensions available in length, width and height due to flexible tissues
- Silos are made to your bulk material: type of tissue, tensile strength and coating are individually determined
- besides the industrial applications also for use in food and agriculture storage

manual bag emptying stations for easy-flowing bulk material

Indoor silo – spezial construction

PET and mill material in Indonesia, custom steel construction

Indoor silos for:

- silo vehicles
- BigBag stations
- Bag emptying stations

Emptying:

- Exhaust over suction pot
- Pressures over star-wheel-feeder
- Expiration slidegate valve

Accessories:

- galvanized steel design
- tubing
- filling level indicator
- weighing system
- slider
- suction box

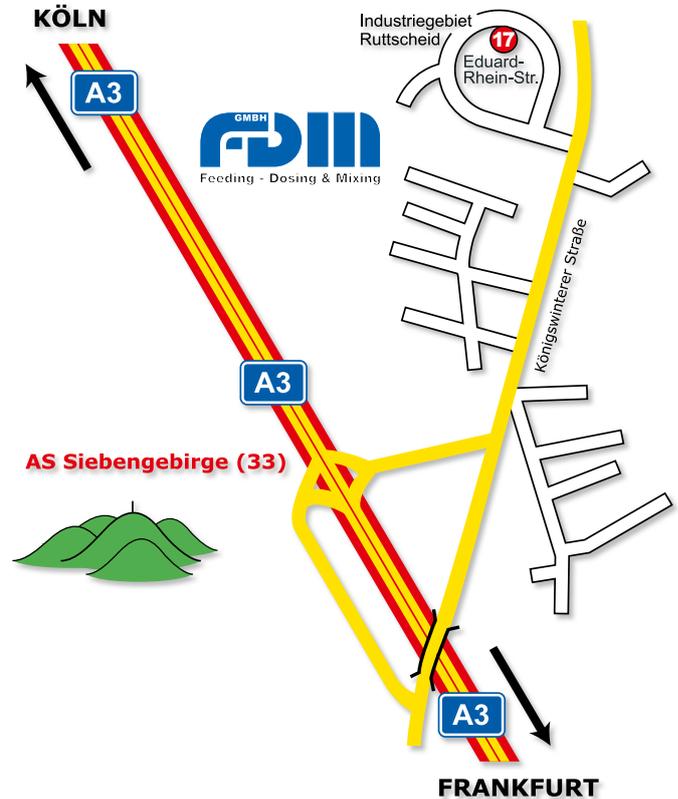

Indoor silos for spezial custom applications.

Approach via the A3:

Take exit 33 „Siebengebirge“ on the A3 coming from Köln (Cologne) or Frankfurt. Turn left to > Oberpleis. Turn left again the 3rd road to the left, then right into the Eduard-Rhein-Straße. Follow the road until you see the FDM premises to your left.

Have a good trip!

- We offer:**
- Gravimetric dosing systems
 - Volumetric dosing systems
 - Conveying systems
 - Mixing systems
 - Weighing systems for Powder
 - Indoor silos
 - Outdoor silos
 - Material-handling-systems
 - Turn-key-projects
