VITRUM
DESIGN

100 % ITALIAN QUALITY

Vitrum Design is an Italian company specialized in manufacturing smart switches to control devices and electronic domestic appliances.

Vitrum Design aims to bring **innovation** into the home automation world through a combination of sophisticated design and cutting edge technology devices. The different shapes merged harmoniously into a sleek and elegant surface. With the addition of light and sound, Vitrum Design switches have reached an unprecedented ergonomics able to involve different senses and offer an extremely intuitive user experience. With Vitrum Design products you can control lighting,

shutters, temperature, you can configure and activate several scenarios and switch all the lights just with one touch. Vitrum Design technology redefines the aesthetic for **home automation**. The incredible flexibilty of its technology makes the systems versatile and fit for different needs. **KNX** and **Cloud** technology meet the needs of installers and electrical designers, which always seek for **cutting edge technologies** on **high quality products**.

ENTIRELY
DESIGNED AND
MANUFACTURED
IN ITALY

Vitrum adds to the home automation a key element: the uniqueness and exclusivity of the Italian style.

The Italian design
everyone loves

HOME AUTOMATION FOR EVERYONE NEEDS

Vitrum Design's devices can be installed in standard flush mounting wall boxes.

It doesn't need control units or special wiring.

Functionalities can be operated both locally and remotely.

EASY TO INSTALL

Vitrum Design can be installed both on British or 3 or 4 modules standard flush mounting boxes. The system works without control units. To install Vitrum, simply connect the wiring to the electronic module, attach it to the box and apply the chosen cover.

CLOUD OR KNX

Vitrum Design is available in the following versions, **Cloud** and **KNX**. The first one allows the creation of a network with more elements. Vitrum wireless technology is highly flexible, for this reason, it can easily adapt to meet different needs. KNX series allows interfacing KNX certified modules with Vitrum peripheral devices.

NOT JUST LIGHTING

Vitrum Design turns on, off and dims lights, but that's not all. It can also control window shutters, adjust the temperature, configure and activate scenarios that require the combined interaction of many functions.

Z-WAVE PLUS CLOUD SYSTEM

Vitrum Design Cloud is the lastest step of the wireless range of devices. The smart peripherals, installed into a traditional 230V system, communicate each others through the **Z-wave Plus** protocol and the new **UFO** controller, which implements advanced features as scenarios, enviromental sensors, vocal control, artificial self-learning intelligence, remote control and interaction among devices with different protocols.

NATIVE KNX INTERFACES

Vitrum Design KNX devices are connected natively to the KNX systems: just connecting the KNX two-wires bus directly to Vitrum devices. All the Vitrum KNX series devices are **certified KNX**, the worldwide communication standard for automation systems. With the new KNX series by Vitrum, you can manage all the functions of your **KNX** system through the new KNX Vitrum series. **KNX** series includes commands from one to six buttons, clima control, power suppliers, actuators, interfaces and webserver.

THREE STANDARDS, FOUR COLLECTIONS

Find your favourite Vitrum: choose the standard, number of buttons and the collection that matches with your environment. Indeed you can choose among **four collections**, both for three modules, four modules and British flush mounting wall boxes.

CLOUD SYSTEM

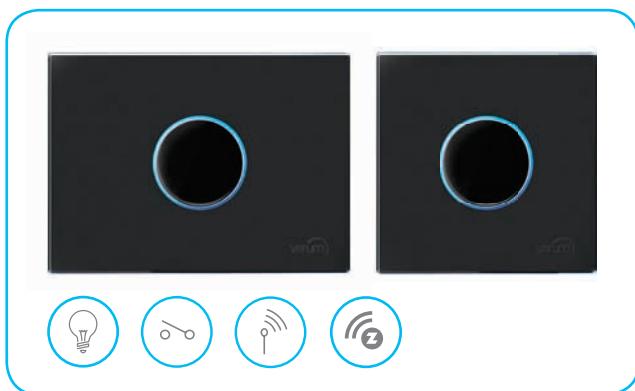

Z-WAVE PLUS SYSTEM

All Vitrum Design Cloud devices communicate with each other through the Z-wave Plus protocol, using a low power consumption radiofrequency. Each device is smart and stand alone, and it can be a part of a Z-wave network together with different Z-wave Plus devices. Z-wave Plus wireless protocol has been designed to associate different kind of devices in order to create a network of a complete smart home solution.

Thanks to the **Free App** for iOS and Android devices you can take advantage of **Z-wave Plus** system to control even remotely all the devices connected to your home network.

SWITCHES | ON-OFF CLOUD

LIGHTING

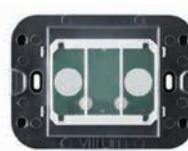

- Z-Wave Plus wireless technology for communication between devices
- Electronic switch operates as a Switch or push button (for control of bi-stable relays) with traditional 230 V circuits and without the need for a data BUS

- Z-Wave Plus wireless technology for communication between devices
- Vitrum Satellite does not feature an onboard output to power the lights directly. Vitrum Satellite sends ON/OFF signals only to other Vitrum Wireless (Dimmer, ON/OFF or Roller Blinds modules) or DIN Modules (Dimmer, ON/OFF or Roller Blinds modules). These perform the command, powering the load via their own power outputs.

When you like. As you want.

APP | VITRUM DESIGN

Manage **remotely** your environments, in the quickest and easiest way, thanks to the **Vitrum Design** application for smart phone and tablet.

Thanks to the App **chatbot** you can communicate with your personal assistant: he will inform you about anomalies or malfunctions. He will also help you to **configure your smart home** system.

The new **Vitrum Design App** will guide you to customize and manage your smart home in the easiest way thanks to a reliable system, **locally or remotely**.

The Vitrum wireless range has been renovated thanks to the Cloud Based system and UFO.

Vitrum Design products can be installed as a traditional electric system (230V), the devices intelligence will operate independently.

You can also integrate more devices which operate with different protocols as Wi-Fi and BLE.

sinuous

THE ESSENTIAL SINTESYS OF SHAPES AND MATERIAL

The preciousness of the glass, the beauty of the stone, are shaped through a sleek cut and sinous lines: Vitrum Design collections will surprise you with a design that merges shape and matter. Vitrum transforms the daily routine in a new and more evolved style experience.

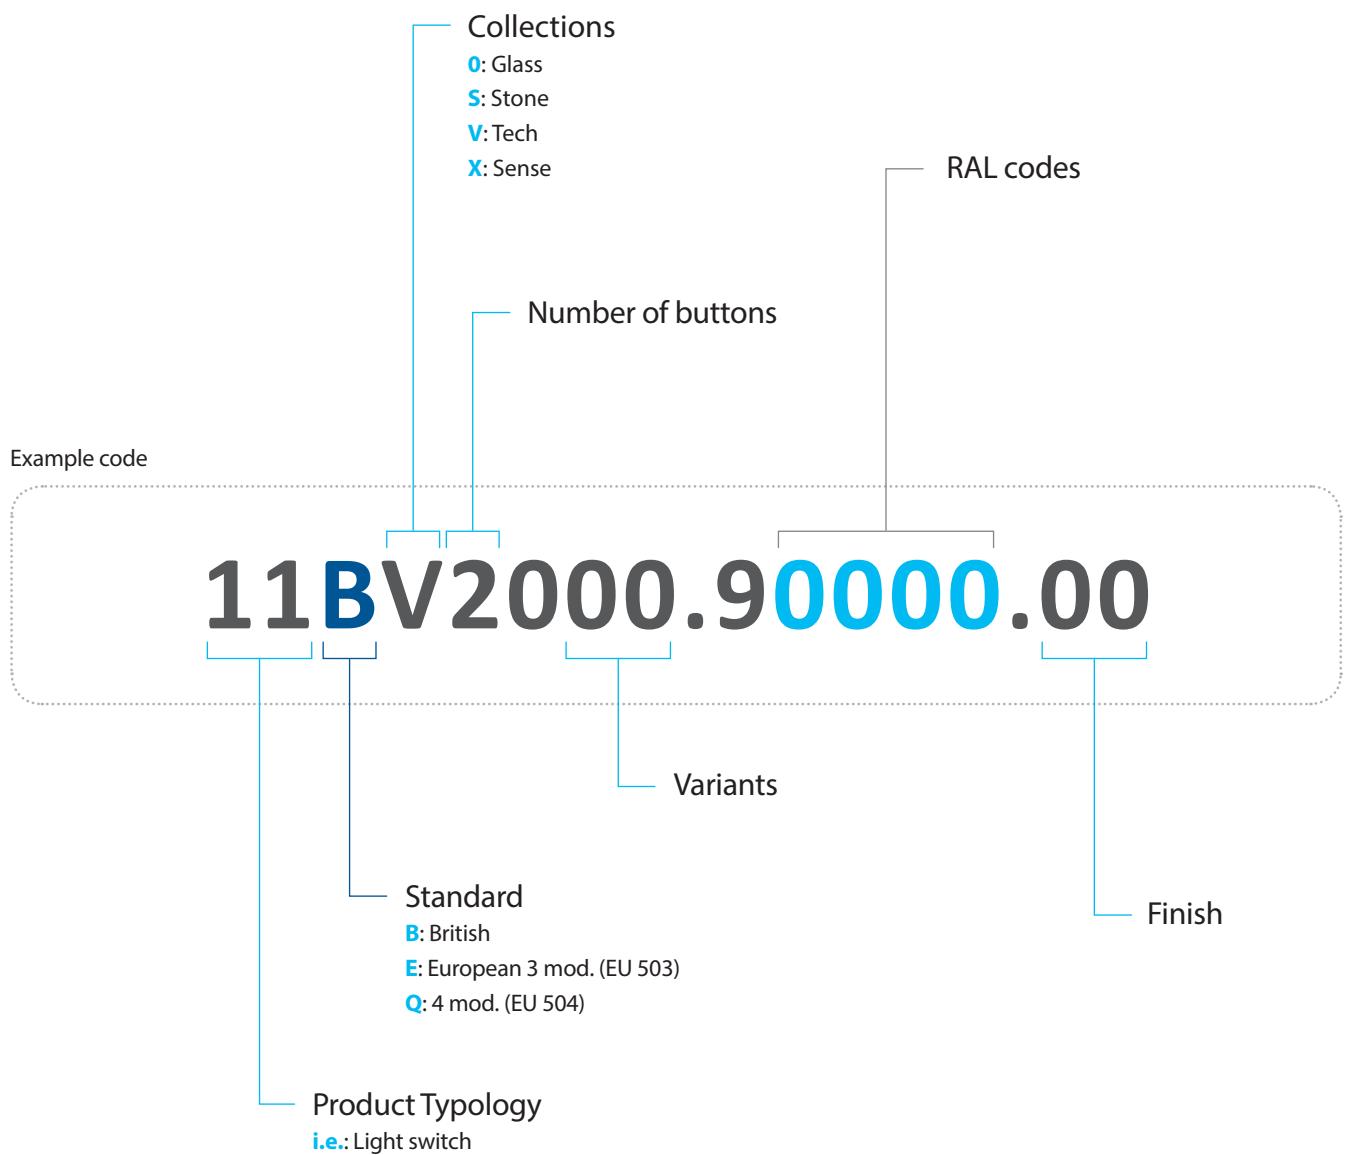

The Italian design everyone loves.

CODIFICATION | AESTHETIC CODE

Vitrum Design collections, Glass, Stone, Tech and Sense, satisfy the installers and designers needs, following an innovative and high quality product. With the aesthetic code you can easily understand the products features of each products, indentifying typologies, standards, components and finishes.

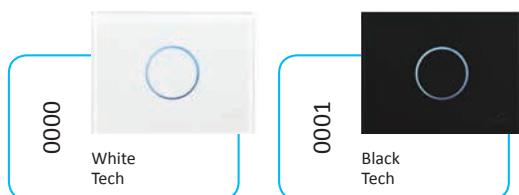

S T O N E

Vitrum's technological heart brings new life to stone. The **rock** is thinly sliced, stripped of all imperfections , its pointed edges are removed to make it more **harmonious**. The bright circle is replaced by a **laser engraving**, that helps to identify the button.

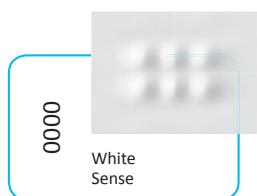

T E C H

New tech collection is the synthesis between shape and material. All the Vitrum technology is enclosed in a object featuring a **flat and pleasant** to the touch surface.

S E S S E

Shape, light and sound are merged to create a unique user experience. The bumps allow to control with simplicity the buttons, the bright circle crown reacts perfectly to the gestures, the sounds complete the execution of the command and the system status.

BE CAREFUL! For order with less than 10 pieces per RAL colour - standard colour excluded - a fixed 150,00€ as fee will be added per each RAL colour and product code requested.

RAL SCALE +38% over standard colour

BE CAREFUL! Each glass has his own natural colour that can influence the final result, it means a soft difference as + / - 10% of the tonality of RAL colour must be accepted.

1. General terms and conditions

1.1. The following conditions (denominated "general conditions"), must be applied to all products purchased by Vitrum Design Srl, with head office in Via Filippo Brunelleschi, 16 MILAN (Italy), VAT code and registered to the commercial register with number IT10685030966, R.E.A. 2549582, below named as "VD", also if is not specifically approved, unless written exception.

1.2. The terms and general conditions set out below predominate on any general conditions adopted by the buyer

1.3. The terms and general conditions set out below must be applied also to the official resellers, unless written exception.

1.4. VD reserves the right to change terms and general conditions, but is agreed terms and conditions applicable are only conditions in force at the purchase conclusion.

2. Orders and orders confirms

2.1. Any order must be firm and irrevocable by the buyer for 15 days from the order date and it has to be accepted by VD. The order proposal is accepted with a written confirm by VD or, in the absence with the goods delivery ordered to the courier.

2.2. Agreements deal through agents are not mandatory for VD, but they need the written confirmation.

3. Delivery

3.1 Delivery terms agreed must be intended as indicative and could suffer variations because the effective products disponibility, without any responsibility by VD.

3.2. Delivery are ex-works from VD warehouse in Pordenone, the delivery will be finalized with the goods availability confirm in VD warehouse, though goods are shipped ex-works with the courier chosen by VD.

3.3. Unless written exception in the order confirm, shipment costs will be in charge of the buyer.

3.4. VD can provide divided shipment.

3.5. VD can suspend or cancel, in its unquestionable opinion, all or a part, of shipment and refuse further supply if the financial conditions of buyer will be changed.

3.6. During the delivery operation by the courier, the buyer must check: a) the quantity and type of goods, matching them with the transport document b) the goods packaging used for the transport, that must be whole, not damaged, wet or altered, also just in the outside packaging materials. Any issues must be reported immediately writing them on the courier transport document. Without any complaint, done in this way, the buyer can't do any objection.

4. Terms and Modes of Payment

4.1. Prices of products and discounts are reported in the order confirmed, and if it is not specified are without VAT. Any VAT changes imply an automatic adjustment of the price.

4.2. VD will grant credit to the buyer at its own discretion and, then, unless written exception, payment of the amount referred the bill will have to be done by the end of the month following the date of invoice emission by Bank Receipt.

4.3. Payment must be done on time to the deadlines agreed between the parties, without any exception.

4.4. Granted discount may be revoked because the failure of the punctual payment deadlines agreed.

4.5. If the purchaser does not comply the deadlines of payments, even if they are related to previous orders, VD can cancel the entire order or a part of it, even if the new order is already been accepted, till to the complete adjustment of the payment position of any payment open-situation.

4.6. The delayed payment of invoices will imply the charge of credit recovery cost and accrued interests by Legislative Decree 231/2002, even if the purchaser is a non-entrepreneur.

4.7. Except for other repairs setted by the italian law or by this contract, if the customer doesn't respect payment deadlines, even about just one payment, VD is able to use the termination clause. If the a) default case lasts for more than 30 days, also without the injunction, or in the b) case does not be fixed after the injunction and till the 15 days term by its reception.

5. Retention of ownership

5.1. The properties of the goods is transfered to the buyer only after full payment of the invoice amount.

5.2. The Buyer will be entitled to request the return of the goods or to recover them from the purchaser or third parties,

5.3. In the case of premature termination of the contract because of not-fulfillment of the Purchaser, with the return of goods, payments received will be acquired by VD way of indemnity for the use of the thing and damage, except the right to claim further damages to VD

6. Warrenty

6.1. The products are subject to the legal guarantee of one year laid down by the Civil Code (Article 1490 et seq.), And the relative limitation and prescription periods, to the extent stipulated below and as provided in the instruction manual.

6.2. The guarantee will give the purchaser the right - at Seller's option - solely to the repair or replacement of the product or the termination of the contract. The player may not be required to pay damages or price reduction.

6.3. No warranty and / or responsibility of the Seller may be relied upon in the following cases: a) the products have been installed or by unqualified personnel or failure to comply strictly with the instructions for installation and use combined products; b) the products have been tampered with or used in a way not in conformity with the instructions without due diligence or otherwise the intended use and as provided in the enclosed directions; c) the products are damaged by one of the following causes: transportation, accidental falls or blows, electric shock or abnormal power surges, lightning and any other cause not attributable to fault or defect of construction; d) the products have a look or a color not closely correspond to how they appear on the site, or printed on the list compared to RAL code chosen, it being understood that the images posted on the website or in the commercial documentation and also a reference to a code Ral, are to be considered, since the yield of the color depends on many factors (including the choice of material on which it is applied as well as the type of work etc etc ...)

6.4. Any disputes or claims not ever justify the suspension or delay in payments.

7 Returns

7.1. Returns can be accepted just exclusively if VD authorize writing them and related to the return document. The return authorization doesn't mean VD acknowledge its responsibility.

7.2. Product must be returned in a packaging (possibly its original packaging, avoiding to damage it with label or any other way).

7.3. Shipment costs to Vitrum Design head office, unless written exception, will be in charge of the buyer.

8. Jurisdiction

Any dispute arising between the parties in connection with the interpretation, validity or performance of the present General Terms and Conditions of Sale , shall be of the exclusive competence of the referred to the Court of Milano.
