The passion for wood is in our nature.

A fascinating raw material: the respectful use of wood has always been at the heart of what we do, from efficient resource processing to the finished product. Since it was established in 1961 in Tirol, Austria, everything at EGGER has always been about wood. We source our wood from local and sustainable sources and utilise recycled materials whenever possible.

Our flooring is free from pollutants, plasticisers and PVC and our decors are printed using water-based dyes. Our efforts to minimise our environmental impact throughout the manufacturing of our flooring products has been recognised with numerous national and international environmental certifications. Our passion for wood is evident when you enter a room with an EGGER Floor.

FUTURE *retro*

The combination of past and future. The future is more tangible than ever. Technical and digital developments have made amazing progress. The yearning for old and trusted values, timeless classics, and particularly the warm nostalgia of the 50s and 60s is on the rise. Modern interpretations of natural textures such as marble, terrazzo and walnut, characterise the design of which past and future influences combine to create a stylish symbiosis.

PURE *nature*

Back to nature: the more technology finds its way into our lives, the more we feel the desire for original materials. Oak continues to be a popular trend in woodgrain decors. Whether with natural grains or with authentic characteristics such as cracks and knots, it continues to prove its popularity in design and provides exciting contrasts when combined with complementing decors.

LIGHT *urban*

Urban design charm. Living and office spaces are becoming more open, transitions more fluid. Small living spaces should not only be practical but designed in a minimalist way. Influenced by Scandinavian design, materials such as wood, stone and metal form the link with urban charm creating the style Light Urban.

Vintage Asgil Oak

Perfection meets emotion. Perfection can be easily achieved with the help of the latest technology, but this is not always desirable in design. Irregularities and imperfections, such as cracks and weathered materials convey a natural appearance and invokes emotion. The heavy used look or industrial style in combination with very calm and straight-lined designs creates the style Perfect Imperfection.

The new natural

Stylish in design and highly resistant. With our Design Flooring GreenTec, combine residential comfort and functionality in a beautiful way.

The robust, water-resistant and stain-resistant surface is able to withstand the stresses and strains of everyday life, whilst the integrated cork underlay absorbs impact sound. Thanks to the water-resistant wood-based coreboard, the GreenTec Board, our Design flooring is the ideal solution for bathrooms and commercial spaces.

The surface is just as important as the internal composition of the board. The authentic wood or stone decors makes our Design Flooring GreenTec a natural eye-catcher in every room.

Key features!

EPL116

Durable and of lasting value

Our laminate is produced to be durable and hard-wearing, so you can enjoy it for many years to come. It is abrasion-resistant and keeps its good looks due to a highly lightfast surface.

EPL116

Easy-care & antibacterial

Our Laminate Flooring is not only dirt-repellent and easy to clean, but also antibacterial.

This is thanks to the melamine resin surface which repels bacteria. It is also anti-static and thus reduces electrical charges.

EPL154

A variety of applications

Thanks to the large variety of decors and formats, our Laminate Flooring fits into most rooms. It can be easily installed with underfloor heating systems. As a water-resistant Aqua+ Laminate Flooring, it is also ideal for humid environments.
