

## MARPRENE TUBING

Long-life process tubing

Ideal for:  
**High chemical  
resistance to  
acids and alkalis**

Marprene is very long lasting compared with many other tubing materials. Long-life tubing means stoppages for a tube change are rare events, easily fitted in with general maintenance.

- Wide chemical compatibility
- Opaque to UV and visible light
- Low gas permeability
- Meets FDA standards for handling aqueous foods
- NSF/ANSI 61

# MARPRENE TUBING

## For long-life and chemical compatibility

Marprene offers exceptionally long-life and resistance to a wide range of chemicals, especially oxidising agents such as ozone, peroxides and sodium hypochlorite. It is the first choice for a wide variety of applications in different industries such as chemical, environmental, pulp and paper, print and packaging.

Operating pressures of 0-2bar can be achieved with Marprene continuous tubing. A range of LoadSure tube elements increases the pressure capability up to a maximum of 7bar.

Marprene	Characteristics
Material	Thermoplastic elastomer
Colour/transparency	Beige/opaque
Spallation	Fair
Life/hours	313/314 pumpheads - 10,000 620R pumpheads - 6000
Standard	FDA regulation 21 CFR 177.2600 for contact with aqueous food
Operating temperature	5C to 80C
Hardness Shore A (5sec)	62 to 68
Specific gravity	0.95 - 0.98
Ultimate tensile strength	>798
Elongation at break %	340 - 600
UV resistance	Excellent
Gas permeability rating	Fair
Water absorption	Low

ASTM methods Hardness: ASTM D 2240; Specific gravity: ASTM D 792; Tear B, Ultimate tensile strength, Elongation at break, Tensile stress at 100% elongation; ASTM D 412
