DECLARATION

KLEIBERIT PUR 501.0

Safety of toys / Sicherheit von Spielzeug

The European standard *EN 71 Safety of toys – T 3 Specification for migration of certain elements / Sicherheit von Spielzeug - T 3 Migration bestimmter Elemente* allows limit values of concentration of certain soluble heavy metal compounds (Arsenic, Lead, Cadmium and others) in colours, lacquers or coatings (adhesives) for toys, which may be solved by sucking children via spittle.

The mentioned product above doesn't contain any heavy metal and it is not classified into toxic/harmful products.

The German standard *DIN 53 160 Prüfung von bunten Kinderspielwaren auf Speichel- und Schweißechtheit / Examination of coloured toys against spittle and sweat resistance* is not applicable, because the product doesn't contain any colours.

The mentioned product above PUR 501.0 fulfills the requirements of EN 71 T 3 and may be used without any restriction for the construction of toys.

Dr. rer. nat. W. Stüber
