Built-in Power Switch 1-10V Dimmer

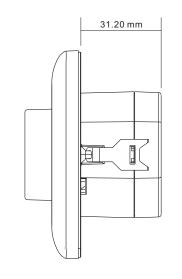

70070016

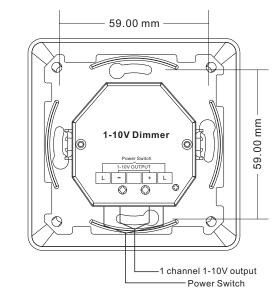

Important: Read All Instructions Prior to Installation

Function introduction

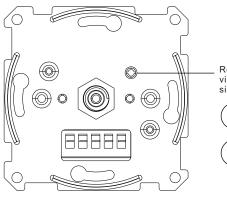

Front side

Dim Off Signal Voltage Setting

This 1-10V dimmer enables to set different dim off voltages by potentiometer to match different suppliers' 1-10V drivers that may be dimmed off at different signal voltage. The voltage can be set from 0.5V-0.9V, please refer to the manual of your 1-10V driver to get the correct dim off signal voltage. Factory default dim off signal voltage is 0.9V.

Remove the plastic frame of the dimmer, the potentiometer will be visible, use a screwdriver to insert and rotate to adjust the dim off signal voltage

Rotate the screwdriver counterclockwise to decrease voltage from 0.9V to 0.5V.

Rotate the screwdriver clockwise to increase voltage from from 0.5V to 0.9V

Switching Voltage100-240V ACSwitching CurrentMax. 10AOperating temperature0-40°CRelative humidity8% to 80%	Output Signal	1x(1-10V)
Switching Current Max. 10A Operating temperature 0-40°C Relative humidity 8% to 80%	Output Current	Max. 50 mA
Operating temperature 0-40°C Relative humidity 8% to 80%	Switching Voltage	100-240V AC
Relative humidity 8% to 80%	Switching Current	Max. 10A
	Operating temperature	0-40°C
Dimensions 80x80x52.3mm	Relative humidity	8% to 80%
	Dimensions	80x80x52.3mm

Rotation sensitive

- Built-in power switch, switch up to 10A
- Standard design, The key part of this controller is a universal, extremely rotary standard switch element that can be integrated in numerous frames by different manufactures
- 1 channel 1-10V Signal output

Enable to set different dim off signal voltage (0.5V-0.9V)
by potentiometer to match different suppliers' 1-10V driver
Control single color

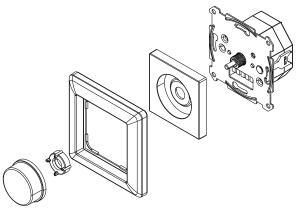

- Waterproof grade: IP20
- 0-10V version for chosen

Safety & Warnings

• DO NOT install with power applied to device.

• DO NOT expose the device to moisture.

Installation
