

Indoor unit model name		
Outdoor unit model name		
Sound power level (inside)	54	dB(A)
Sound power level (outside)	62	dB(A)
Refrigerante R32	GWP	675
Refrigerant leakage contributes to climate cha	inge. Refrigerant with lo	wer global warming potential (GWP) would
contribute less to global warming than a refrig	erant with higher GWP, i	f leaked to the atmosphere. This appliance
contains a refrigerant fluid with a GWP equal t	o 675. This means that it	f 1kg of this refrigerant fluid would be
leaked to the atmosphere, the impact on globa	I warming would be 675	times higher than 1kg of CO2, over a
period of 100 years. Never try to interfere with	the refrigerant circuit yo	purself or disassemble the product yourself
and always ask a professional.		
Cooling mode		
SEER	6.5	
Energy efficiency class	A**	
Design load (Pdesignc)	3.5	
Energy consumption,		kWh per year, based on standard test results
Actual energy consumption will dep	end on how the appli	ance is used and where it is located.
Heating mode (Average)		
SCOP	4.0	
Energy efficiency class	A*	(10%0)
Design load (Pdesignh)	2.4 2.2	
Declared capacity Back up heating capacity	0.2	
Energy consumption,		kWh per year.based on standard test results
		ance is used and where it is located.
Actual energy consumption will dep	and on now the appli	ance is used and where it is located.
Heating mode (Warmer) Optional		
SCOP	5.1	
Energy efficiency class	A***	LW (0°C)
Design load (Pdesignh)	2.7 2.7	
Declared capacity		
Back up heating capacity	0.0	kW (2°C)
Back up heating capacity Energy consumption,	0.0 741	
Back up heating capacity Energy consumption, Actual energy consumption will dep	0.0 741	kW (2°C) kWh per year.based on standard test results
Back up heating capacity Energy consumption,	0.0 741 end on how the appli	kW (2°C) kWh per year.based on standard test results
Back up heating capacity Energy consumption, Actual energy consumption will dep Heating mode (Colder) Optional	0.0 741	kW (2°C) kWh per year.based on standard test results
Back up healting capacity Energy consumption, Actual energy consumption will dep Heating mode (Colder) Optional SCOP	0.0 741 end on how the appli 3.4	kW (2°C) kWh per year, based on standard test results ance is used and where it is located.
Back up heating capacity Energy consumption, Actual energy consumption will dep Heating mode (Colder) Optional SCOP Energy efficiency class	0.0 741 end on how the appli 3.4 A	kW (2°C) kWh per year.based on standard test results ance is used and where it is located. kW (-22°C)
Back up heating capacity Energy consumption, Actual energy consumption will dep Heating mode (Colder) Optional SCOP Energy efficiency class Design load (Pdesignh)	0.0 741 end on how the appli 3.4 A 3.5	kW (2°C) kWh per year.based on standard test results ance is used and where it is located. kW (-22°C) kW (-22°C) kW (-22°C)
Back up heating capacity Energy consumption, Actual energy consumption will dep Heating mode (Colder) Optional SCOP Energy efficiency class Design load (Pdesignh) Declared capacity	0.0 741 end on how the appli 3.4 A 3.5 2.2 1.3	kW (2°C) kWh per year.based on standard test results ance is used and where it is located. kW (-22°C) kW (-22°C) kW (-22°C)
