## 1. DESCRIPTION

Gas shielded welding wire conforming to standard ISO 21952-A G Z and AWS A5.28 ER80S-B2 suitable for high temperature creep resistant used for creep resisting applications up to ~550°C. Typical applications in power generation plant include steam piping, turbines and boilers; the alloy also finds applications in the chemical and petro-chemical industries. The wire has low levels of tramp elements (Sn,As,Sb and P) providing a low Bruscato Factor ( $X < 10\text{ppm}$ ) for temper embrittlement resistant applications.
