

#### Features

- Universal input 90~305VAC (277VAC available)
- · All-in-one function with Power supply, DC-UPS, battery charger and status monitoring in ONE compact unit
- Signal and alarms design meet UL2524,NFPA 1221,BS EN/EN54-4
   Alarm system and GB17945 requirement, with adjustable parameters configurable • Uninterruptible DC-UPS system, by communication interface
- Form C relay contacts and LED indicators for AC Fail, Battery Low, Charger Fail, and DC-OK
- Load-dependent high speed battery charging
- Built-in MODBus protocol, CANBus optional
- Protections: Short circuit / Overload / Over voltage / Over temperature(auto derating) / Battery reverse polarity (No damage) / Battery cut off
- Battery low protection / Battery reverse polarity protection
- -30 ~ +70°C wide operating temperature
- · Cooling by free air convection
- Can be installed on DIN rail TS-35/7.5 or 15
- Charging curve can be set with SBP-001
  - $(Smart\ programmer\ sold\ separately,\ please\ refer\ to:\ \underline{https://www.meanwell.com/webapp/product/search.aspx?prod=SBP-001})$
- 20~100% charging current adjustable by VR
- 2 or 3-stage selectable by DIP S.W
- · Suitable for lead acid and lithium-ion batteries
- 3 years warranty

# Description

DRS-240 is a 240W AC/DC DIN rail type security power supply series. In addition to the primary output, there is an additional charger circuit that will automatically adjust charge current depending on the primary output current. DRS-240 accepts the universal input between 90VAC and 305VAC, and supports output 12VDC, 24VDC, 36VDC, and 48VDC nominal systems. With high efficiency up to 92%, it can operate with free air convection cooling under -30°C through 70°C ambient temperature. In addition to the key protection features such as overload protection, over voltage protection, battery low voltage disconnect, and battery reverse polarity protection, the DRS-240 also provides Form-C contacts and LED indicator alarm signals for AC-fail, battery low, charger circuit fail, and DC-OK to allow easy integration into security systems that comply with local alarm codes.

# Model Encoding

# Applications

- Public safety battery back-up (Red box)
- Security system
- Emergency lighting system
- battery detection system
- Central monitoring system
- Industrial automation

- All parameters NOT specially mentioned are measured at 230VAC input, rated load and 25°C of ambient temperature
   Variable with charger voltage when battery is connected.
- 3. This is Mean Well's suggested range. Please consult your battery manufacturer for their suggestions about maximum charging current limitation.
- 4. If load current increases, the system will prioritize load current demand and automatically reduce the battery charging current.
- 5. Ripple & noise are measured at 20MHz of bandwidth by using a 12" twisted pair-wire terminated with a 0.1uf & 47uf parallel capacitor.
- 6. Tolerance : includes set up tolerance, line regulation and load regulation.

NOTE

- 7. Length of set up time is measured at cold first start. Turning ONOFF the power supply may lead to increase of the set up time.
- 8. The ambient temperature derating of  $3.5^{\circ}$ C/1000m with fanless models and of  $5^{\circ}$ C/1000m with fan models for operating altitude higher than 2000m(6500ft).
- 9. Installation clearances: 40mm on top, 20mm on the bottom, 5mm on the left and right side are recommended when loaded permanently with full power. In case the adjacent device is a heat source, 15cm clearance is recommended.
- 10. The power supply is considered a component which will be installed into a final equipment. All the EMC tests are been executed by mounting the unit on a 720mm\*360mm metal plate with 1mm of thickness. The final equipment must be re-confirmed that it still meets EMC directives. For guidance on how to perform these EMC tests, please refer to "EMI testing of component power supplies." (as available on http://www.meanwell.com)
  ※ Product Liability Disclaimer: For detailed information, please refer to https://www.meanwell.com/serviceDisclaimer.aspx

# ■ Function manul

## 1. Alarm signals

- (1) Alarm Signal is sent out through "AC fail " & " Battery low " & " Charger fail "pins via relay contact.
- (2) An external voltage source is required for this function. The maximum applied voltage is 30Vdc and the maximum sink current is 1A. Please refer to Fig 1.2.
- (3) Table 1.1 explains the alarm function built in the power supply

INPUT	AC fail		DC OK		Battery low/Abnormal /Disconnected		Charger fail	
	2-3	1-3	5-6	4-6	8-9	7-9	11-12	10-12
AC only	closed	open	closed	open	open	closed		
AC + BAT.	closed	open	closed	open	closed	open		
BAT. only	open	closed	closed	open	closed	open		
Low BAT. (<30% capacity)					open	closed		
Charger Fail							open	closed

Table 1.1 Explanation of alarm signal

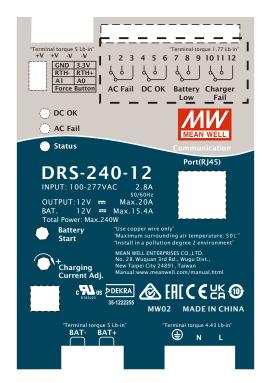

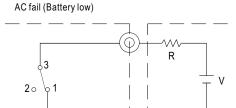

Fig 1.1 alarm signal Terminals

External voltage source (V) and resistor (R)

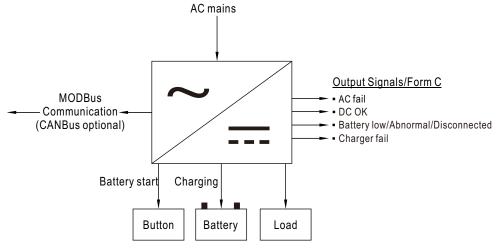

Fig 1.2 Internal circuit of AC fail (Battery low), via relay contact

(The max. Sink is 1A and 30Vdc)

#### 2.DC-UPS function

When AC mains drops below:79~89VAC of 120VAC,132~187VAC of 220VAC, UPS function will activate and power source switch battery backup.

# 3. Charger setting

## 3.1.1 2 or 3-stage selectable by DIP S.W

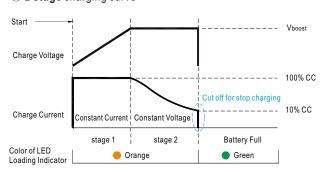

\* This series provides 2 or 3 stage charging curve.

1	OFF: 3 stage(Default), ON: 2 stage
2	Charging curve adjustable:see below
3	Charging curve adjustable, see below

# AC Fail DC OK AC Fail Status Communication Port(R,J45) Battery Start Charging Current Adj.

#### 3.1.2 Charging curve can be adjustable by DIP S.W

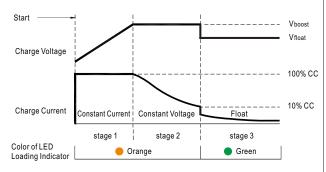

#### ② 2 stage charging curve

State	DRS-240-12	DRS-240-24	DRS-240-36	DRS-240-48
Constant Current	15.4A	7.7A	5.1A	3.85A
Vboost	14.4V	28.8V	43.2V	57.6V

© Suitable for lead-acid batteries (flooded, Gel and AGM) and Li-ion batteries (lithium iron and lithium manganese).

#### O Default 3 stage charging curve

State	DRS-240-12	DRS-240-24	DRS-240-36	DRS-240-48
Constant Current	15.4A	7.7A	5.1A	3.85A
Vboost	14.4V	28.8V	43.2V	57.6V
Vfloat	13.8V	27.6V	41.4V	55.2V

© Suitable for lead-acid batteries (flooded, Gel and AGM) and Li-ion batteries (lithium iron and lithium manganese).

The default curve is programmable, whereas other pre-defined curves can be activated by the means of the DIP S.W; please refer to the table below and the Mechanical Specification.

SBP-001 is a programmer, particularly for MEAN WELL's various programmable battery charger models to program the parameters
of charging curves, such as the Constant current (CC), tapper current(TC), Constant voltage (CV), float voltage (FV) and so
on, to accommodate the diversified battery specification in industry. With the design accounting for simplicity and convenience,
users can easily configure MEAN WELL's programmable battery chargers with SBP-001 programmer and the computer; all of
the setups are able to be finished easily by the means of the specific software.

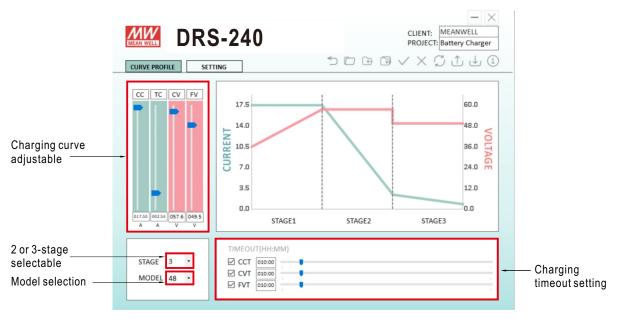

Note:(1) Tapper current(TC) default is 10%, can be fine tuned from 2% to 30% by SBP-001 with computer or CANBus Interface.

(2) Please contact MEAN WELL for more details.

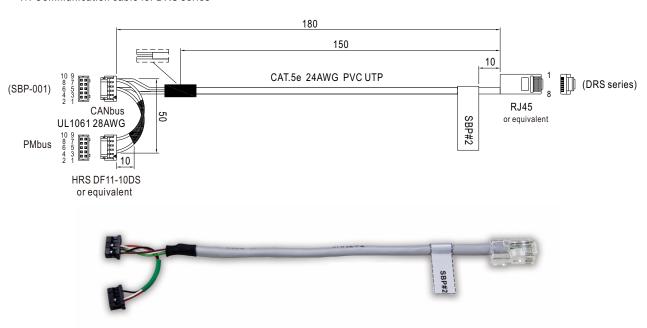

# **X** User Interface:

#### Communication cable for DRS series

## DRS series pin assigment:

Connector	Pin Assigment Pin Assigment									
SBP-001 10pin connector (Connector part No.:HRS DF11-10DS)	1	2	3	4	5 (CANH)	6 (CANL)	7	8	9	10 (GND)
DRS-240 RJ45 Communication port					6	7				8
Wire color					Green	White/Brown				Brown

#### 3.3 Communication interface

Charging parameters can be modified by MODBus (Built-in) or CANBus(optional) communication commands. For details, please refer to: http://www.meanwell.com/manual.html

# 4.Power Boost Mode

The maximum current on the load output is the 2 times the rated current for 4 minutes max. and 3 times the rated current for 4 seconds max. For example (48V model):

# Output load

# 4.LED alarm

Fu	unction	Description	Output of alarm		
DC OK	,	DC fail	OFF O		
DCOK		DC OK	Green •		
AC fail		AC fail	Red •		
AC Iall		AC OK	OFF O		
	Charging	Float	Green		
	status	Charging: CC/CV	Orange 🛑		
		Discharging	Orange: 1 Blink/Pause		
		Charger fail	Red: 1 Blink/Pause		
Status		Battery overvoltage / Battery reverse polarity	Red: 2 Blink/Pause + 1		
	System	Battery low / No Battery	Red: 3 Blink/Pause + 1		
	diagnosis	Battery discharge peak power timeout.	Red : 4 Blink/Pause +		
		Over load / short	Red: 5 Blink/Pause +		
		Over temperature	Red: 6 Blink/Pause 🔆 🎵 🖺		
		Timeout	Red: 7 Blink/Pause +		

# ■ Suggested Application

## 1.Backup connection for AC interruption

(1) Please refer to Fig2.1 for suggested connection.

The power supply charges the battery and provides energy to the load at the same time when AC mains is OK. The battery starts to supply power to the load when AC mains fails.

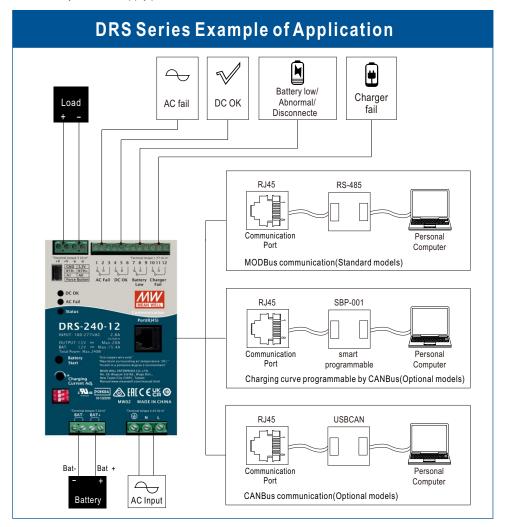

Fig 2.1 Suggested system connection

#### (2) Backup time

Backup time depends on:

- from the load current
- X from the size of the batteries.

The following table is an example (battery capacity at C10 discharge rate).

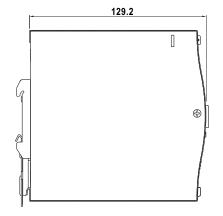

Battery Load	10AH	20AH	50AH	100AH	200AH
1.5A	350min	13h	33h	67h	133h
3A	125min	350min	17h	33h	67h
5A	60min	180min	600min	20h	40h
7.5A	35min	90min	350min	13h	27h
10A	23min	60min	240min	10h	20h
15A	13min	35min	125min	350min	13h

1,2	BAT
3,4	BAT. +

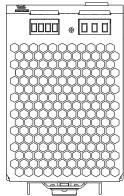

# Force button Connector (CN1): JS-2008R-4\*2-T or equivalent

Pin No.	Assignment
1	3.3V
2	GND
3	RTH+
4	RTH-
5	A0
6	A1
7,8	Open: Normal Short: Force start

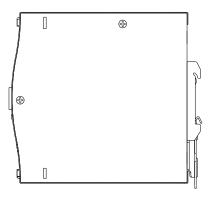

Case No. 984G

Unit:mm

#### Terminal Pin No. Assignment (TB4)

Pin No.	Assignment
1,2,3	AC fail
4,5,6	DC OK
7,8,9	Battery low/ Abnormal/ Disconnected
10,11,12	Charger fail

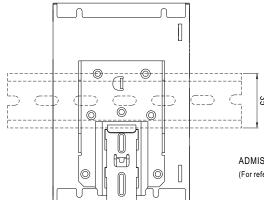

#### Terminal Pin No. Assignment (TB1)

Pin No.	Assignment
1	FG ⊕
2	AC/N
3	AC/L

Terminal Pin No. Assignment (RJ45)		
Pin No.	Function	Description
1,2,3,4,5	NC	Retain for future use.
6	Data+	For MODBus model:Serial Date used in the MODBus interface.
CANH	For CANBus model:Date line used in the CANBus interface.	
7	Data-	For MODBus model:Serial Clock used in the MODBus interface.
, CA	CANL	For CANBus model:Date line used in the CANBus interface.
8	GND-AUX	Auxillary voltage output GND. The signal return is isolated from the output terminals(+V & -V).

# ■ Installation Instruction
