SURFACES GROUP

YES WE CARE

CREATING VALUE IN HARMONY
WITH NATURE.

Sostenibilità e soluzioni avanzate sono il mind set di Surfaces Group che ha intrapreso una politica industriale all'insegna della sostenibilità

Alcuni importanti progetti già concretizzati:

- **Le Mole Free Dry di ADI** per la squadratura a secco. Permettono sia il riutilizzo delle polveri originate dalle lavorazioni per la formulazione di nuovi impasti, sia un più facilitato smaltimento degli scarti.
- **ECOS di International Chips**, rivoluziona la vibrofinitura con la tecnologia a secco, per trattare ogni tipologia di materiale senza l'utilizzo dell'acqua. Semplifica il ciclo di lavorazione, migliora l'efficienza, consente il risparmio idrico e elimina gli scarti fangosi.
- La **Linea IQ Luna Abrasivi** comprende mole abrasive di ultima generazione per superfici in agglomerato realizzate con un processo produttivo a basso consumo energetico.
- **Certificazione VOC Free per i trattamenti Gloss e Supergloss di NoCoat** che attesta l'assenza di formaldeide, benzene ed altri composti organici volatili nocivi per l'ambiente e le persone
- **Le mole Vincent HALO: ridotte emissioni di CO2 nell'aria** Grazie al corpo riciclabile in bronzo ed al volume e peso ridotto, le mole HALO usa e getta per vetri auto contribuiscono a ridurre la CO2 generata dai trasporti.
- **Un protocollo interno di "Buone regole"** per il riciclo e il contenimento dei consumi durante la nostra quotidiana vita in azienda. Molto si potrà e si dovrà ancora fare, ma Surfaces Group ha iniziato il suo cammino impegnativo ma necessario per invertire la rotta e promuovere uno sviluppo economico eco sostenibile.

Sustainability and leading-edge solutions make up the mindset of Surfaces Group which implements an industrial policy based on sustainability.

Important projects already successfully carried through:

- **ADI Free Dry Grinding Wheels** for dry squaring. They enable both the reuse of powders generated by processing for the production of new mixes and easier waste disposal.
- **ECOS by International Chips**, a revolutionary technology for dry vibratory mass surface finishing, for any type of material. It simplifies the processing cycle and improves efficiency, enabling water saving and sludge reduction.
- The **Luna Abrasivi IQ Line** comprises new-generation grinding wheels for agglomerate surfaces manufactured using an energy-saving production process.
- **VOC Free certification for the NoCoat Gloss and Supergloss** treatments, certifying the absence of formaldehyde, benzene and other volatile organic compounds harmful for the environment and people.
- **VINCENT HALO wheels: CO2 reduction** Due to their recyclable core, their light weight and volume, HALO single use wheels contribute to the reduction of CO2 emissions caused by transportation.
- **An in-house "Good Practices" protocol** for recycling and resource saving during daily life within the organisation. A great deal more can and must be done, but Surfaces Group has started out on the demanding but essential path to transformational change, and the promotion of eco-sustainable economic growth.

IDENTITÀ DI GRUPPO GROUP IDENTITY

Surfaces Group

Absolute finishing

Surfaces Group è leader italiano nel mondo per la produzione di soluzioni integrate per tutte le lavorazioni di finiture di ceramica, pietra, marmo, vetro, agglomerati, anticipando le tendenze future e offrendo soluzioni complete grazie alla sinergia di marchi di eccellenza che rappresentano il meglio del Made in Italy: Surfaces Technological Abrasives, ADI, NoCoat, International Chips, Luna Abrasiv, RBM e Vincent.

Made in Italy | Knowhow tecnologico, alta qualità delle materie prime e innovazione al servizio al cliente.

Presenza Internazionale | Operiamo direttamente per essere autentici partner.

Tecnologia e Innovazione | Studio di nuove soluzioni anticipando le esigenze di un mercato in continua evoluzione.

Soluzioni Tailor-Made | Eccellenti finiture su ogni tipologia di materiale studiate su misura grazie ad una ricerca costante.

Surfaces Group is Italian leader worldwide in the production of integrated solutions in finishing processes for ceramics, glass, stone, engineered stone, keeping ahead of future trends and offering complete solutions, thanks to the synergy of brands of excellence representing the best of Italian output: Surfaces Technological Abrasives, ADI, NoCoat, International Chips, Luna Abrasiv, RBM, Vincent.

Made in Italy | Technological know-how, high quality raw materials and innovation to our customers service.

International Presence | We operate directly enabling us to be an authentic partner.

Technology and Innovation | The research of new solutions, anticipating the needs of a continuous evolving market.

Tailor-Made solutions | Excellent finishes for any type of material, tailor-made thanks to constant research.

Chi siamo

Who we are

Dal 1974 VINCENT produce utensili diamantati per il taglio, la molatura e la levigatura di pietra naturale, agglomerato, vetro e piastrelle in ceramica.

La nostra organizzazione, che comprende siti produttivi in Italia e in Asia, conta attualmente oltre 300 risorse altamente qualificate e una presenza commerciale in oltre 70 paesi, servendo più di 1400 clienti in tutto il mondo.

LA NOSTRA MISSIONE: ESSERE SEMPRE AL TUO FIANCO

I nostri clienti ci riconoscono per la qualità e la costanza delle prestazioni dei nostri utensili.

Questo riconoscimento è frutto di un percorso che ci vede impegnati da oltre 50 anni nella ricerca di soluzioni tecniche avanzate per elaborare prodotti innovativi e performanti. Più che fornitori ci piace definirci partner, parte attiva nel processo produttivo del cliente. Accompagniamo il cliente nell'applicazione, per aiutarlo nella definizione dell'utensile più adatto alle sue esigenze. L'obiettivo è ottenere la migliore soluzione possibile per la gestione del processo produttivo del cliente.

VINCENT has been a leading manufacturer of diamond tools since 1974: tools that are used for cutting and grinding, as well as polishing natural stone, quartz agglomerate, glass and ceramic tiles.

Our organization, which includes production sites in Italy and Asia, currently counts over 300 highly qualified employees and a sales force present in over 70 countries, serving more than 1400 customers around the world.

OUR MISSION: TO ALWAYS BE AT YOUR SIDE

Our customers value us for the quality and consistency in the performance of our tools.

This recognition is thanks to our quest over the past 50 years to find advanced technical solutions to develop innovative and performance geared products. More than just a supplier, we like to distinguish ourselves as partners, an active part of our clients' production process. We work together with our customers to apply and help define the tool most suited to their needs. The goal is to get the best possible solution to manage the customer's entire production process.

1974

Una storia segnata dall'innovazione

*History marked
by innovation*

Nel 1974, a Thiene, cittadina dell'Alto Vicentino, venne fondata VINCENT, azienda che si specializzò produzione di utensili diamantati per il taglio, la molatura e la levigatura di pietra naturale, agglomerato, vetro e piastrelle in ceramica.

VINCENT was founded in Thiene, a small town in the Northeast of Italy, in 1974. The company is specialized in the production of diamond tools for cutting, grinding and polishing stone, natural stone, quartz agglomerate, glass and ceramic tiles.

1994

A vent'anni dalla fondazione, nel 1994, VINCENT suscitò l'interesse della famiglia austriaca Swarovski, che acquisì l'azienda facendola entrare nel gruppo TYROLIT, produttore di abrasivi. TYROLIT rafforzò la sua presenza nel mondo degli utensili per pietra naturale ed debuttò nei settori della produzione di utensili per ceramica e vetro. Negli anni, le innovazioni sono state molteplici, andando a coprire tutte le applicazioni per la lavorazione della pietra naturale, partendo dal filo usato nella cava, agli utensili per la lucidatura dei top cucina fino ai settori contigui, quali pietra agglomerata, ceramica, vetro, vetro auto e ottica.

Twenty years after its foundation, in 1994, VINCENT caught the attention of the Austrian Swarovski family, who acquired the company and brought it into the TYROLIT group, manufacturers of abrasives. TYROLIT thus enforced its presence in the world of natural stone, and made its debut in ceramics and glass tools. Over the years, there have been many innovations, covering all applications for the processing of natural stone: starting from wire used in the quarry, to tools for polishing everything from kitchen tops to adjoining sectors, such as agglomerated stone, ceramic, glass, and automotive and optical glass.

2021

Nel 2021 la divisione Quartz Industries è uscita dal gruppo TYROLIT entrando a far parte del gruppo Surfaces recuperando lo storico marchio "VINCENT", arricchito dalla tagline "Tools for Quartz industries", dando evidenza al quarzo, il minerale maggiormente diffuso sulla Terra, che è contenuto in ognuno dei materiali lavorati con gli utensili Vincent: pietra naturale, agglomerato, vetro e ceramica.

In 2021, the Quartz Industries division left the TYROLIT group to become part of Surfaces group, reviving the historical "VINCENT" brand, enhanced by the tagline "Tools for Quartz industries". With an emphasis on quartz, the most widespread mineral on Earth, it is contained in each of the materials worked by Vincent tools: natural stone, agglomerate, glass and ceramic.

Innovazioni per la lavorazione del vetro Milestones for glass industry

L'innovazione può avvenire solo sviluppando costantemente qualcosa di nuovo che serve all'intero settore. Nella lavorazione del vetro VINCENT gioca un ruolo attivo nello sviluppo dell'innovazione e i risultati ottenuti lo dimostrano nel lavoro quotidiano dei clienti in tutto il mondo.

Innovation leadership can only be achieved by constantly coming up with something new that serves the whole branch. In Glass Industry VINCENT plays an active role in developing innovation and the impressive milestones show it in the daily work of the customers all over the world.

1979

VINCENT è il principale produttore di plateau lucidanti per vetro.
VINCENT is leader supplier of polishing plateau for glass.

1992

VINCENT sviluppa il sistema frangiflotti per macchine bisellatrici rettilinee.
VINCENT develops breakwater system for straight beveling machines.

2002

VINCENT presenta le mole a tazza resinoidi a lunga durata.
VINCENT introduces long life resin cup wheels.

2010

VINCENT crea nuove specifiche per molatura del vetro auto ad alte velocità.
VINCENT creates new specifications for high speed automotive edge grinding.

2013

VINCENT introduce mole periferiche ad alta velocità per vetro solare.
VINCENT presents high speed peripheral wheels for solar glass.

2014

VINCENT presenta HALO, la prima mola usa e getta per vetro auto.
VINCENT introduces the first single-use automotive wheel: HALO.

2017

VINCENT crea una nuova mola periferica chiamata HYLAS.
VINCENT creates a new peripheral wheel named HYLAS.

2018

VINCENT propone STARFLEX, il set universale di mole a tazza metalliche e resinoidi per macchine bilaterali.
VINCENT presents STARFLEX the universal set of metal and resin cup wheels for flat edge processing of float and laminated glass.

PATENTED

2019

VINCENT lancia SAVA-ACTIVE, stick abrasivi per la ravvivatura di mole nel settore vetro auto.
VINCENT introduces SAVA-ACTIVE abrasive sticks for dressing grinding wheels in the automotive glass industry.

PATENTED

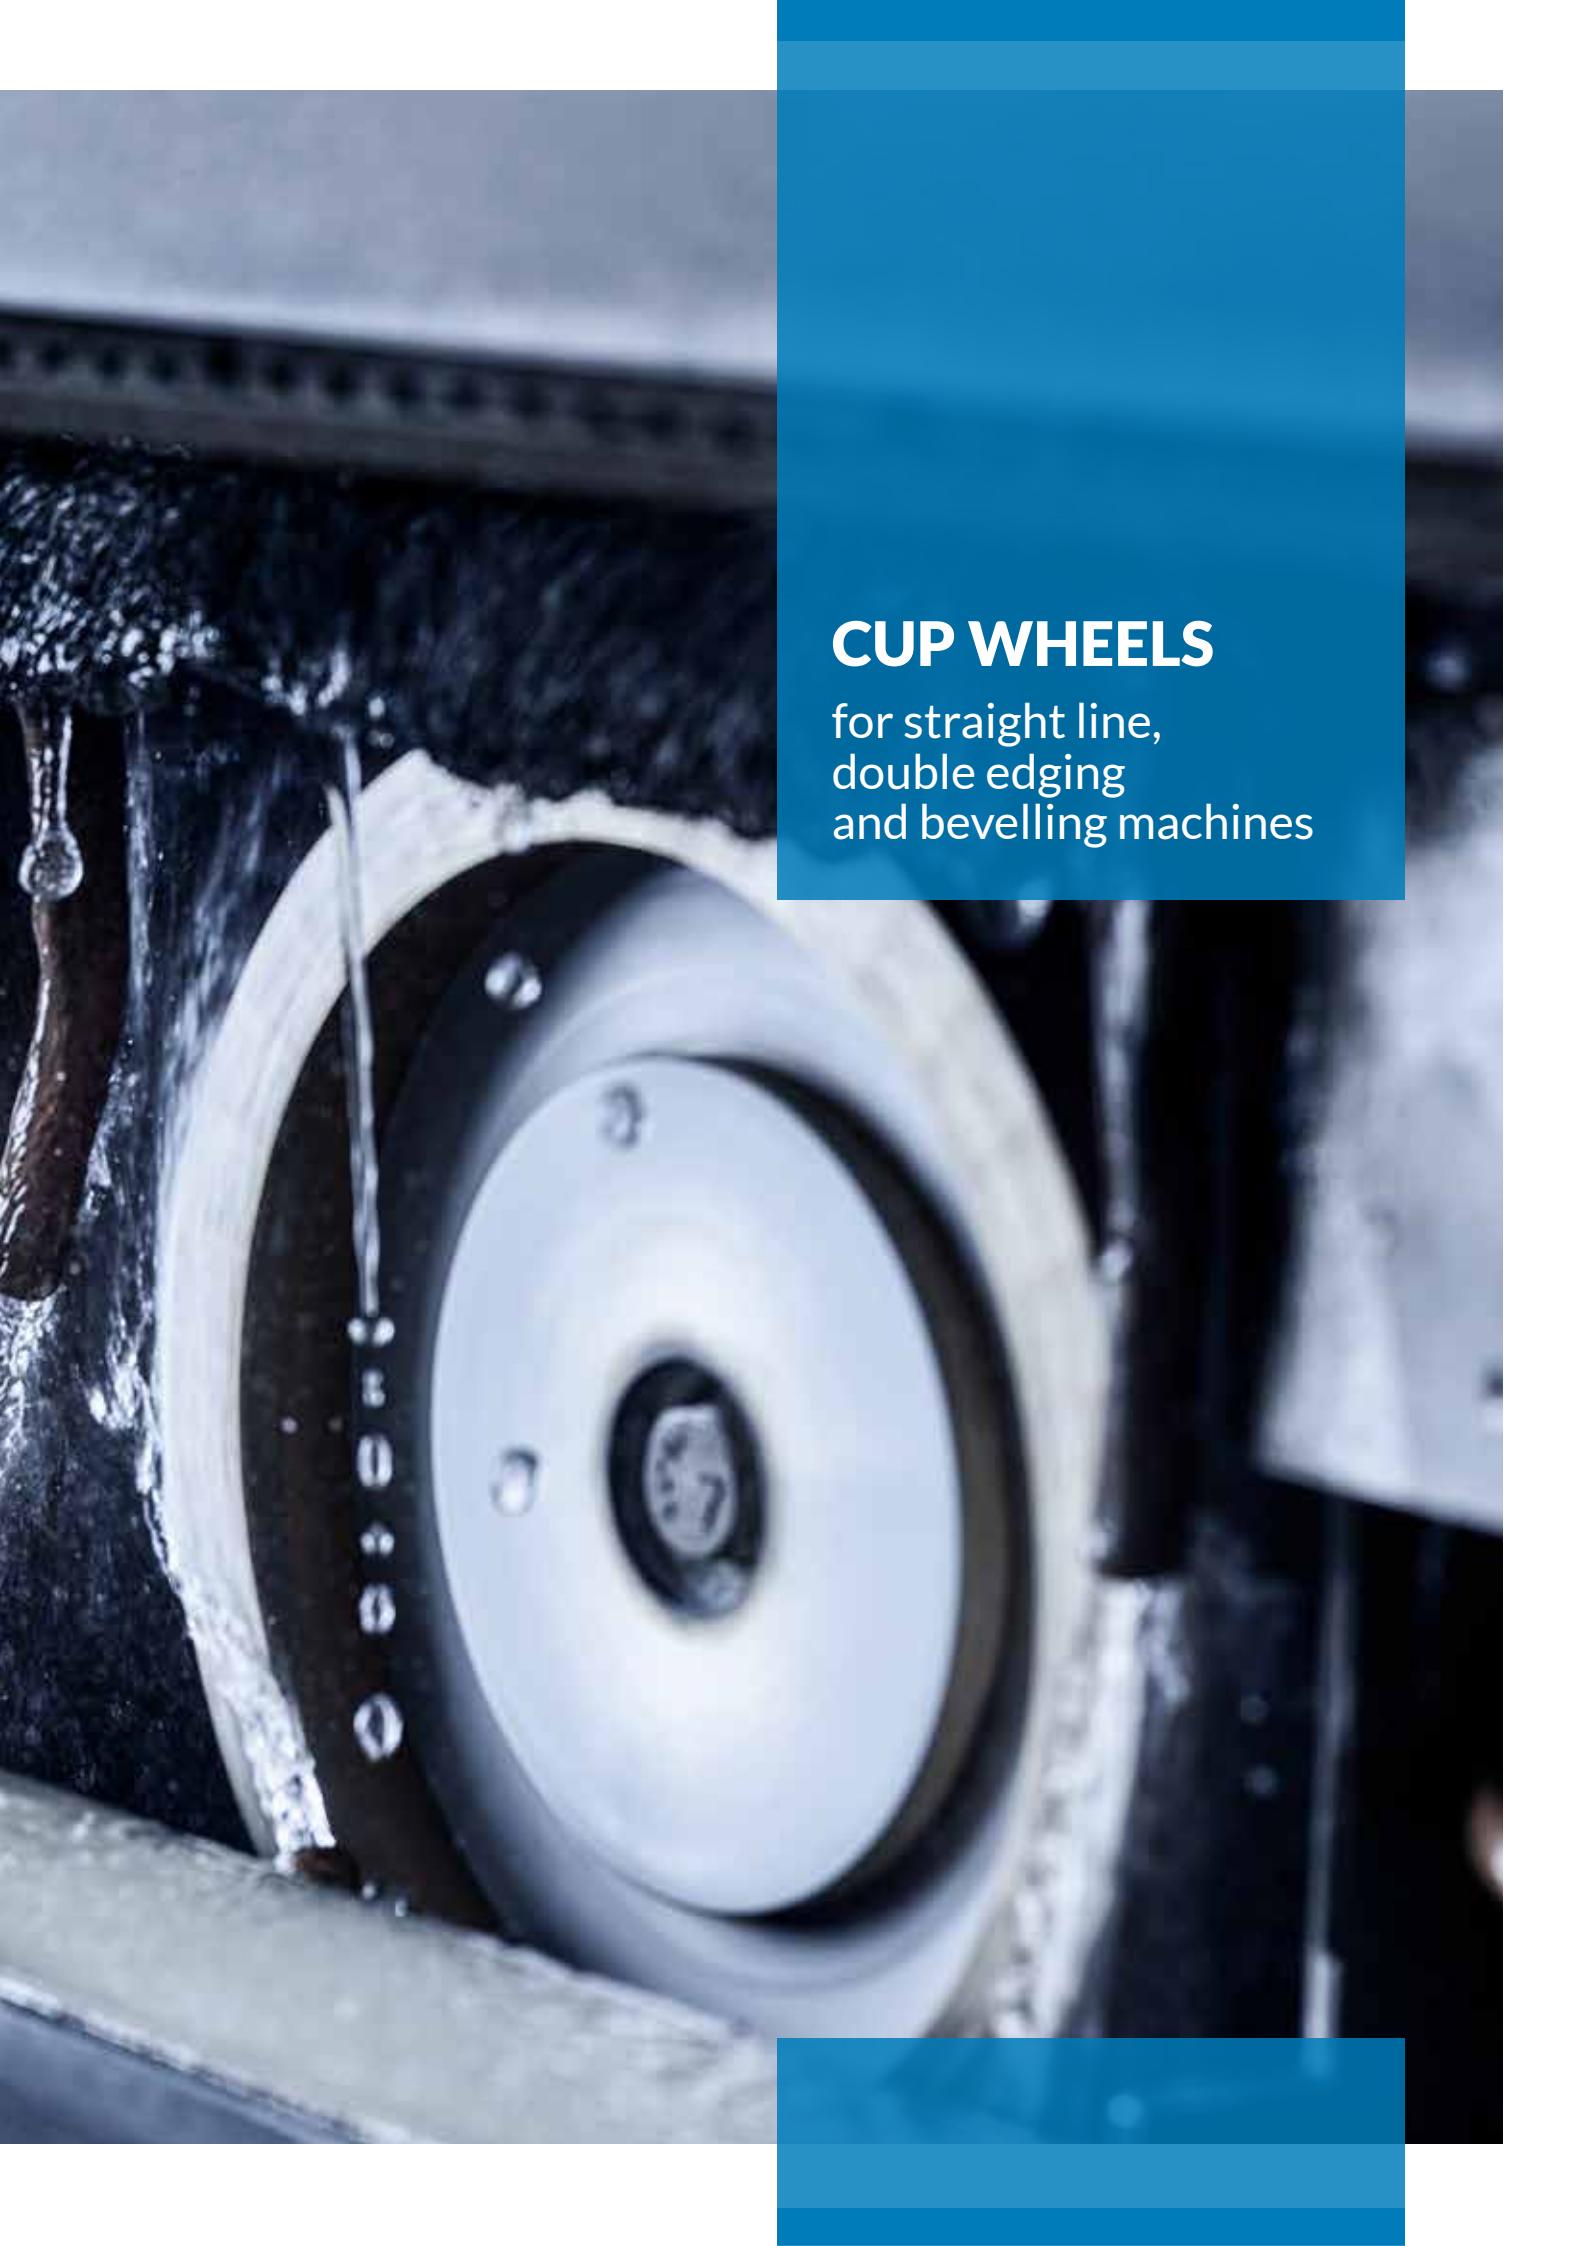

2020

VINCENT rilascia REVERSE, mole a settori con intagli per vetro laminato.
VINCENT creates REVERSE - segmented and slotted wheels for laminated glass grinding.

A close-up photograph of a double edging machine's conveyor system. The image shows a metal frame with several black, cylindrical peripheral wheels mounted on it. A light-colored, rectangular object, likely a piece of glass or plastic, is being processed by the machine. The background is dark and out of focus.

PERIPHERAL WHEELS

for double edging
machines

HYLAS

New concept of grinding glass for double edger machines with peripheral wheels.

With HYLAS, Vincent introduces a new line of wheels for grinding furniture and technical glass. The most significant benefits are: fast startup, high speed, excellent quality finishing as well as extreme flexibility of use. HYLAS allows the same wheel to be installed on different double edging machines, regardless of the type of machine fitting, thanks to the simple use of suitable adaptors. HYLAS has also been designed to never need reprofiling and thus offers the advantage of working always with a new grinding wheel.

Fast startup:
Specific bonds and accurate preparation of the diamond surface guarantee excellent edge quality already from the first piece.

Maximum performance:
The installation of only new grinding wheels with the maximum diameter grants always the best performance, ensuring perfect refrigeration, high speed, long life of the wheel and the excellent quality of the edge.

Machine set up minimized:
Thanks to specially designed adaptors, the installation is easy and fast. Because only new wheels with precise geometry are used, tool positioning and machine setting remain always unchanged.

Increased productivity:
Thanks to reduced installation time, fast start-up, high speed and durability, you get the highest productivity.

Economic advantage:
Minimum investments in new wheels and cost saving in tool reprofiling, service and logistics.

HYLAS assembling: fast and easy

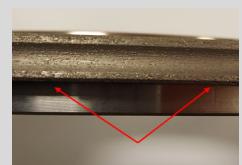

Carefully clean the contact surface of the HYLAS wheel

Carefully clean the contact surface of tool holder.

Grease the internal surface of the bore

Assemble the grinding wheel in the tool holder checking the correct positioning on the entire surface

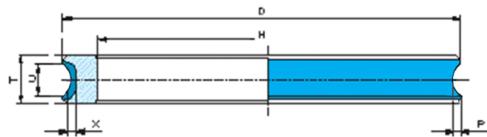

Fix the screws tightening torque of 3,4 Nm.

HYLAS

REVERSE

The ultimate solution for laminated glass grinding.

REVERSE wheels have been designed to improve the productivity of machinery for processing of laminated glass for architectural and structural facades.

- Improvement of diamond tool life up to 30%:** By using REVERSE tools, the removal of plastic shards after grinding is easy and effective. This reduces frictions while grinding and prevents deformation and wear of diamond wheels.

- Increased working speed:** The new REVERSE wheels allow a 20% faster working speed compared to standard ones.

- Enhanced edge finishing quality:** Through a regular and effective removal of plastic shards, the diamond band is always free of process waste and can work with no overheat. This ensures enhanced finishing quality of the edge.

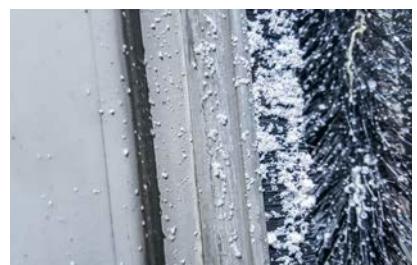

- Fragmentation of plastic waste:** REVERSE tools ensure a fragmentation of plastic waste into small shards that can easily drain away from the grinding area (picture B). This avoids machine stops and re-setting during process. Moreover it solves the problem of scheduled cleaning cycles to remove plastic waste (picture A).

Suggested parameters for REVERSE wheels:

Ø	Wheel description	glass thickness	RPM	max feed rate	max removal
100 mm	Rough segmented wheel	C6 / C8	5500 rpm	6000 mm/min	1,00 mm
		C10 / C12	5500 rpm	5500 mm/min	1,50 mm
		C16 / C20	5500 rpm	5000 mm/min	2,00 mm
	Medium TPZ cont. Band wheel	C6 / C12	5500 rpm	7000 mm/min	1,00 mm
		C16 / C20	5500 rpm	6000 mm/min	1,00 mm
	Fine TPZ cont. Band wheel	C6 / C20	5500 rpm	5000 mm/min	0,40 mm
	Rough segmented wheel	C6 / C8	5000 rpm	7000 mm/min	1,00 mm
		C10 / C12	5000 rpm	7000 mm/min	1,50 mm
		C16 / C20	5000 rpm	6000 mm/min	2,00 mm
150 mm	Medium TPZ cont. Band wheel	C6 / C12	5000 rpm	7000 mm/min	1,00 mm
		C16 / C20	5000 rpm	6000 mm/min	1,00 mm
	Fine TPZ cont. Band wheel	C6 / C20	5000 rpm	5000 mm/min	0,40 mm
	Rough segmented wheel	C6 / C8	3600 rpm	7000 mm/min	1,00 mm
		C10 / C12	3600 rpm	7000 mm/min	1,50 mm
		C16 / C20	3600 rpm	6000 mm/min	2,00 mm
200 mm	Medium TPZ cont. Band wheel	C6 / C12	3600 rpm	7000 mm/min	1,00 mm
		C16 / C20	3600 rpm	6000 mm/min	1,00 mm
	Fine TPZ cont. Band wheel	C6 / C20	3600 rpm	5000 mm/min	0,40 mm

DRILLING TOOLS

DRILLING

Application recommendations

Fitting	1/2" gas
Total length	75 mm (69mm upon request & 95mm using adaptor)
Diameter	5mm - 70mm (<5 & >70mm upon request)
Working lenght	22 mm
Diamond rim height	10 mm
Rim Thickness	1 mm
Slots	2 ($\varnothing \leq 30\text{mm}$) - 4 ($\varnothing > 30\text{mm}$)
Material	Stainless steel

Process parameters

Glass	Recommended peripheral speed	Drilling rate with water	Drilling rate with coolant	Countersink speed
Float	3-8	3 m/s	up to 2 mm/s	up to 2,5 mm/s
Float	10-19	3 m/s	up to 1 mm/s	up to 1,3 mm/s
Laminated	up to 30	3 m/s	up to 1 mm/s	up to 1,3 mm/s

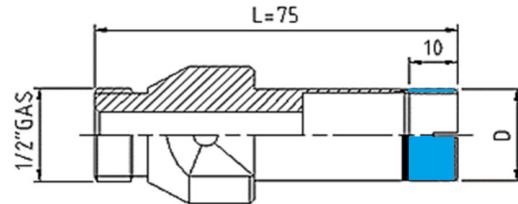

Operating conditions

Core Drills			
\varnothing	RPM	Per.speed	Max deep speed
5	8000	2,09	1,75 mm/sec

DRESSING STICKS FOR DRILLING STATION

Dimensions (mm)	Thickness	Grit	Unit of Purchase	Sysnr
200 x 50	8 mm	120	90	34388666

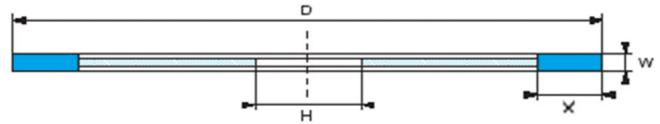

A large industrial machine, likely a metalworking or processing unit, is shown in the background. The machine has a dark, metallic frame and various mechanical components. In the foreground, there is a prominent blue vertical panel. On this panel, the text "CUTTING AND DE-COATING" is printed in a bold, white, sans-serif font.

200	30	76,2	A80-BE1556	standard	20 m/s	blue	641866

Minimum Order Quantity:

Ø125	30 pcs
Ø150	30 pcs
Ø180	20 pcs
Ø200	20 pcs

Price For Different Thicknesses:

Thickness of the wheel 10 - 14	same as thickness T=10mm
Thickness of the wheel 15 - 20	same as thickness T=20mm
Thickness of the wheel 21 - 27	same as thickness T=25mm

Application Recommendations:

Start with BLUE (BE1556) type and move to BROWN (BE15TF) for higher lifetime. Verify if cutting capability is still ok.

Recommended Parameters:

Pressure applied can change from 0,5 to 3,0 bars

Linear speed is based on coating and wheel type

The suitability of the wheel with the rpm of the machine is a parameter always to be checked
