20 years

VILPE® pass-thoughts

The VILPE® product family has grown again. It has been joined by 6 new pass-through sets suitable for the most popular ceramic tiles sold in Poland and Central Europe.

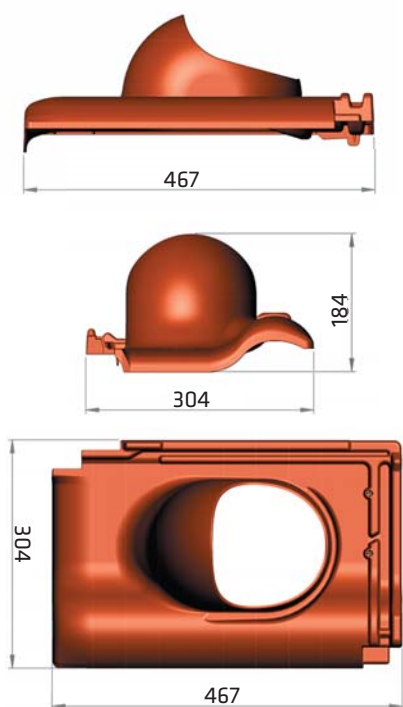

VILPE® pass-through sets are made of high quality, mechanically durable PP material resistant to even the harshest weather conditions. The material is also resistant to colour changes - it's environmentally friendly and recyclable

We give to all our pass-through sets 20 years mechanical guarantee and 10 years for colour change resistance.

All our pass-through sets are easy to install and contain the pass-through, screws, underlay seal and easy to follow installation instruction. They fit perfectly to the roof material and are watertight. The sets are suitable for roof angles up to 60° and pipes Ø 110, Ø 125, Ø 160.

PT 10 tile pass-through Roofing: Röben Monza plus
