

ADVANTAGE

- ▶ **Excellent arc characteristics**
for a wide range of applications
- ▶ **Generator compatible**
ideal for site use.
- ▶ **HF and Lift TIG**
ignition meeting all requirement
- ▶ **Single phase smart switching**
230V / 400V primary input power
- ▶ **Full function user-friendly**
control panel layout for easy setup of welding parameters
- ▶ **Recessed controls and connections**
to produce a better weld bead appearance at the start.
- ▶ **Fan on demand**
built-in reduces power and the intake of dust and fumes.
- ▶ **High speed Pulse**
to adjust the arc focus, reduce distortion and increase travel speed.

Designed and engineered for durability & reliability !

The Invertec® V205-T PULSE has been designed and manufactured using the latest digital inverter technology allowing this machine to combine a rugged industrial construction with excellent arc characteristics.

The Invertec® V205-T PULSE is manufactured in a lightweight but robust outer casing, making it portable and ideal for operation, even in the most hazardous environments. The single phase smart-switching 230V/400V primary input power makes it suitable for operation on site in conjunction with a generator or within a workshop environment, providing maximum flexibility.

The Invertec® V205-T PULSE is supplied as standard with all the features you would expect from a professional TIG welding machine including HF TIG ignition, Lift TIG ignition, 2 or 4 step, variable downslope and post flow control. In addition, it has a digital pre-set meter with a Hold Function and a built-in Variable Pulse. The control panel of this machine has been designed to show the welding sequence, making it user friendly and easy to understand.

A unique feature is the variable high frequency PULSE that allows the welder to adjust arc focus to suit the application. This will reduce heat input, resulting in a more controlled weld, less distortion and increased welding speed.

The V205-T PULSE is air-cooled as standard. However by adding the COOL ARC 20 water-cooler the unit is changed into a professional water cooled TIG welder. The Invertec® V205-T PULSE is made with a solid industrial construction, designed with the integrated features of a professional TIG welding machine capable of the toughest jobs.
