

AC100

JESMONTE  
MADE FROM  
TE<sup>®</sup>

## About AC100

Jesmonite AC100 is a water-based, modified gypsum composite material used to create decorative moulded products. Jesmonite AC100 can be cast or laminated using Jesmonite Quadaxial Glass.

Jesmonite AC100 can be pigmented to any colour required by using it in conjunction with Jesmonite Liquid Pigments.

Jesmonite AC100 achieves a B-s1-d0 EN13501-1 Fire Classification.

## AC100 Applications

Jesmonite AC100 is supplied with a range of ancillary products including glass reinforcements, pigments, fillers, and control chemicals to adapt the material to the widest range of applications. Jesmonite is the ultimate chameleon material which can replicate virtually any surface, colour, or texture.

Architectural Elements  
Internal Panels

Prop Work  
Decorative Tiles

## AC100 Key Benefits

### **Stronger**

Strong, flexible, and more durable, with an increased impact resistance.

### **Lighter**

Lighter than stone, concrete and traditional sand and cement products.

### **Safer**

Independently fire rated in accordance with European Fire Classification EN 13501-1. Solvent free with no VOC's.

### **Finer**

Replicates the very finest detail with superior weathering qualities.

### **Greener**

Water-based making it kinder to the environment.
