

Dimmer Compatibility

Not all LED screw-in replacement bulbs are dimmable.

VIRIBRIGHT bulbs that are dimmable are indicated as such by this symbol on the website and on the bulb's package and/or on the bulb itself.

Note: Any bulb that cannot be used on a dimmer should have the statement "not for use with dimmers" marked directly on the bulb.

Per international standards, VIRIBRIGHT has tested our LED bulbs on broad range of popular dimmers to ensure compatibility. We can only suggest dimmers that have been tested and deemed compatible. Please note that VIRIBRIGHT continues to test dimmers. If your dimmers are not on the list, please contact your regional office and/or order a VIRIBRIGHT Dimmer.

NOTE: Not all LED bulbs regardless of the manufacturer are compatible with ALL dimmers whether legacy or modern dimmers.

Below is a list of lamp types and the dimmers that VIRIBRIGHT bulbs have been tested with and the compatibility results.

Benchmark LED 8W Bulb Dimmer Compatibility Test Results

Item	Brand	Model	Dimming Control	Power Handling	Test Voltage (VAC)	Test Frequency (Hz)	1 bulb on	2 bulbs on	3 bulbs on	4 bulbs on	5 bulbs on	6 bulbs on
