

VEGA;

VEGA takes place in the world market with its high-quality hydraulic breaker models and spare parts manufacturing. Vega and its experienced team have become a shining star of the industry by manufacturing spare parts for leading hydraulic breaker brands in the world market with superior technology and high quality standards since founded.

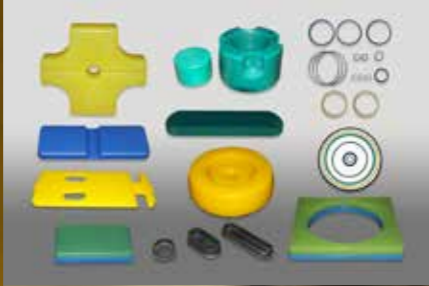

Vega has adopted the mission of providing solutions with the right products according to the industrial developments. VEGA is continuing to grow with its appreciated production quality and increasing the investments to enlarge the production capacity.

PRODUCTION TECHNOLOGY AND PARTS;

Production has been proceeding on CNC with the newest technology and heat treatment processes are carried out precisely. Measurements and durability tests are performed before and after the production carefully. High quality products are manufactured by its technological infrastructure.

PRODUCED PARTS;

Hydraulic breaker front heads, cylinders, pistons, lower tool bushings, upper tool bushings, valve bodies, tie rods and hex screws, lower and upper nuts, tool retaining pins, accumulators, diaphragms, wear plates, seal sets and tools.

NEW DEFINITION OF POWER...

LESS PARTS, LONG LIFE, EASY MAINTENANCE.

VEGA;
TECHNICAL INNOVATIONS, AFTER
SALES SUPPORT, METICULOUS QUALITY
MANAGEMENT.

HIGH POWER IN LOW WEIGHT;
VEGA Hydraulic Breakers produce more
impact energy than the competing brands,
even in less weight.

VALVE SYSTEM DESIGNED FOR VEGA
NEW SERIES HYDRAULIC BREAKERS. WITH
SIMPLE HYDRAULIC CIRCUIT.
High efficiency and reliable operation
with less oil flow.

LESS PARTS & EASY MAINTENANCE
Simple design of the VEGA new series
of hydraulic breakers offers lower
maintenance costs for users.

LESS NOISE LEVEL BY ENCLOSED BODY AND
ANTI VIBRATION SYSTEM
The fully enclosed body, simple design and
special materials are used to reduce noise
levels and increase operators' comfort.
