Charging bin configuration parameters

Interface type: Micro
 Charging time: about 1 hours
 Input voltage: 5V/500mah

Wearing a way

Open the cover of the charging bin, take out the earphone of the right ear, gently put the speaker end of the earphone into the ear canal of the right ear, and then gently sway the earphone not to shake.

Mode of operation

1. The boot
 - (1) Open the cover of the charging compartment, take out the headset, start it automatically, and the red and blue lights of the headset flash
 - (2) When the headset is off, touch the touch pad of the headset for 3 seconds to start the headset
2. To turn it off
 - (1) Put the earphone back into the charging bin and close the cover. The earphone will be turned off and charged
 - (2) When the headset is on, touch the touch pad of the headset for 5 seconds to turn it off

Pairs of ears connected

1. Open the cover of the charging bin, take out the earphones and start up automatically. The red and blue lights flash, and enter the state of automatic team formation.
2. Open the device wireless list and search for "TWS"
3. Click "TWS" to connect. If the connection fails, put the earphone back into the charging bin and convert, and then repeat the above steps.

4. When both ears leave the normal connection, the headset will enter the wireless headset connection state. If the connection is not successful within 5 minutes, the headset will automatically shut down.
 5. After the headset is turned on and before the mobile phone is connected, the headset will automatically switch between Chinese and English languages. (After the headset is turned on and before the mobile phone is connected, three clicks on either side of both ears will automatically switch between Chinese and English languages)
- After the device is connected for the first time, the headset will automatically connect to the last pair device when it is restarted next time

FAQ

1. Q: How can I use only one earphone but sound?
 A: Put the two earphones back into the charging bin at the same time, the headset mode is restored. If the fault is not resolved, reset the headset. If the fault is not resolved, reset the headset.
2. Q: The phone can't connect to the headset?
 A: Make sure the phone has a setting icon on the status bar, and then take the headset out of the charging bin to start the pairing process.
3. Q: How can I listen to music/call without sound?
 A: Check if the headset is plugged in correctly, and then re-adjust. If the headset is not plugged in correctly, it will not work.
4. Q: Why is there a static/static?
 A: If you use headphones, there are a lot of RF devices, like signals, high power equipment and so on. Interference, starting and disconnection conditions may occur, and the operation can be restored by changing the environment or re-pairing.
