1990s

Lawrence J. Hargrave & Christopher A. Van de Ven

- **Issue** – organizational design, not strategy – is central to understanding business failure. Managers have to know how to design an organization that can survive in a dynamic environment. Business success requires a dynamic organization that can respond to change.
- **Method** – a review of the literature on organizational design and change.
- **Findings** – organizational design is a dynamic process. It is not a one-time event. It is a continuous process of change. Organizational design is a process of change that is driven by the environment. Organizational design is a process of change that is driven by the environment. Organizational design is a process of change that is driven by the environment.
- **Implications** – organizational design is a dynamic process. It is not a one-time event. It is a continuous process of change. Organizational design is a process of change that is driven by the environment. Organizational design is a process of change that is driven by the environment. Organizational design is a process of change that is driven by the environment.
- **Conclusions** – organizational design is a dynamic process. It is not a one-time event. It is a continuous process of change. Organizational design is a process of change that is driven by the environment. Organizational design is a process of change that is driven by the environment. Organizational design is a process of change that is driven by the environment.
- **Recommendations** – organizational design is a dynamic process. It is not a one-time event. It is a continuous process of change. Organizational design is a process of change that is driven by the environment. Organizational design is a process of change that is driven by the environment. Organizational design is a process of change that is driven by the environment.
