

ORNAMENTAL  
MARBLE  
PLASTER

RAMIX is a Ukrainian manufacturer of high-quality ornamental marble plaster with a unique binding component that guarantees wear resistance and durability of the coating.

A wide range of decorative coatings made of natural marble chips. Possibility of to customize the color and texture.

RAMIX is a carefully selected colour composition containing marble and quartz fillers from quarries in Italy and artificially rolled marble pebbles from Turkey.

## Usage

Decorative marble plaster RAMIX is specially designed for finishing surfaces both inside and outside buildings. It is a perfect solution for interior decoration of administrative buildings, subways, banks, sports and SPA complexes, catering establishments, medical facilities, residential premises, etc.

Due to its high resistance to mechanical damage, RAMIX is recommended for use on floors and stairs both indoors and outdoors, for finishing foundations, cornices, stairwells, swimming pools, showers, bathrooms, etc.

RAMIX is presented in the form of a ready-to-use decorative plaster mixture, as well as in the form of finished products made of Italian chips and pebbles - washbasins, countertops, facade slabs (1×0.5 m). RAMIX also offers ready-made kits for laying stone carpets and paths.

# RAMIX decorative slabs

A good solution for modern interiors and facades. Different textures and colors of the slabs effectively transform walls, walkways and flooring into a work of art. High-quality natural Italian marble pebbles are used for the production of these decorative tiles. The tiles are mounted on the wall and floor using glue or ventilated facade technology. The coating is aesthetic, unpretentious in maintenance, and durable in operation. RAMIX decorative marble slabs are fireproof - they do not support combustion.

**Material:** high-strength composite material: compressive strength 20 MP (200 kgf/cm<sup>2</sup>);

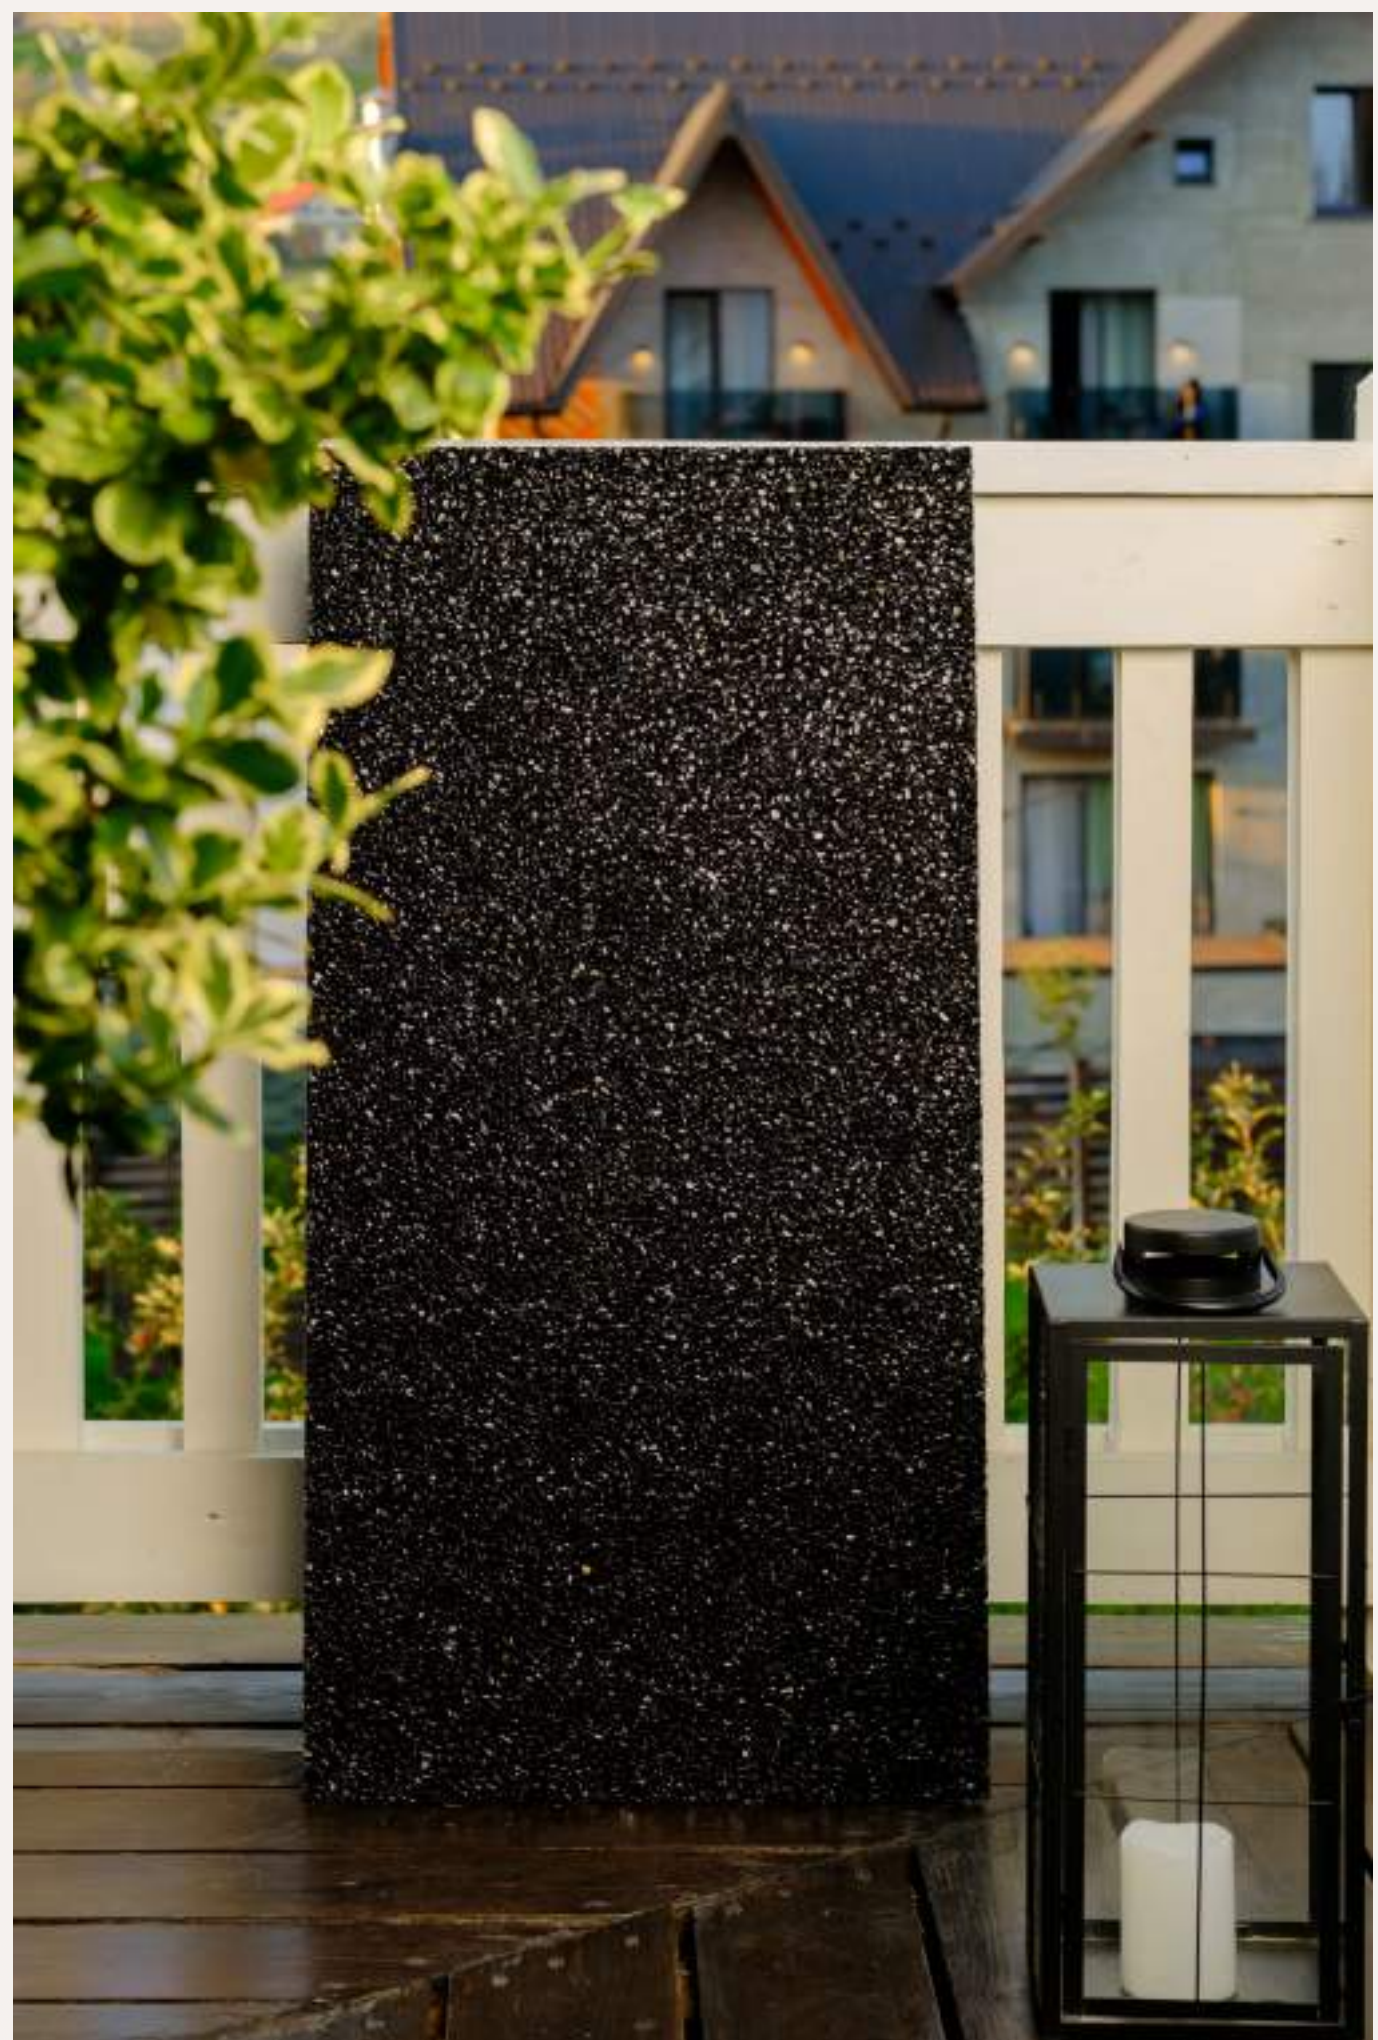

**Tile length:** 1000 mm;

**Tile height:** 500 mm;

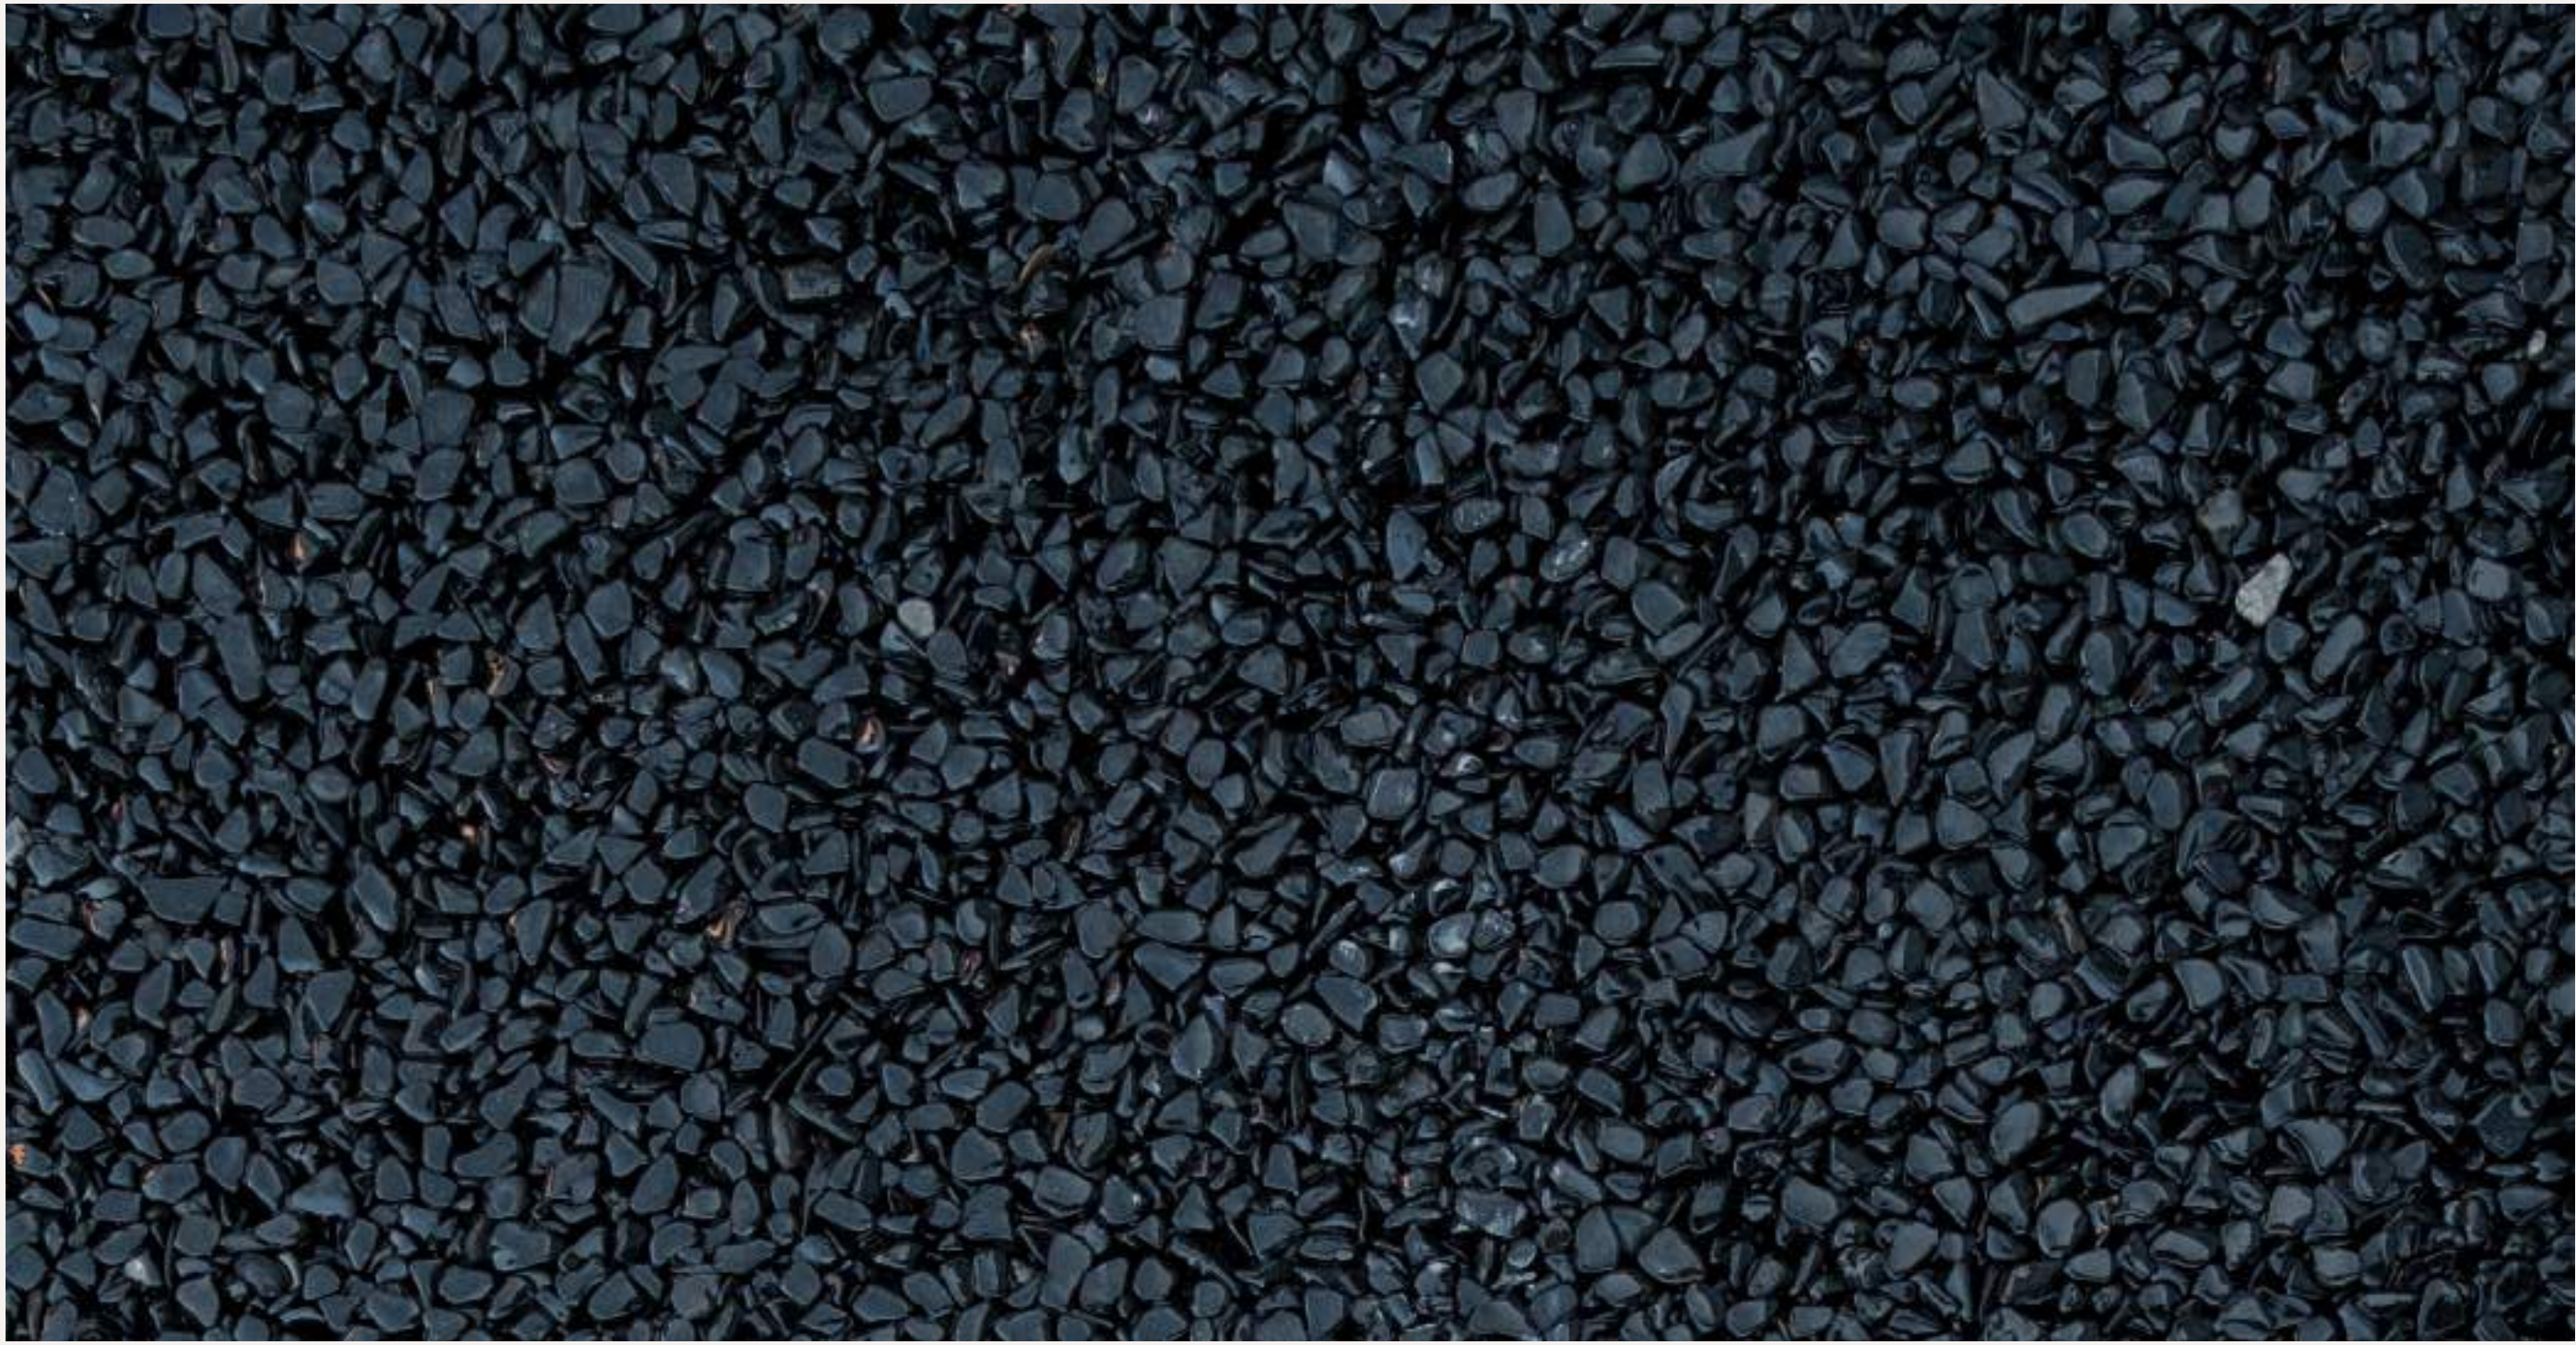

**Tile thickness:** 1.2-2 cm;

**Price:**

860 UAH / 1 tile - Wholesale (from 50 tiles)

## Stone carpet

Set for self-application RAMIX.

Marble chips black rolled fraction 4-7 mm.

Weight of the set (bag + glue): 24 kg.

Output of stone coating: 1-1.2 m<sup>2</sup> / 1 set.  
(With an application thickness of 1.5 cm)

It is sold together with a two-component adhesive, which is included in the price of the kit.

### Price:

1680 UAH / 1 set (24 kg) - Wholesale

1860 UAH / 1 set (24 kg) - Retail

## RAMIX is compatible with surfaces

of concrete structures, ceramic and plaster substrates, gypsum plasterboard panels, as well as with all varnish and protective coatings. It adheres perfectly to surfaces covered with lime and lime-cement plaster.

## Peculiarities

- High mechanical strength and durability
- Resistance to moisture and weathering
- Hygiene
- Ecological purity
- Fire safety
- Resistance to treatment with 10% chloramine solutions ("sanitary treatment")

## Advantages

- Aesthetic, reliable and durable protective coating
- European quality standards
- Wide range of colours, textures and surface relief (volume)
- Possibility to create individual colours and structures on request
- Application process does not require special tools and techniques

## Manufacturing

Ornamental marble plasters by RAMIX are manufactured at the PhoenixBud factory in Vorokhta, Ivano-Frankivsk region.

Owing to the location of our production facilities in the Carpathian region and our long-term partnership with suppliers from Italy and Turkey, we create premium quality products at an average price.
