LED intelligent night light

1. The product does not need wiring and is easy to install. It can be used in bedrooms, wardrobe, walkways, carriages, etcSpace to be illuminated.

2. Switch monochrome

   When in use, select off gear to turn off, auto gear sensing, and no gear will light up the corresponding gear.

3. Switch two-color model

   Off white warm is selected when the corresponding gear is used.

4. Human sensor:

   In the dark environment, when the human body enters the sensing range of 3m, the light is on and automatically turns off after leaving for 20s; The bright environment small night light will automatically enter the sleep state.

5. The bottom is attached with a black magnetic sheet, which can adsorb iron plane suspension, or the supporting four shaped iron sheet (with back glue) can be used to adsorb any plane.

   Note: When the light is dim, please charge. The red indicator light is on when charging and off when full.
