ORIZZONTE

Manual positioner for multi-hole bars

Orizzonte: without accessories, with bar 2000 mm long.

Ideal for frames or lightweight structures where a repositioning of the workpiece is required to facilitate the work of the welder.

DESK 28 multi-hole bars are available in lengths from 1000 to 3000 mm, with or without Nitriding and oxidation treatment. They are compatible with all accessories of the DESK 28 range, in particular, all the mounting brackets allow an expansion of the working area.

Detail of the rotation device.

The bar can rotate continuously by means of the handle. The device is irreversible and there is no need of locking brake. The handle can be replaced by a cordless screwdriver.

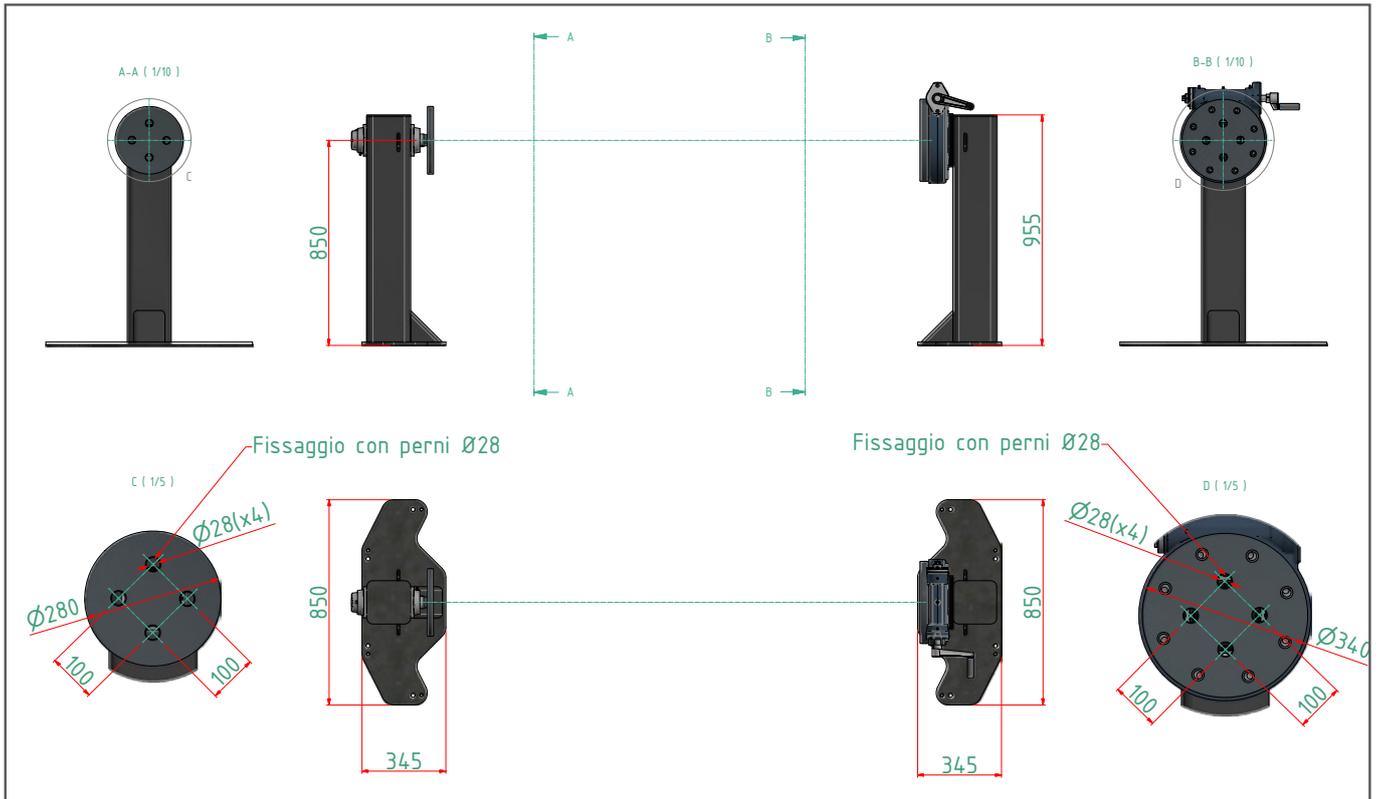

Example of placement of tubulars locked by means of several accessories.

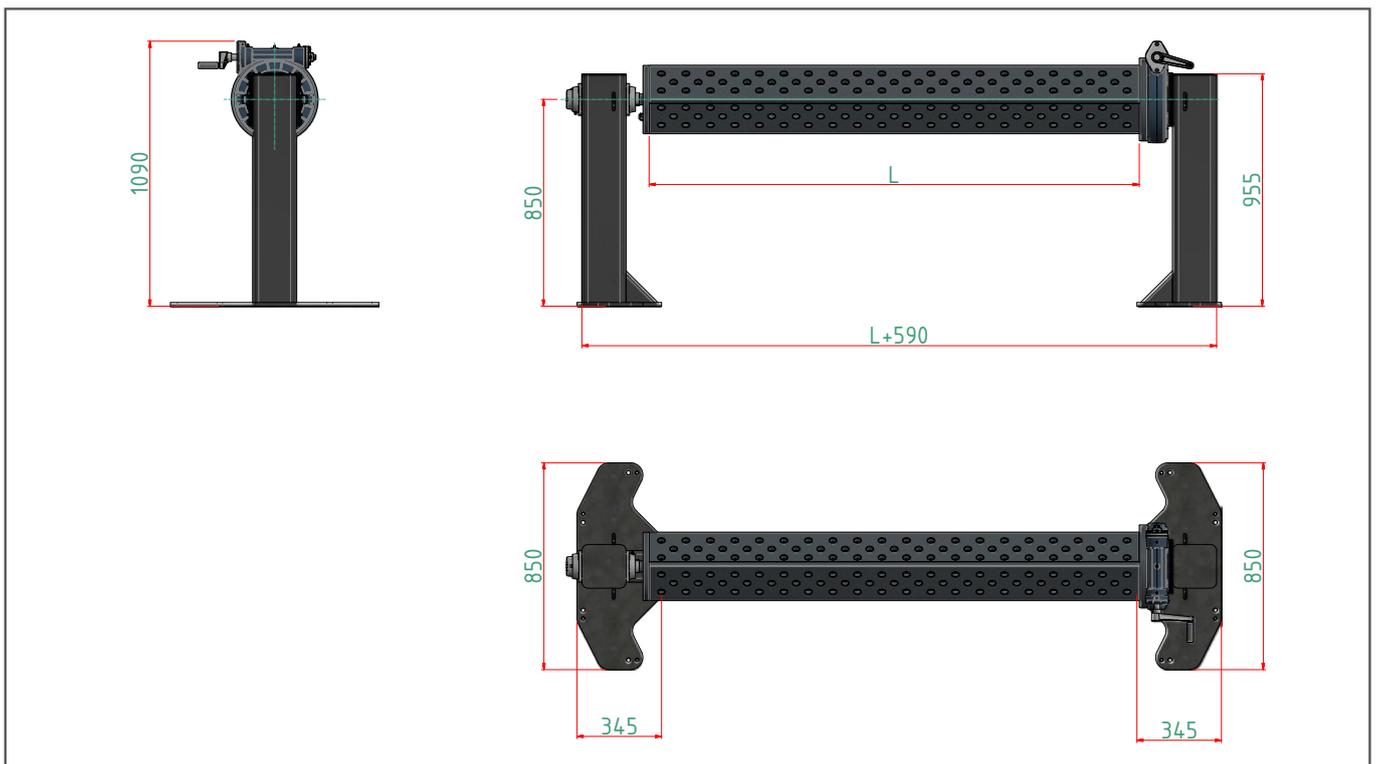

We reserve the right of modifying the technical features of machinery as stated herein and we do not respond for any printing mistake.

All rights reserved. Text and images can be reproduced only after our written authorization.

An updated version of this catalogue is always available inside our website.
