

# VILPE EC roof fan wiring instructions

Use always the provided EC connection cable.

\* = Alternatively you can connect the yellow wire instead of the orange wire. The orange wire provides a flat 0-10 VDC output and the yellow wire provides 0-10 VDC PWM output.

Note! The EC motor always needs a separate constant 230 VAC supply. You can't use the cooker hood connector CN19 for this purpose!

EC connection cable. Connect this always to the CN7 connector of the cooker hood.
