## PRODUCT DETAILS

### I . Product introduction

Welcome to use our high quality video converter series product!

AV to HDMI high-definition converter, can convert AV (CVBS) composite video signal and FL/FR stereo audio signal into HDMI digital signal, so that the common audio and video signals of ordinary DVD, camera, etc. are converted to high-definition HDMI signal output, easy to connect LCD TV, HD display, etc.

### II . Specification

- 1, output HDMI signal format: 1080P (50Hz/60Hz) backward compatible
- 2, input signal format: a group of AV input, a group of stereo audio input
- 3, HDMI output impedance: 100Ω

4, AV input impedance:  $75\Omega$

5, working environment temperature:  $-25^{\circ}\text{C} - 75^{\circ}\text{C}$

6, working environment humidity: 65%

7, product size:  $88 * 48.5 * 20\text{mm(L*W*H)}$

8, maximum working current: DC5V/350mA
