Step4: Get the video guide.

# Install iCSee App

Search for iCSee from App Store"/Google Play™, or scan the QR codes below to download and install the App into your mobile device.

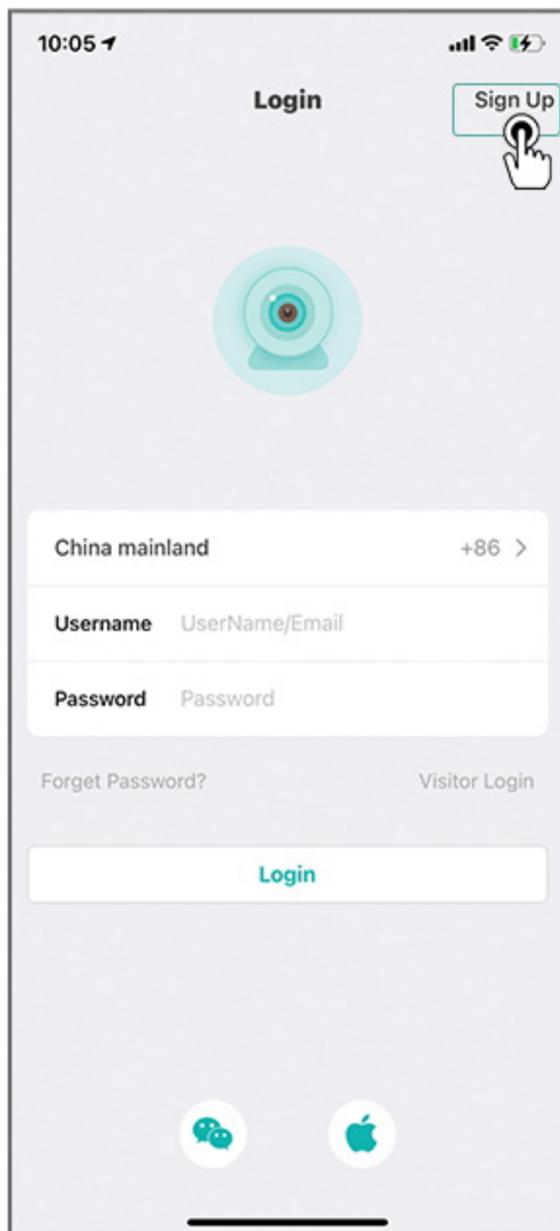

## Importance

- 1 This camera only supports 2.4GHz Wifi networks.
- 2 For a stable network connection, please make sure the camera and the mobile device are close to the router.
- 3 Avoid using special characters or symbols in your Wifi name and password, such as @!#\$%&\* and so on.
- 4 Please turn on the location service and Wifi on your mobile device, allow device usage permissions.
- 5 Please reset the camera for the first connection.(Long-press the RESET button for 8s, all the device will make a tone), Some devices need to be powered on by pressing and holding the power on button first.

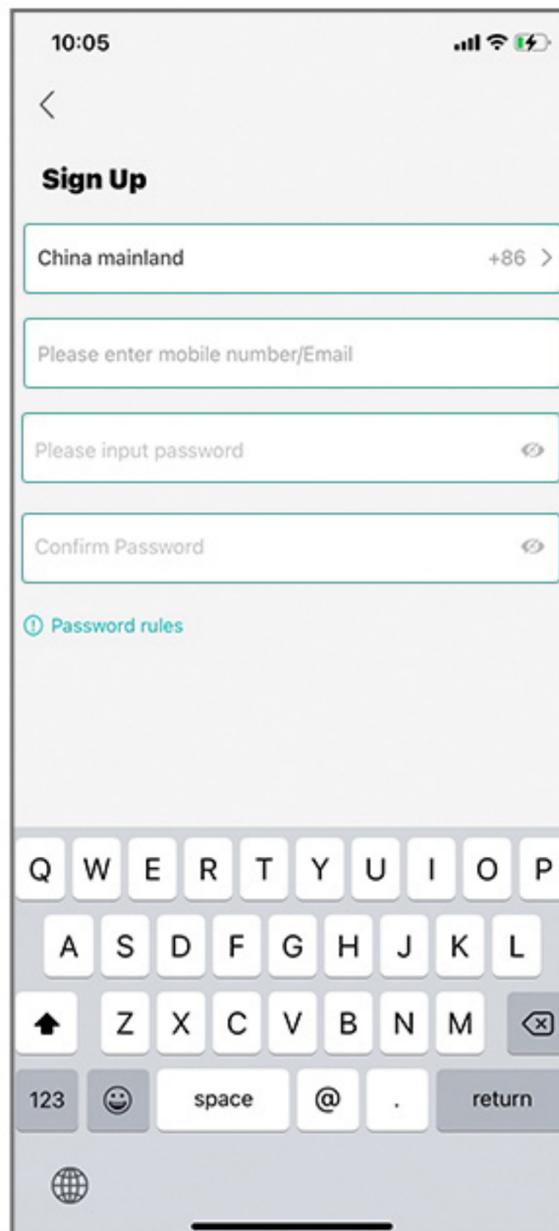

# Register an icsee account

Please register an account with a valid email address, then log in your iCSee account.

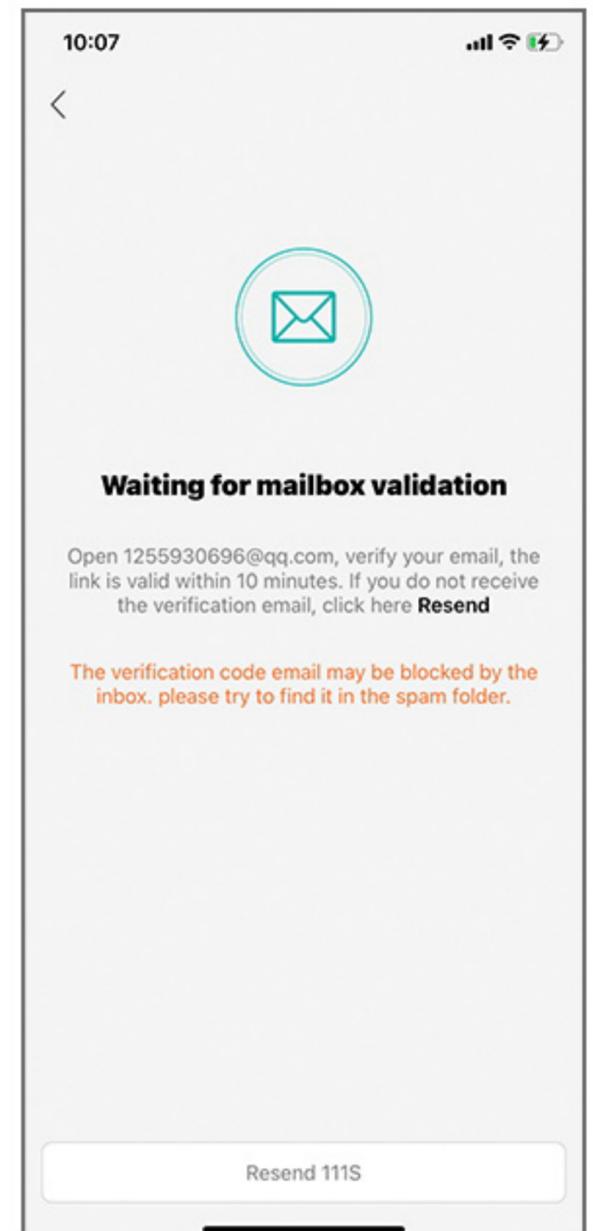

- 1 Open the iCSee App and tap the Sign Up button.
- 2 Choose login area, enter email/mobile phone and password
- 3 Waiting for mailbox validation.

## 💡 Tip:

- ① This camera only works with 2.4GHz WLAN. 5GHz WLAN is not supported!
- ② Please place the camera near the router while setting up the camera. After a successful connection you can place the camera in another place.
- ③ If the connection fails, please reset the camera, then repeat the first few steps.  
Note: Confirm the WiFi is 2.4GHz. The special symbol contained in the WiFi password may cause the camera configuration WiFi failure, please adjust it.)

- 7 Pick a name for your camera, then Save.
- 8 Select Alarm(only record alarm video),tap the Next.
- 9 Open the Alarm Push Switch, tap Done.
- 10 Set successfully.

# Troubleshooting, Q&A

## Q1. Where can I find the serial No. of the camera?

- \* For security reasons, we did not print the serial No. on the Package, please follow the manual to set up the camera. You can find it in 'Camera Setting' > 'About' after that.

## Q2. Why did I fail to connect the camera to my phone?

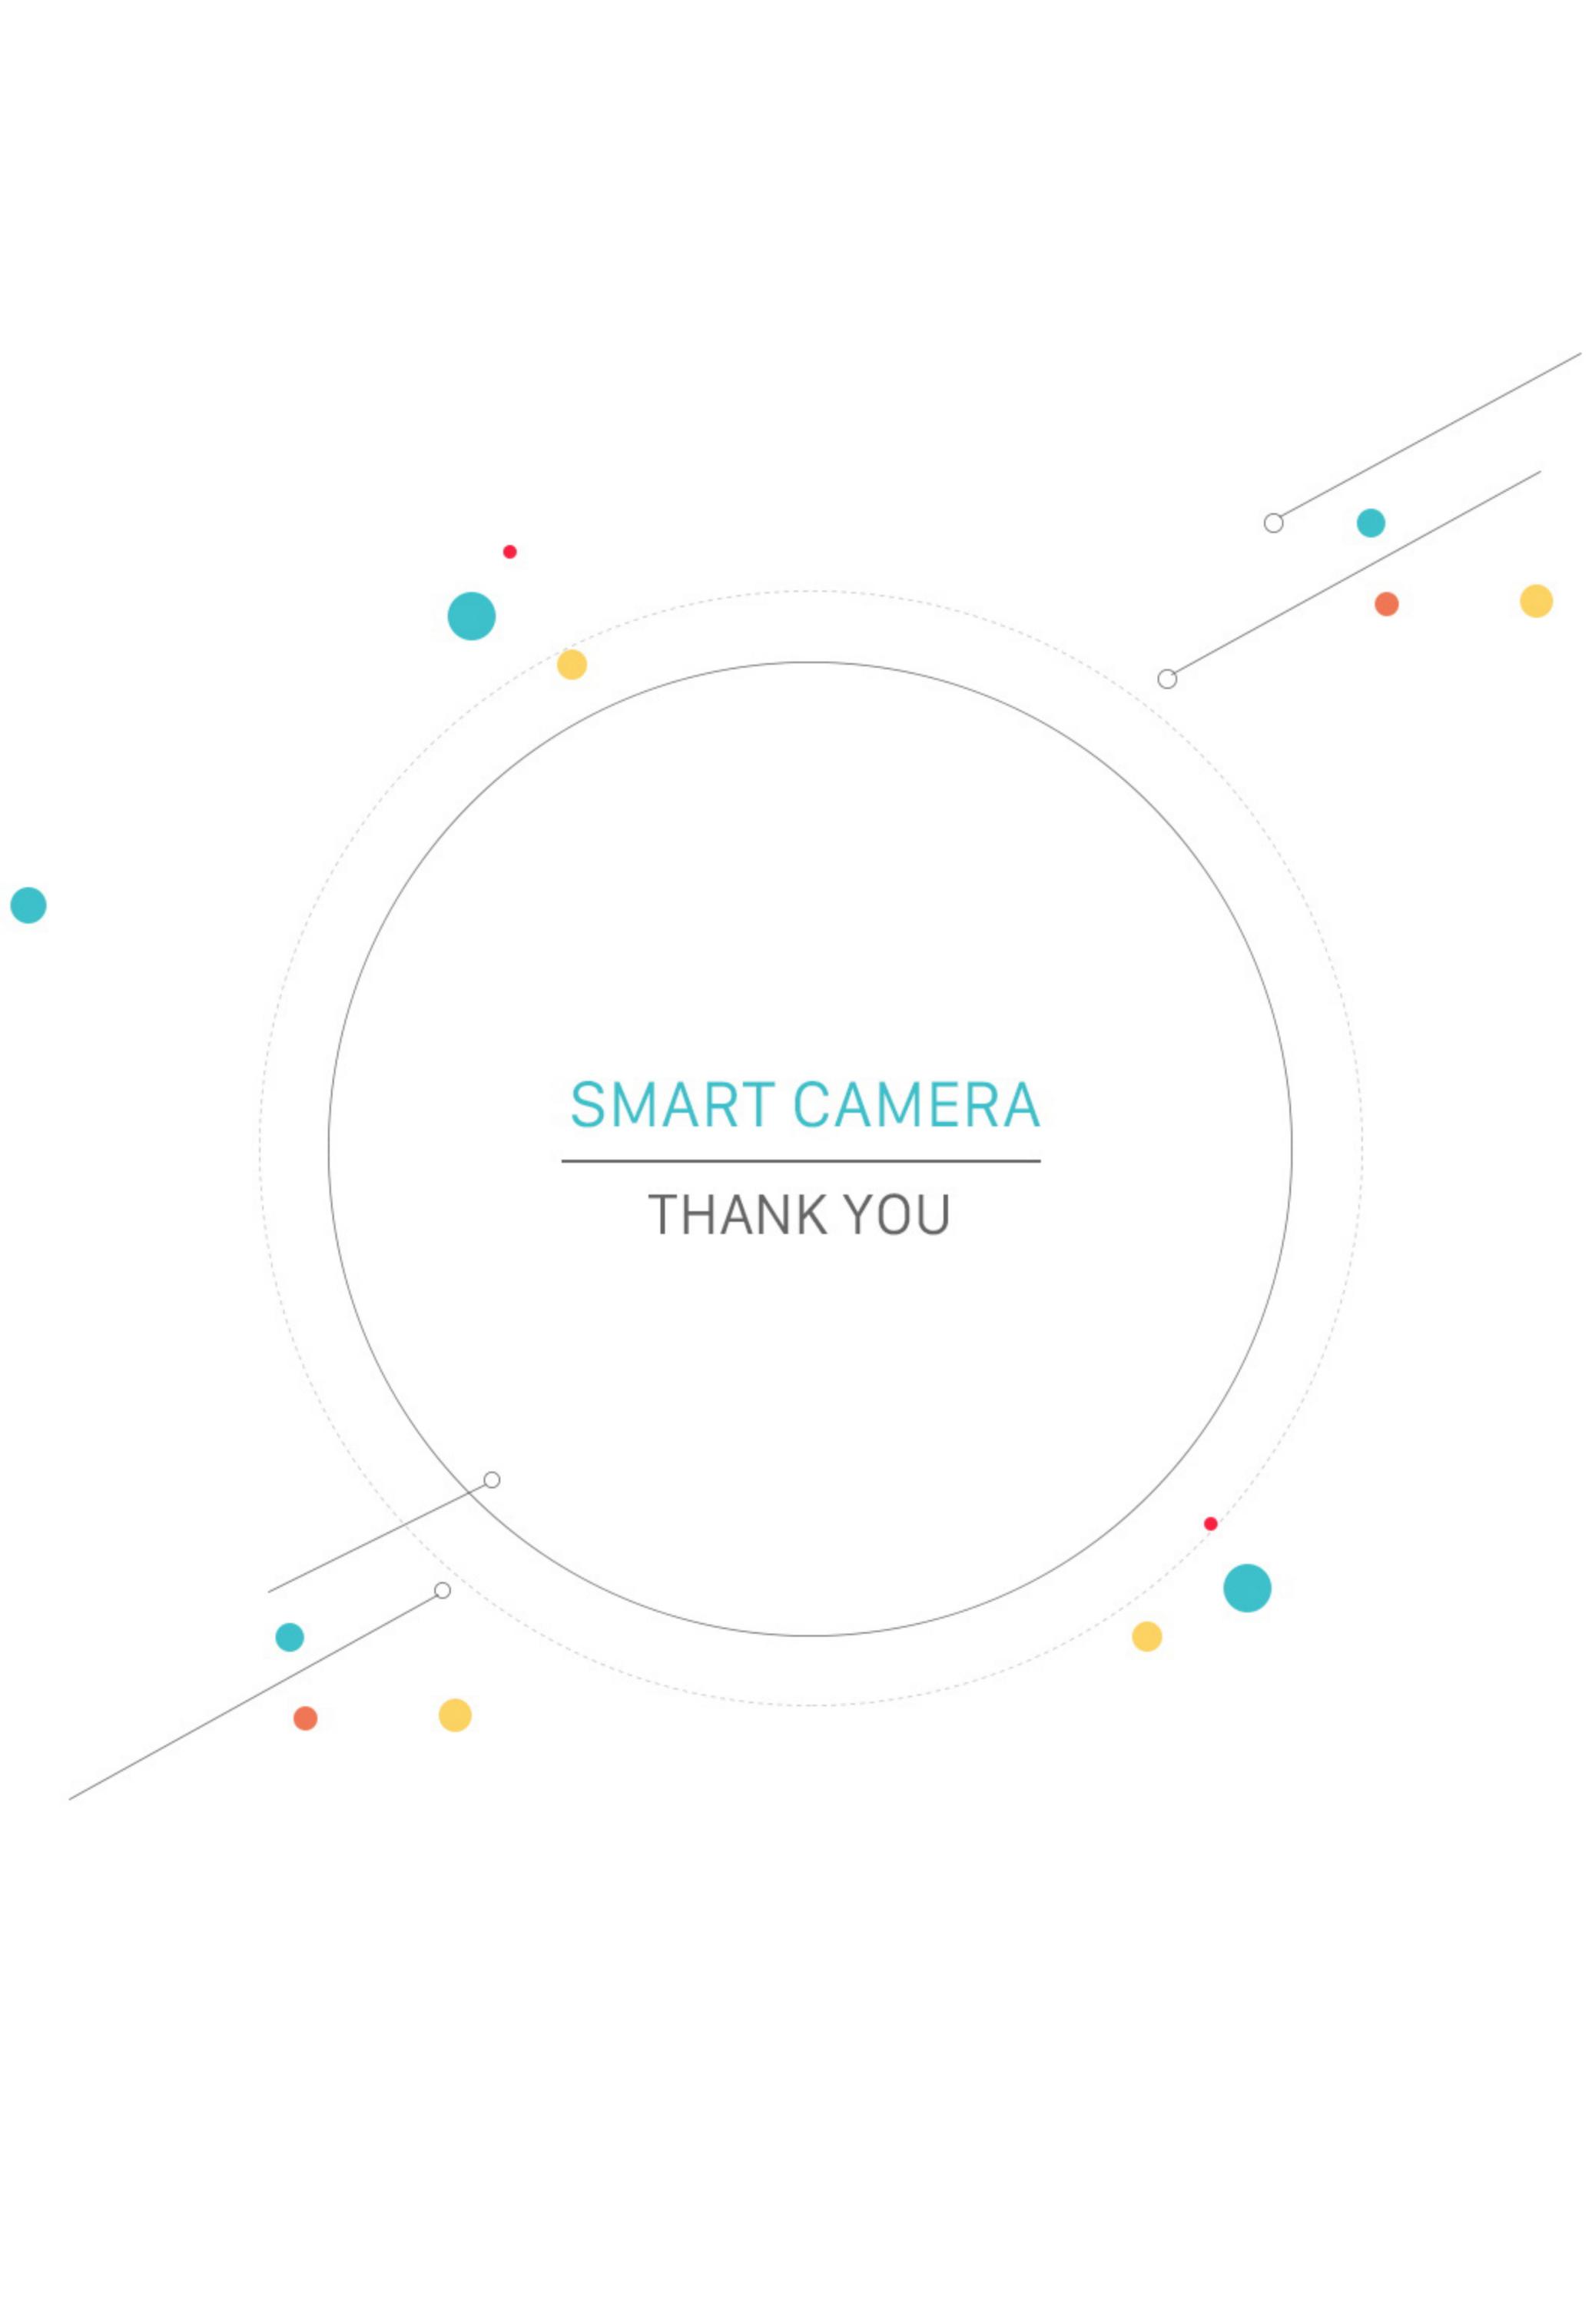

- \* The camera only supports 2.4GHz WiFi and make sure you've selected a correct one. If you are using a dual band router, please contact the router seller or us for further support.
- \* Avoid using special characters or symbols in your WiFi name and password, such as @~#\$%&\* and so on.
- \* If connection failed, please reset the camera and try again.

## Q3. Why can't the camera recognise the Micro SD Card?

- \* The camera does not support hot plugging. Please insert the Micro SD Card before powering on the camera, or reboot the camera after inserting the card.
- \* Please use a high-quality Micro SD Card from a reliable brand.
- \* Please make sure the Micro SD Card is installed properly.

## Q4. Why can't I get app alarm notification?

- \* Make sure you enabled the 'Smart security' > 'Open'
- \* Make sure you set the 'Human detection' to 0.6S.
- \* Make sure you disabled the 'No-disturb Settings'.
- \* Make sure you logged in the iCSee with an iCSee account.
- \* Make sure you've allowed the iCSee to push notification in the settings of your phone.
