# Smart Tag

For ZY

Specification	
Model	ACCUTAG-Google
Size	36x36x7.5 mm/1.42x1.42x0.29 inch
Weight	7.65g / 0.26 oz
Battery	CR2032
Voltage	DC 3V
Current	<5uA(Standby) / <10mA(Max)
Wireless	BLE 5.4
Wireless range	> 40m (Line-of-sight)
Buzzer	Built-in >75db (in 10cm)
Temperature range	- 5° C ~ 45° C (23° F ~ 113° F)
Humidity range	< 95% (Non-condensing)
System requires	Only for Android, Android 9 above with the latest software.
APP	Google's Find Hub

## Before Use

Please download the official Google's Find Hub app through the Google Play Store:

1. Open the Google Play Store on your Android device.
2. Search for "Find Hub".
3. Verify the developer is Google LLC.
4. Tap "Install" to complete the process.

### Important Notes:

1. System Requirements: Requires Android 9 or later, and the device must be logged into a Google account.
2. Google's Find Hub APP needs to be updated to the latest version on the Google Play Store, and Google Services need to be updated on mobile phones.
3. Permission Settings: Ensure that "Location Services" and "Device Administrator" permissions are enabled.
4. Security Warning: Avoid downloading APK files from unknown sources to prevent malware risks.

## How to Connect

1. Before connecting, ensure that your phone's Bluetooth is turned on and the WiFi or cellular network signal is at full strength.

2. Pull out the battery insulation tab to power on the device. Your phone will automatically prompt the product connection page immediately.

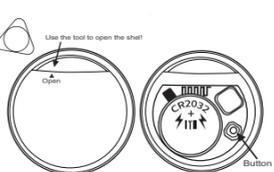

3. Click "Connect".

4. Read "Use Responsibly" and click "Agree and Continue".

5. Once connected, click "Open App" to be redirected to the product management page.

## How to replace the battery?

Use the tool to open the shell

### How to use the function button

Power on: Press the button once, the device is on.

Power off: Press and hold the button for 5 seconds, the device is off.

Reset: Press the button 4 times quickly within 3 seconds, and long press the button 5 seconds until you hear a beep, the device is in reset state.

Tip: If you want a refund, please make sure to remove the items you have added before returning to avoid disclosing your privacy.

## 1. See on map

Pull up a map view of the space around you to better understand where exactly your tagged item is located. Zoom in and out to track down your item.

## 2. Activate device

For devices that are particularly hard to find, try audio or visual cues. Ring your lost phone to locate (with sound), or have your tracker bag flash its LED lights.

## 3. Hot/cold "nearby finding"

You're sometimes closer to your lost item than you may think. If you know that it's somewhere in the house, Find Hub will indicate its signal strength so you can narrow down its location.

## 4. A community for finding

For the moments when you're really far away from an item, the Find Hub network is here to help. Android devices all over the world - like tablets, phones, and laptops - will work together to support you in finding that tablet you left on an airplane, two layovers ago.

## 5. Beyond the phone

Google Assistant on your Google Home or Pixel Watch is here to help. Try prompts such as, "Hey Google, Hub wallet" or "Hey Google, find my keys" to quickly find your things.

## 6. Privacy, built-in

Your location data is end-to-end encrypted, meaning that Google can never view or access it. Only you can see where your items have been and currently are.

## 7. For your eyes only

With the Find Hub app, Google does not use nor share your data. The information you share about yourself and your devices remains confidential.

## 8. Unknown tracker alerts

Your safety comes first. Find Hub is built to deter unwanted tracking. If your Android phone notices an unfamiliar device moving with you, you'll receive a notification. View the unknown device on a map, ring it to find it by sound, or get further help.

## Warning:

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

-Reorient or relocate the receiving antenna.  
-Increase the separation between the equipment and receiver  
-Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.  
-Consult the dealer or an experienced radio/TV technician for help

NOTE: This device and its antenna(s) must not be co-located or operation in conjunction with any other antenna or transmitter.

RF exposure: The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.

## español

**Cómo conectarse**  
 1. Descarga la aplicación oficial "Find Hub" de Google desde Google Play Store.  
 2. Antes de conectarte, asegúrate de que el Bluetooth de tu teléfono esté activado y la señal WiFi/celular esté al máximo.  
 3. Retira la pestaña aislante de la batería para encender el dispositivo. Tu teléfono mostrará automáticamente la página de conexión.  
 4. Haz clic en "Conectar".  
 5. Lee "Usa responsable" y haz clic en "Aceptar y continuar".  
 6. Una vez conectado, haz clic en "Abrir aplicación" para acceder a la página de gestión del producto.

## Deutsch

**So verbinden Sie das Gerät**  
 1. Laden Sie die offizielle "Find Hub"-App von Google über den Google Play Store herunter.  
 2. Stellen Sie vor der Verbindung sicher, dass Bluetooth auf Ihrem Telefon aktiviert ist und das WiFi/Mobilfunknetz vollständig empfangen wird.  
 3. Ziehen Sie den Batterie-Isolierstreifen heraus, um das Gerät einzuschalten. Ihr Telefon zeigt automatisch die Verbindungsseite an.  
 4. Klicken Sie auf "Verbinden".  
 5. Lesen Sie "Verantwortungsvoll nutzen" und klicken Sie auf "Zustimmen und fortfahren".  
 6. Nach erfolgreicher Verbindung klicken Sie auf "App öffnen", um zur Produktverwaltung zu gelangen.

## français

**Comment se connecter**
