## Belt Gearbox TSN.02.020

### 1. General Information

The Belt Gearbox TSN.02.020 is designed for use in agricultural conveyor and feeding systems. The unit ensures stable torque transmission, reliable operation under continuous load, and compatibility with standard TSN series equipment.

### 2. Technical Specifications

Parameter	Value
Product name	Belt Gearbox TSN.02.020
Type	Belt drive gearbox
Application	Agricultural machinery (conveyors, feeders)
Nominal input speed	up to 1500 rpm
Transmission type	V-belt
Housing material	Steel
Shaft material	Heat-treated steel
Mounting type	Flanged / frame-mounted
Operating mode	Continuous
Operating temperature	-20 °C to +60 °C
Lubrication	Factory-filled, maintenance lubrication
Rotation direction	Bidirectional
Weight	According to configuration

### 3. Scope of Supply

- Belt Gearbox TSN.02.020 - 1 pc
- Technical passport - 1 pc
- Packaging - 1 set

### 4. Quality and Warranty

The gearbox is manufactured in accordance with applicable technical requirements. Each unit undergoes quality control before shipment. Warranty conditions are provided according to the supplier's standard terms.

### 5. Storage and Transportation

The product must be stored in dry, ventilated помещений protected from moisture and aggressive environments. Transportation is allowed by all types of covered transport in compliance with handling regulations.
