

The ASAP 20 was designed to be a lightweight and efficient assault pack for the shortest missions. Purpose built pockets with internal elastic loops are accessible from the outside via a zipper, perfect for mags, gloves, or a small water bottle. These pockets were intentionally added above the PALS webbing to make them accessible when you attach MOLLE pockets or the MYSTERY RANCH REMOVABLE STICK-IT. Hydration reservoir compatible with five rows of inner PALS/VELCRO® pile panel to accommodate radio harnesses or removable pockets.
