

## NO ODORS

### Description:

NO Odors by Innovacar is the **odor eliminator and smell remover for cars** able to remove bad odors from the car interior quickly and effectively. Thanks to its high-quality formulation it has a **lasting effect that can be reactivated over time**. Its features in detail are:

- **Breaks down organic residues:** the formula added with enzymes, subject to patent protection\*, allows the product to act several times and in depth\*\* on the substrate molecules of organic dirt. NO Odors therefore breaks down the organic residues, considered the main cause of bad odors.
- **Reactivation over time:** its special molecules "reactivate" in the presence of moisture. For example: after a rain, enzymes on car mats treated with NO Odors reactivate, giving over time, the constant feeling of a continuously clean environment.
- **It does not cover, but eliminates odors:** its function is to actively intervene on the causes of bad odors, not simply covering and/or hiding them.
- **Leaves a fragrant touch:** it is ideal to apply after washing or after the cleaning phase of the interior and floor mats. It guarantees a good scent for quite some time in one's own car or, in case the treated vehicle belongs to a client or friend, it will be possible to give a fragrant touch synonymous with a thorough cleaning of the car.

\* Patent Application no. 14730984.3

\*\* Respect to the version without enzymes.

### Directions for use:

#### **How to eliminate bad odors from the car with NO Odors:**

The main sources of bad odors in car interiors are mainly fabrics. For these:

1. Spray the product directly on mats, carpets, fabrics...
2. Proceed evenly without saturating the fabrics.
3. Wait for the product to dry and avoid using brushes or cloths on the fabric after applying the product.
4. In case of persistent odors perform a second application after the surface has dried.

If applied on leather and hard surfaces such as plastic, we recommend spraying the product and wiping with a cloth during finish.

**Use:** use the product undiluted.

**Extraordinary cleaning:** with odors such as milk and urine, which have been absorbed by the fabric, make sure the product penetrates completely and evenly in the fabric, wipe with a damp cloth after 5 minutes.

### Caution:

When handling the product, follow the instructions in the safety data sheet.

### Technical features:

Appearance and colour: teal liquid

Odour: characteristic

pH: 9,6 ± 0,5

Flash point: >100°C

Relative density: 1,01 g/cm<sup>3</sup> ± 0,05

Solubility in water: soluble

Solubility in oil: partially soluble
