
Safety Instructions

Passive Loudspeakers

Intended Use

These speakers are intended exclusively for sound reproduction in dry (living) rooms. Only install and use them as described in the operating instructions. Any other use (especially safety-related or medical applications as well as outdoor installation) is considered improper and may result in damage to property or personal injury.

Installation

- Even and stable surface
- Do not expose to moisture
- Do not expose to direct sunlight
- Do not expose to high temperatures, keep sufficient distance from heat sources (heaters, ovens, open fires and all appliances that generate heat)
- Do not expose to extreme cold

Safety Precautions

- Ensure that the speakers stand securely. Adjustable feet/spikes must be set so that all feet/spikes are in firm contact with the floor. Metal spikes should be used for carpeted floors.
- Avoid vibrations.
- Please ensure that the connection cables are laid safely. Cables must not be laid in the vicinity of traffic routes (areas where people are present or moving) or cross them.
- Do not place any objects on top of the speakers. Do not cover the speakers with cloths or similar.
- Magnetic components: Please keep objects that are sensitive to magnetism away or do not place the speakers near them (e.g. CRT televisions, hard disk drives, magnetic cards such as credit cards, etc.).
- Do not place the speakers in the immediate vicinity of network components (e.g. routers, repeaters) and devices with transformers. Electromagnetic interference can cause noise. Cell phones in the immediate vicinity can also cause noise.
- Ensure that the speakers are adequately ventilated. Ventilation and reflex tube openings must not be covered or blocked. Do not operate in closed shelves or cabinets.

-2-

- The speakers should only be operated at temperatures between 0°C and 40°C.
- Do not use any aggressive cleaning agents containing alcohol or solvents or abrasive cleaning agents.
- The rubber feet supplied may leave residues or marks on some material surfaces under unfavorable conditions (e.g. high room temperatures or humidity).
- The device or the housing must not be opened. Repair and maintenance work may only be carried out by qualified specialists.

Prevention of Hearing Damage

Prolonged exposure to sound at high volumes can cause hearing damage or even permanent hearing loss. Please read the following safety instructions before using the speakers.

- When you start using the speakers, set the volume control to the lowest possible volume to begin with.
- Slowly increase the volume to a level that is comfortable for you.
- Always try to keep the volume as low as possible.
- If you experience discomfort or if you notice ringing in your ears, it is advisable to stop using the speakers immediately.
