

Descriptions

DSM series pressure switch opens or closes electrical circuit depending on pressure is dropping or rising. Working pressure can be set from 0,2 bar to 12 bar. User can follow system pressure instantly thanks to manometer on the switch. They can be used under compressed airs, fluids and gases.

- With manometer design.
- NA/NC, electrical connection by socket or fast-on terminal
- Reproducibility is inside of %1 set pressure
- NBR, HNBR, VITON seal equipments
- Body materials Stainless steel, brass or Steel options.

Applications

- Hydraulics and mobile hydraulics
- Pneumatics
- Heavy-Duty machinery
- Media; Compressed airs, liquids and gases

Technical Features

Connection Process	: G1/4" , G1/8" , 1/4" BSPT , 1/8" BSPT , M10x1,0 , M12 x 1,5 , 1/8" NPT , 1/4" NPT
Reproducibility	: Inside of %1 set pressure
Working Temperature	: -40 °C...+90 °C
Vibration Test(DIN EN 60068-2-27)	: 20 g (Test Time 30 min.)
Shock Test (DIN EN 60068-2-27:1993)	: 30 g
Working Cycle	: 5 000 000 cycle
Viscosity Range	: 10 ile 800 mm²/sec
Electrical Connection Feature	: 250 VAC 5A

Notes

These values are max. values and they can not be used at the same time

When you need to use the pressure switch in aggressive chemicals or fluids please contact with us.

You must stict to rules of clearance standarts Hydraulic oils (fluids). Use filteraton to block system errors..

It is effective for long working life of pressure switches. Please avoid using out of indicated values to have a long service from pressure switch.

Order Codes

DSM	—	—	—	—	—			—	—
Model	Body	Leakageproof Type	Mechanical Connection	Electical Con. Type	Pressure			Set Pressure	Pressure Condition
					Code	P. Range (bar)	Manometer P _{max}
