

Specification: Transporter ZM-60

PRODUCT SPECIFICATION	Transporter ZM-60
Product name	Transporter ZM-60
Purpose	Agricultural conveyor system for transportation and unloading of material.
Application	Used in agricultural machinery for grain handling and other agricultural operations.
Construction	Robust welded construction designed for intensive operating conditions.
Main components	Frame, conveyor chain, slats, drive elements, tensioning and support components.
Material	High-strength steel components with increased wear resistance.
Advantages	Reliable operation, maintainability, long service life, suitable for repair and replacement.
Manufacturer supply	Production and supply of spare parts and components for agricultural machinery.
Delivery	Shipment by transport companies or other agreed methods.

Technical information is prepared for product presentation and commercial use. Actual configuration may depend on manufacturer specifications and customer requirements.
