

80L GS

GMS
hydraulic

Specifications

Spool: 1.. 12 Spools / Double - Single - Closed Center - Motor - Floating - Regenerative Spool

Liter: 80L Nominal -100L Max

Ports: 1/2 Standard

Front Cap: Handle - Mechanical Joystick - Hydraulic Joystick - Remote Cable Control - Lock Handle

End Cap: Spring - Detent - Floating - Pneumatic - Proportional Coil - Hydraulic Control
Electro Hydraulic - Remote Cable Control

Open Center / Carry over / Parallel Circuit

Features

Simple, compact and heavy duty designed sectional valve from 1 to 12 sections for open and closed center hydraulic systems.

- ▶ Fitted with a main pressure relief valve and a load check valve on every working section
- ▶ Available with parallel, tandem or series circuit.
- ▶ Optional carryover port.
- ▶ A wide variety of auxiliary valves.
- ▶ Intermediate sections for several types of circuit.
- ▶ Available manual, pneumatic, hydraulic, electro-hydraulic, and remote with flexible cables spool control kits.
- ▶ Diameter 18 mm (0.71 in) interchangeable spools.

Additional information

This catalogue shows the product in the most standard configurations. Please contact Sales Dpt. for more information that is detailed or special request.

WARNING!

All specifications of this catalogue refer to the standard product at this date.

GMS, oriented to a continuous improvement, reserves the right to discontinue, modify or revise the specifications, without notice.

GMS IS NOT RESPONSIBLE FOR ANY DAMAGE CAUSED BY AN INCORRECT USE OF THE PRODUCT.

Valve general informations

Working conditions

This catalogue shows technical specifications and diagrams measured with mineral oil of 46 mm²/s – 46cSt viscosity at 40°C temperature.

Nominal flow rating		80 l/min.	
Max. flow		100 l	
Operating pressure (max.)	Series-parallel (tandem) circuit	315 bar	4600 psi
Back pressure (max.)	on outlet port T	25 bar	360 psi
Internal leakage A(B)→T	Δp=100 bar – 1450 psi fluid and valve at 40°C	3cm ³ /min.	0.18 in ³ /min.
Hydraulic fluid		Mineral base oil	
Fluid temperature	with NBR seals	from - 20° to 80°C	
	with FPM (VITON) seals	from - 20° to 100°C	
Viscosity	operating range	from 15 to 75 mm ² /s	from 15 to 75 cSt
	Min.	12 mm ² /s	12 cSt
	Max.	400 mm ² /s	400 cSt
Max. level of contamination		19/16 – ISO 4406	
Tie rods tightening torque (wrench 13)		30 Nm	22 lbft

Standard threads

Valve general informations

Performance data (pressure drop vs. flow)

Open centre

From side inlet to side outlet.

Inlet to work port

From side inlet to A port (spool in position 1) or B port (spool in position 2).

Work port to outlet

From A port (spool in position 2) or B port (spool in position 1) to side outlet.

Valve general informations

Hydraulic circuit

Parallel circuit

Standard configuration with open centre and side inlet and outlet.

Description example
80L GS10/2/AC(X-100)/18L/18L/RC

Series-parallel (tandem) circuit

A special working section kit is required. Tandem section is fed by the free flow pressure line; it is excluded when an upstream section is operated.

Description example
80L GS10/2/AC(X-100)/18L/SP-18L/RC

Series circuit

It is obtained by mounting a 1S series spool on a standard parallel section.
NOTE – The flows P→A and P→B, on the series spool, are reversed.

Description example
80L GS10/2/AC(X-100)/1S8L/SP-18L/RC

Directional valve with right inlet

Description example
80L GS10/2/BC(X-100)/18L/18L/RC

Complete sections ordering codes

Standard configuration with side inlet and outlet

80L GS10 / 2 / AC(X-100) / (P) - 18L.P3T / EI1 / (P) - 18L.P3T / RC

3.

4.

It's not necessary to indicate the "P" letter in the complete valve description with parallel circuit (standard); in case of other circuits, they must be specified by the related letter (SP).

1. Inlet section * page 10

TYPE	CODE	DESCRIPTION
AC(X-100)	30 08 5749	Side inlet with direct pressure relief valve
AD(X-100)	30 08 5663	Upper inlet with direct pressure relief valve
AC(V)	30 08 5659	Without pressure relief valve

2. Working section * page 17

TYPE	CODE	DESCRIPTION
P-18L	80W010000	Parallel circuit, prearranged for port valves, double acting spool with spring return, lever control
P-1S8L	80W010001	As previous one, with series circuit spool ("P" omitted in description)
SP-18L	80W010003	As previous one, with series-parallel (tandem) circuit

3. Intermediate sections * page 46

TYPE	CODE	DESCRIPTION
DFG	30 08 5774	Pressure compensated flow divider section
EI1(X-100)	30 08 5732	With direct overpressure relief valve
EI2(X-100)	30 08 5733	With direct overpressure relief valve and auxiliary inlet

4. Outlet section * page 48

TYPE	CODE	DESCRIPTION
RC	30 08 5660	Side outlet
RD	30 08 5711	Upper outlet
RE	30 08 5712	Upper outlet with side carry-over sleeve
RK	30 08 5713	Upper outlet with closed centre
RV	30 08 5714	With backpressure valve the combination with electro-hydraulic control is required
VRC	30 08 5715	Backpressure valve for VRC configuration

NOTE (*) - Items are referred to **BSP** thread.

Valve general informations

Complete sections ordering codes

Configuration with 2 side inlets and mid return manifold

80L GS10 / 2 / AC(X-100) / 18L.P3T / CS1 / ED - 18L.P3T / BC(X-100)

5. Return manifold * page 45

TYPE	CODE	DESCRIPTION
CS1	30 08 5779	Mid return manifold with G3/4 outlet port

6. Right inlet working section *

TYPE	CODE	DESCRIPTION
P-ED-18L	80W010007	As previous one prearranged for port valves ("P" omitted in description)
P-ED-1S8L	80W010008	As previous one with series circuit spool ("P" omitted in description)
SP-ED-18L	80W010006	As previous one with series-parallel (tandem) circuit

7. Right inlet section *

TYPE	CODE	DESCRIPTION
BC(X-100)	30 08 5753	Side inlet with direct pressure relief valve
BD(X-100)	30 08 5757	Upper inlet with pilot operated pressure relief valve
BC(V)	30 08 5769	Side inlet with valve blanking plug

8. Assemb. kit without intermediate section

CODE	DIRECTIONAL VALVE
30 05 6076	Tie rod kit for 1 section valve

VRE - VRC backpressure valve

Valve is assembled on flow through passage of outlet cover; it's necessary to provides pilot pressure to the actuator.
RV complete (with backpressure valve and tapered plug)

"A" side spool positioners

Particular positioner kits for special spools

8CR kit (30 07 5565)

3 positions with spring return in neutral and reduced spool stroke: **for 8F spool.**

13QN kit (30 07 5564)

4 positions with spring return in neutral and detent in position 3: **for 5BY spool.**

Working section

"B" side options

Lever control

Type L (30 07 5363)

Alluminium lever pivot box with protective rubber bellow; it can be roated 180° (configuration L180).

configuration L180

Type LF1 (30 07 5365)

With spool stroke adjustment in position 1 (P → A).

Type SLP (30 07 5366)

Mechanical control with dust-proof plate kit.

"B" side options

Lever control

Type LB (30 07 5367)

Steel manufacture.
Pivot can be assembled below (LB1 configuration) or above (LB3 configuration).

1	0	2
---	---	---

Configuration LB1

Configuration LB3

"B" side options

Safety levers with lock in neutral complete with handlever; lift handlever knob to operate.
With insulated handlever type **LEBP**

"B" side options

Controls prearrangement

Type SL

Type SLCZ

Protection cap usable with pneumatic, electropneumatic, and electrohydraulic spool positioners.

TQ cable remote control kit (30 07 5354)

Waterproof cap prearranged for remote control with flexible cable.

Working section

"B" side options

LCB mechanical joystick for two sections control (30 07 5370)

Complete controls

8ES solenoid control

Solenoid direct control with spring return to neutral position ; it needs special spools and standard working section body (body kit without seals on spool).

Description example:

80L GS10 / P - 1 8ES3 . U1(100) - 12VDC

1. Complete working section

TYPE	CODE	DESCRIPTION
P-18ES3-12VDC	80W010004	Parallel circuit, double acting spool, double acting ON/OFF solenoid control
P-18ES3-24VDC	80W010005	Parallel circuit, double acting spool, double acting ON/OFF solenoid control

2. Working section kit

TYPE	CODE	DESCRIPTION
P/IM-ES	-	As previous with port valves prearrangement

3. Spool options

TYPE	CODE	DESCRIPTION
1(ES)	30 01 3655	Double acting, 3 positions, with A and B closed in neutral position
2(ES)	30 01 3656	Double acting, 3 positions, with A and B open to tank in neutral position

4. Control kit

TYPE	CODE	DESCRIPTION
8ES1	30 07 5566	Single acting P → A, with spring return to neutral position
8ES2	30 07 5566	Single acting P → B, with spring return to neutral position
8ES3	30 07 5567	Double acting, with spring return to neutral position

5. Port valves

For codes please refer to page 18.

6. Coils

TYPE	CODE	DESCRIPTION
With ISO4400 connector		
12VDC	20 03 2300	Nominal voltage 12VDC
24VDC	20 03 2301	Nominal voltage 24VDC

a. "A" and "B" ports plugs

TYPE	CODE	DESCRIPTION
G1/2	30 05 4919	For single acting controls type 8ES1 and 8ES2

8ES solenoid control

Electric wiring example

Operating features

- CONTROL
- Internal leakage A(B)→T
($\Delta p = 100 \text{ bar} - 1450 \text{ psi} / T = 40^\circ\text{C}$) : max. $15 \text{ cm}^3/\text{min} - 0.91 \text{ in}^3/\text{min}$
- COIL
- Nominal voltage tolerance : $\pm 10\%$
- Power rating : 36 W
- Coil insulation : class H
- Duty cycle : 100%

8ES3 kit
double acting

8ES1 kit
single acting on A

8ES2 kit
single acting on B

Operating condition diagram

Working section

Complete controls

Proportional hydraulic control type 8IM (30 07 5372)

It can be used with standard spools and body

Operating features

Pilot pressure : max. 50 bar / 725 psi
 Internal leakage A(B) → T ($\Delta p = 100$ bar - 1450 psi / $T = 40^\circ\text{C}$)
: max. 6 cm³/min - 0.37 in³/min

Connection example

- 3 mounted on ports A and B.

Intermediate section

CS1 mid return manifold

Mid return manifolds for directional valve with left and right inlet both; they allow 2 independent circuits with common outlet.

Hydraulic circuit

Description example:
80L GS10/2/AC(X-100)/18L/CS1/ED-18L/BC(X-100)

Intermediate section

DFG pressure compensated flow divider section

The flow on the downstream sections can be adjusted from 0 to 80 l/min. by means of graduated handwheel; exceeding setting flow goes to tank.

Hydraulic circuit

Description example:

80L GS10/2/AC(X-100)/18L/DFG/18L/RC

Intermediate section

Service relief valve section

El configuration

The operation of up stream section exclude the EI downstream section.
The pressure of the downstream sections should be adjusted at least 20 bar below the relief valve setting.
Execution EI2, without plug, is prearranged for a second inlet.

Description example:

80L GS10/2/AC(X-100)/18L/EI1(X-100)/18L/RC

Description example:

80L GS10/2/AC(X-100)/18L/EI2(X-100)/18L/RC

Specifications

Spool: 1.. 12 Spools /Double - Single - Closed Center - Motor - Floating - Regenerative Spool

Liter: 100L Nominal - 120L Max

Ports: 3/4 Standard -1/2 Optional

Front Cap: Handle - Mechanical Joystick - Hydraulic Joystick - Remote Cable Control - Lock Handle

End Cap: Spring - Detent - Floating - Pneumatic - Proportional Coil - Hydraulic Control - Electro Hydraulic - Remote Cable Control

Open Center / Carry over / Parallel Circuit

Features

Simple, compact and heavy duty designed sectional valve from 1 to 12 sections for open and closed center hydraulic systems.

- ▶ Fitted with a main pressure relief valve and a load check valve on every working section
- ▶ Available with parallel, tandem or series circuit.
- ▶ Optional carryover port.
- ▶ A wide variety of auxiliary valves.
- ▶ Intermediate sections for several types of circuit.
- ▶ Available manual, pneumatic, hydraulic, electro--hydraulic, and remote with flexible cables spool control kits.
- ▶ Diameter 20 mm (0.79 in) interchangeable spools.

Additional information

This catalogue shows the product in the most standard configurations. Please contact Sales Dpt. for more information that is detailed or special request.

WARNING!

All specifications of this catalogue refer to the standard product at this date.
GMS, oriented to a continuous improvement, reserves the right to discontinue, modify or revise the specifications, without notice.

GMS IS NOT RESPONSIBLE FOR ANY DAMAGE CAUSED BY AN INCORRECT USE OF THE PRODUCT.

Valve general informations

Performance data (pressure drop vs. flow)

Open centre

From side inlet to side outlet.

Inlet to work port

From side inlet to A port (spool in position 1) or B port (spool in position 2).

Work port to outlet

From A port (spool in position 2) or B port (spool in position 1) to side outlet.

Valve general informations

Hydraulic circuit

Parallel circuit

Standard configuration with open centre and side inlet and outlet.

Description example
100L GS16/2/AC(X-100)/18L/18L/RC

Series-parallel (tandem) circuit

It needs a special working section kit
Tandem section is fed from thr free flow pressure line; it's excluded when an up stream section is operated.

Description example
100L GS16/2/AC(X-100)/18L/ SP-18L/RC

Series circuit

It needs a special working section kit
The return oil from service ports feed the remaining down stream sections.

Description example
100L GS16/2/AC(X-100)/ S-18L/P-18L/RC

Directional valve with right inlet

Description example
100L GS16/2/BC(X-100)/18L/18L/RC

KE6R3	30 07 5505	Kit for 6 sections

VRE - VRC backpressure valve

Valve is assembled on flow through passage of outlet cover; it's necessary to provides pilot pressure to the actuator.
RV complete (with backpressure valve and tapered plug)

Working section

"A" side spool positioners

Particular positioner kits for special spools

13NZ kit (30 07 5415)

4 positions with spring return in neutral and detent in position 3: **for 5DY spool.**

"B" side options

Lever control

Type L (30 07 5403)

Alluminium lever pivot box with protective rubber bellow; it can be roated 180° (configuration **L180**).

configuration L180

Type LF1 (30 07 5405)

With spool stroke adjustment in position 1 (P → A).

Type SLP (30 07 5406)

Mechanical control with dust-proof plate kit.

Working section

"B" side options

Lever control

Type LB (30 07 5407)

Steel manufacture.
Pivot can be assembled below (LB1 configuration) or above (LB3 configuration).

1	0	2
---	---	---

"B" side options

Safety lever control

Safety levers with lock in neutral complete with handlever; lift handlever knob to operate.
With insulated handlever type **LEBP**

Type LEB (30 07 5409)

Working section

"B" side options

Controls prearrangement

Type SL

Type SLCZ (30 07 5347)

Allen wrench 4
6 Nm / 4.4 lbft

Protection cap usable with pneumatic, electropneumatic, and electrohydraulic spool positioners.

TQ cable remote control kit (30 07 5398)

Waterproof cap prearranged for remote control with flexible cable.

NOTE : For further information about remote cable control, require related documentation.

"B" side options

LCB mechanical joystick for two sections control (30 07 5433)

Dimensions and movement scheme

Working section

Complete controls

Proportional hydraulic control type 8IM (30 07 5414)

It can be used with standard spools and body

Operating features
Pilot pressure : max. 50 bar / 725 psi
Internal leakage A(B) → T ($\Delta p = 100 \text{ bar} - 1450 \text{ psi}$ / $T = 40^\circ\text{C}$)
.....: max. $6 \text{ cm}^3/\text{min} - 0.37 \text{ in}^3/\text{min}$

- 2 mounted on port B.
- 3 mounted on ports A and B.

Intermediate section

CS1 mid return manifold

Mid return manifolds for directional valve with left and right inlet both; they allow 2 independent circuits with common outlet.

Hydraulic circuit

Description example:

100L GS16/2/AC(X-100)/18L/ **CS1**/ED-18L/BC(X-100)

Intermediate section

DFG pressure compensated flow divider section

The flow on the downstream sections can be adjusted from 0 to 100 l/min. by means of graduated handwheel; exceeding setting flow goes to tank.

Hydraulic circuit

Description example:
100L GS16/2/AC(X-100)/18L/DFG/18L/RC

Intermediate section

Service relief valve section

EI configuration

The operation of up stream section exclude the EI downstream section.

The pressure of the downstream sections should be adjusted at least 20 bar below the relief valve setting.

Execution EI2, without plug, is prearranged for a second inlet.

Description example:

100L GS16/2/AC(X-100)/18L/ **EI1(X-100)**/18L/RC

Description example:

100L GS16/2/AC(X-100)/18L/ **EI2(X-100)**/18L/RC

150L GS

GMS
hydraulic

Specifications

Spool: 1..12 Spools/Double - Single - Closed Center - Motor - Floating - Regenerative Spool

Liter: 150L Nominal -170L Max

Ports: 3/4 Standard

Front Cap: Handle - Mechanical Joystick - Hydraulic Joystick - Remote Cable Control - Lock Handle

End Cap: Spring - Detent - Floating - Pneumatic - Proportional Coil - Hydraulic Control - Electro Hydraulic - Remote Cable Control

Open Center / Carry over / Parallel Circuit

Features

Simple, compact and heavy duty designed sectional valve from 1 to 12 sections for open and closed center hydraulic systems.

- ▶ Fitted with a main pressure relief valve and a load check valve on every working section
- ▶ Available with parallel, tandem or series circuit.
- ▶ Optional carryover port.
- ▶ A wide variety of auxiliary valves.
- ▶ Intermediate sections for several types of circuit.
- ▶ Available manual, pneumatic, hydraulic, electro--hydraulic, and remote with flexible cables spool control kits.
- ▶ Diameter 20 mm (0.79 in) interchangeable spools.

Additional information

This catalogue shows the product in the most standard configurations. Please contact Sales Dpt. for more information that is detailed or special request.

WARNING!

All specifications of this catalogue refer to the standard product at this date.

GMS, oriented to a continuous improvement, reserves the right to discontinue, modify or revise the specifications, without notice.

GMS IS NOT RESPONSIBLE FOR ANY DAMAGE CAUSED BY AN INCORRECT USE OF THE PRODUCT.

Valve general informations

Working conditions

This catalogue shows technical specifications and diagrams measured with mineral oil of 46 mm²/s – 46cSt viscosity at 40°C temperature.

Nominal flow rating		150 l/min.	
Max. flow		170 l	
Operating pressure (max.)	Series-parallel (tandem) circuit	315 bar	4600 psi
Back pressure (max.)	on outlet port T	25 bar	360 psi
Internal leakage A(B)→T	Δp=100 bar – 1450 psi fluid and valve at 40°C	3cm ³ /min.	0.18 in ³ /min.
Hydraulic fluid		Mineral base oil	
Fluid temperature	with NBR seals	from - 20° to 80°C	
	with FPM (VITON) seals	from - 20° to 100°C	
Viscosity	operating range	from 15 to 75 mm ² /s	from 15 to 75 cSt
	Min.	12 mm ² /s	12 cSt
	Max.	400 mm ² /s	400 cSt
Max. level of contamination		19/16 – ISO 4406	
Tie rods tightening torque (wrench 17)		50 Nm	36 lbft

Standard threads

Dimensional data

Valve general informations

Performance data (pressure drop vs. flow)

Open centre

From side inlet to side outlet.

Inlet to work port

From side inlet to A port (spool in position 1) or B port (spool in position 2).

Work port to outlet

From A port (spool in position 2) or B port (spool in position 1) to side outlet.

Valve general informations

Hydraulic circuit

Parallel circuit

Standard configuration with open centre and side inlet and outlet.

Description example
150L GS16/2/AC(X-100)/18L/18L/RC

Series-parallel (tandem) circuit

It needs a special working section kit
Tandem section is fed from thr free flow pressure line; it's excluded when an up stream section is operated.

Description example
150L GS16/2/AC(X-100)/18L/ SP-18L/RC

Series circuit

It needs a special working section kit
The return oil from service ports feed the remaining down stream sections.

Description example
150L GS16/2/AC(X-100)/ S-18L/P-18L/RC

Directional valve with right inlet

Description example
150L GS16/2/BC(X-100)/18L/18L/RC

Complete sections ordering codes

KE6R3	30 07 5511	Kit for 6 sections

VRE backpressure valve

Valve is assembled on flow through passage of outlet cover; it's necessary to provides pilot pressure to the actuator.
RV complete (with backpressure valve and tapered plug)

Working section

"A" side spool positioners

Particular positioner kits for special spools

8CR kit (30 07 5575)

3 positions with spring return in neutral and reduced spool stroke: **for 8P spool.**

13NZ kit (30 07 5419)

4 positions with spring return in neutral and detent in position 3: **for 5DY spool.**

"B" side options

Lever control

Type L (30 07 5403)

Alluminium lever pivot box with protective rubber bellow; it can be roated 180° (configuration **L180**).

configuration L180

Type LF1 (30 07 5405)

With spool stroke adjustment in position 1 (P → A).

Type SLP (30 07 5406)

Mechanical control with dust-proof plate kit.

Working section

"B" side options

Lever control

Type LB (30 07 5407)

Steel manufacture.
Pivot can be assembled below (LB1 configuration) or above (LB3 configuration).

1	0	2
---	---	---

"B" side options

Safety lever control

Safety levers with lock in neutral complete with handlever; lift handlever knob to operate.
With insulated handlever type **LEBP**

Type LEB (30 07 5409)

Working section

"B" side options

Controls prearrangement

Type SL

Type SLCZ (30 07 5347)

Protection cap usable with pneumatic, electropneumatic, and electrohydraulic spool positioners.

TQ cable remote control kit (30 07 5398)

Waterproof cap prearranged for remote control with flexible cable.

NOTE : For further information about remote cable control, require related documentation.

"B" side options

LCB mechanical joystick for two sections control (30 07 5433)

Dimensions and movement scheme

Working section

Complete controls

Proportional hydraulic control type 8IM (30 07 5414)

It can be used with standard spools and body

Connection example

Complete controls

Proportional hydraulic control type 13IM (30 07 5421)

It can be used with floating spools and special body kit

Operating features

Pilot pressure : max. 50 bar / 725 psi
Internal leakage A(B) → T ($\Delta p = 100 \text{ bar} - 1450 \text{ psi}$ / $T = 40^\circ\text{C}$)
.....: max. 6 cm³/min - 0.37 in³/min

Performance data

Pressure - stroke diagram

Max. pilot pressure 30 bar - 435 psi.

Special configurations

Technical drawing of the 336 hydraulic cylinder in its retracted position. The drawing shows the cylinder with ports P, T, and A1/B1. Dimensions include a total length of 336 mm [13.23], a retracted length of 175 mm [6.89], and a stroke of 161 mm [6.34]. The diameter is 176 mm [6.93]. The drawing also indicates an angle excursion of $\pm 90^\circ$.

- 3 mounted on ports A and B.

Intermediate section

CS1 mid return manifold

Mid return manifolds for directional valve with left and right inlet both; they allow 2 independent circuits with common outlet.

Hydraulic circuit

Description example:
150L GS16/2/AC(X-100)/18L/ CS1/ED-18L/BC(X-100)

Intermediate section

DFG pressure compensated flow divider section

The flow on the downstream sections can be adjusted from 0 to 150 l/min. by means of graduated handwheel; exceeding setting flow goes to tank.

Hydraulic circuit

Description example:

150L GS16/2/AC(X-100)/18L/ DFG/18L/RC

Intermediate section

Service relief valve section

EI configuration

The operation of up stream section exclude the EI downstream section.

The pressure of the downstream sections should be adjusted at least 20 bar below the relief valve setting.

Execution EI2, without plug, is prearranged for a second inlet.

Description example:

150L GS16/2/AC(X-100)/18L/EI1(X-100)/18L/RC

Description example:

150L GS16/2/AC(X-100)/18L/EI2(X-100)/18L/RC

Available configurations

RC: side outlet

RD: upper outlet

RE: upper outlet with side carry-over

RK: upper outlet and closed centre

RF: With ports plugged

RV: With backpressure valve: **to be used together with the electro-hydraulic control**

1. Complete outlet cover *			2. Circuit options *			
TYPE	CODE	DESCRIPTION	TYPE	CODE	QTY	DESCRIPTION
RC	30 08 5658	Side outlet	-	30 05 4918	1	G 3/8 plug for carry-over (RE), carry-over with backpressure valve (RV) and closed centre (RK) options
RD	30 08 5721	Upper outlet	VRE	30 05 4905	1	VRE backpressure valve for RV configuration
RE	30 08 5723	Upper outlet with side carry-over sleeve	-	30 05 4993	1	Plug G1
RK	30 08 5722	Upper outlet with closed center				
RF	30 08 5725	With ports plugged				
RV	30 08 5724	With backpressure valve
