Features

Our juicers are totally automatic:
There is no need to cut the oranges
in half. Just place the oranges in the
feeder basket and the machine will do
everything for you at a high speed.

Our exclusive and unique rotating
system is very attractive and visible,
which attracts the attention of
consumers, hence increases juice
demand.

While squeezing, the juice is not in
contact with the peel, avoiding the
contact of the bitter taste with the
juice.

Equipped with a 0.75 Hp motor and gears of steel, the FastTop model is certainly within the range of small equipment, the strongest and most robust machine on the market.

The machine is totally maintenance free.

Easy to dismantle, which takes only one minute, cleaning is really easy and will take less than 3 minutes.
