Xaar Proton 382/25 print head

The Xaar Proton 35 deliver the best combination of throughput and print quality for a range of applications, including wide-format graphics and coding & marking. Lockable ink and electrical connections together with well-established drive electronics ensure and reduced time-to-market. The Xaar delivers excellent and consistent print performance enabling users to print high quality without compromising on speed. The Xaar Proton is the latest printhead from Xaar, a world leader in the development and manufacture of piezoelectric drop-on-demand inkjet technologies.

For printers:

Flora LJ 320X, Rodin X4320 / X6164 / X6184, Myjet LA3208XR35 / JA3216XR35

Physical Attributes	Xaar Proton 35	Physical Attributes	Xaar Proton 35
Printhead weight (dry)	120 g	Active nozzles	382
Ink type	Solvent, UV, Oil	Print swathe width	53.7 mm
Drop volume *	35 pl	Nozzle pitch	141 µm
Typical firing frequency *	9.5 kHz	Drop velocity*	5 m/s
Dimensions (WxDxH)	86x21x75 mm	Nozzle density (nozzles per inch)	180 npi
* Dependent on ink used and system integration
