LINKSYS

N300

Wi-Fi® RANGE EXTENDER
RE3000W

Range Extender

Works with any router

Plug directly into wall or use adapter for tabletop placement.

Boost coverage to help eliminate dead zones throughout your home.

Numerous factors can affect the signal strength from a high-performance router to certain areas of your home. Building materials as well as interference from appliances and even a house's structure can hinder Wi-Fi coverage.

The Linksys N300 Wi-Fi Range Extender boosts the Wi-Fi signal to those hard-to-reach places and also features an Ethernet port to supply Internet access to wired devices—from any appropriately located, active power outlet.

Key Features and Benefits

- **Universal Compatibility**
  Wireless-N technology is compatible with all a/b/g/n devices
  Works with any router or gateway including routers supplied by a service provider*
- **Fast Ethernet Port**
  Delivers a strong wired connection
- **Easy Setup**
  Installation wizard provides easy installation and directs optimal placement
  Push-Button Security WPS⁺ makes adding devices simple and secure
- **QoS**
  Prioritizes bandwidth for smoother media streaming

Wi-Fi® RANGE EXTENDER
RE3000W

PACKAGE CONTENTS
- Linksys N300 Wi-Fi Range Extender
- CD-ROM with Setup Software and Resources
- AC Power Cord (US, EU, and UK types)
- AC Power Clips (US, EU, and UK types)
- AC Power Connector Cover
- Ethernet Cable
- Quick Installation Guide

MINIMUM SYSTEM REQUIREMENTS
PC or other devices with Ethernet network port
AC power outlets
PC/Mac® with CD-ROM for utility or Wi-Fi Protected Setup™ enabled router

Specifications are subject to change without notice.

An active, customer-purchased Internet Service Provider broadband account is required for connection to the Internet.

Wireless Security:
Wi-Fi Protected Setup™ button
WPA®/WPA2® encryption
SPI firewall
WEP encryption

Ports:
1 Fast Ethernet, C7 connector
for localized AC cable or clip

1-Year Limited Warranty

Case Pack Width (in.) (*PL): 7.25
Case Pack Height (in.) (*PL): 10.00

* Maximum performance derived from IEEE Standard 802.11 specification. Actual performance can vary, including lower wireless network capacity, data throughput rate, range and coverage. Performance depends on many factors, conditions and variables, including distance from the access point, volume of network traffic, building materials and construction, operating system used, mix of wireless products used, interference and other adverse conditions.

† Range specifications are based on performance test results under normal use case conditions. Actual ranges will increase or decrease depending on wireless obstructions, operating environments and building material. Wireless coverage claims are used only as reference and are not guaranteed, as each wireless network is unique.

Secure push-button setup works with devices that support Wi-Fi Protected Setup™ like Linksys E-Series routers and others.
